**Language Poets Use** - Winifred Nowottny  
1962-01-01

Mrs Nowottny's chief aim in this 'valuable book which could serve as a useful introduction to practical criticism' (Review of English Studies) is to inquire as to what it is that makes the language of poetry poetic. The book grows out of the leading trends today in ideas about language and the way it works but to the matters discussed Mrs Nowottny brings a keen mind of her own and considerable powers as a literary critic. Stressing the continuity of poetry with other uses of language she shows how under the control of the poet's purpose everyday language contributes to the achievement of the most complex and profound effects, and she illustrates these effects with a wealth of examples. Mrs Nowottny is Lecturer in English at University College, London.

**Writing and Difference** - Jacques Derrida 2021-01-27

First published in 1967, *Writing and Difference*, a collection of Jacques Derrida's essays written between 1959 and 1966, has become a landmark of contemporary French thought. In it we find Derrida at work on his systematic deconstruction of Western metaphysics. The book's first half, which

includes the celebrated essay on Descartes and Foucault, shows the development of Derrida's method of deconstruction. In these essays, Derrida demonstrates the traditional nature of some purportedly nontraditional currents of modern thought—one of his main targets being the way in which "structuralism" unwittingly repeats metaphysical concepts in its use of linguistic models. The second half of the book contains some of Derrida's most compelling analyses of why and how metaphysical thinking must exclude writing from its conception of language, finally showing metaphysics to be constituted by this exclusion. These essays on Artaud, Freud, Bataille, Hegel, and Lévi-Strauss have served as introductions to Derrida's notions of writing and *différence*—the untranslatable formulation of a nonmetaphysical "concept" that does not exclude writing—for almost a generation of students of literature,

philosophy, and psychoanalysis. Writing and Difference reveals the unacknowledged program that makes thought itself possible. In analyzing the contradictions inherent in this program, Derrida goes on to develop new ways of thinking, reading, and writing,—new ways based on the most complete and rigorous understanding of the old ways. Scholars and students from all disciplines will find Writing and Difference an excellent introduction to perhaps the most challenging of contemporary French thinkers—challenging because Derrida questions thought as we know it.

*Parched Earth* - Elieshi Lema 2001

This is an extraordinary first novel by a Tanzanian women writer. The central character, Doreen, tells her story in the first person narrative. Born into a women headed household in a rural area, her inner life and development mirror her life's passage: education, career, the town, marriage and motherhood. Whilst not didactic nor impinging on beautifully crafted writing, the novel deals with gender politics from a local level rather than a western oriented feminist stance. Both fatalism and seperatism are rejected and the book is imbued with insights and touchstones about the female condition.

*Wisecracks!* - Wolfgang Mieder 2003-03

**Barbarians in the Greek and Roman World** - Erik Jensen 2018-09-15

What did the ancient Greeks and Romans think of the peoples they referred to as barbari? Did they share the modern Western

conception—popularized in modern fantasy literature and role-playing games—of "barbarians" as brutish, unwashed enemies of civilization? Or our related notion of "the noble savage?" Was the category fixed or fluid? How did it contrast with the Greeks and Romans' conception of their own cultural identity? Was it based on race? In accessible, jargon-free prose, Erik Jensen addresses these and other questions through a copiously illustrated introduction to the varied and evolving ways in which the ancient Greeks and Romans engaged with, and thought about, foreign peoples—and to the recent historical and archaeological scholarship that has overturned received understandings of the relationship of Classical civilization to its "others."

*Narrative Factuality* - Monika Fludernik  
2019-12-16

The study of narrative—the object of the rapidly growing discipline of narratology—has been traditionally concerned with the fictional narratives of literature, such as novels or short stories. But narrative is a transdisciplinary and transmedial concept whose manifestations encompass both the fictional and the factual. In this volume, which provides a companion piece to Tobias Klauk and Tilmann Köppe's *Fiktionalität: Ein interdisziplinäres Handbuch*, the use of

narrative to convey true and reliable information is systematically explored across media, cultures and disciplines, as well as in its narratological, stylistic, philosophical, and rhetorical dimensions. At a time when the notion of truth has come under attack, it is imperative to reaffirm the commitment to facts of certain types of narrative, and to examine critically the foundations of this commitment. But because it takes a background for a figure to emerge clearly, this book will also explore nonfactual types of narratives, thereby providing insights into the nature of narrative fiction that could not be reached from the narrowly literary perspective of early narratology.

Essays on the Anatomy of Expression in Painting - Sir Charles Bell 1806

First edition of Bell's (1774-1842) important study of the anatomy and physiology of facial expression. The expressions, attitudes, and movements of the human body had always interested scientists as well as artists, but never before had they been treated with such depth and conciseness. The work reflects Bell's brilliance as both artist and anatomist, and inspired Darwin's own *Expression of the Emotions* (1872), which he described Bell as one of the founders of the subject as a branch of science. **Of Grammatology** - Jacques Derrida 2013-10-17

Jacques Derrida's revolutionary theories about deconstruction, phenomenology, psychoanalysis, and structuralism, first voiced in the 1960s, forever changed the face of European and American criticism. The ideas in *De la grammatologie* sparked lively debates in intellectual circles that included students of literature, philosophy, and the humanities, inspiring these students to ask questions of their disciplines that had

previously been considered improper. Thirty years later, the immense influence of Derrida's work is still igniting controversy, thanks in part to Gayatri Spivak's translation, which captures the richness and complexity of the original. This corrected edition adds a new index of the critics and philosophers cited in the text and makes one of contemporary criticism's most indispensable works even more accessible and usable.
