Seeking to avoid polemical argument, Ali inspects key themes such as consent and control, which are crucial to any understanding of either traditional Islamic sexual ethics or the possibilities for progressive transformation in these ideals. **Looking Within** - Deborah Blizzard 2007-08-03

An ethnographic study of fetoscopy that considers both the broader cultural context of this high-risk obstetrical procedure and the patient's individual experience. In Looking Within, Deborah Blizzard examines the high-risk in utero surgery known as fetoscopy, considering it as both cutting-edge medical technology and as a sociocultural construction of patients, their social networks, and medical providers. She looks at the way individual experiences shape these procedures and how fetoscopy affects individuals (both patients and providers) on a personal, emotional level. Based on an eleven-month ethnographic study of the fetoscopy practice at a community-based hospital and further interviews with former patients, Looking Within offers a vivid picture of the sometimes conflicted, often desperate, and always emotional lives of those undergoing fetoscopy, and challenges current assumptions about normal and appropriate pregnancy experiences. To convey the complex reality of fetoscopy, Blizzard draws from the experiences of the real patients she interviewed for the book to present the fictional case of Melinda and Joe, taking them through the entire process, from diagnosis to decision to outcome. She then discusses the emergence of fetoscopy as an accepted form of high-risk obstetrical care, how fetoscopy programs are established at hospitals, and why otherwise healthy women consent to surgery. Blizzard examines the use of fetoscopy in single-fetus and in twin pregnancies, looking at how religion, culture, society, and medical science inform any understanding of who or what is in utero (a baby? a tumor? a mass?). She also discusses definitions of loss and success, and the narratives patients and their social networks construct to make sense of them. Looking Within will help physicians and nurses improve the development and delivery of fetoscopy procedures, help patients understand this new technology, and help scholars evaluate fetoscopy's bioethical, social, and cultural implications.

Women's Empowerment for Sustainability in Africa - Robert Dible 2019-01-17

This book uses an open, explorative approach to deal with the different aspects of gender discrimination and gender empowerment policies, as well as their impact on economic development and capacity-building in several African countries. It uses primary and secondary data to present the argument that, without the full input of women, sustainable development will not be achieved in many African countries. This book is the first text written by knowledgeable gender issue experts that understand the culture of, and lived and conducted research in, Africa. It provides many examples of the relationships between gender and economic development around the African continent, highlighting different processes and practices. As such, the contributors here illustrate the impact of weak gender policies, and the ability to adequately develop female capacity building that could lead to wide-spread sustainable economic growth in Africa. They also explore a wide range of new dimensions and variables that are commonly ignored by other text books on gender equality. The book will help graduate, undergraduate students and other readers to understand women's policies in the past, present, and future by analysing and illustrating cultural, political and socio-historical contexts which have shaped women's role in the economic and sustainable development of Africa.

**Through Our Eyes** - Gail Garfield 2010-03-11

How have African American men interpreted and what meaning

have they given to social conditions that position them as the primary perpetrators of violence? How has this shaped the ways they see themselves and engaged the world? Through *Our Eyes* provides a view of black men's experiences that challenges scholars, policy makers, practitioners, advocates, and students to grapple with the reality of race, gender, and violence in America. This multi-level analysis explores the chronological life histories of eight black men from the aftermath of World War II through the Cold War and into today. Gail Garfield identifies the locations, impact, and implications of the physical, personal, and social violence that enters the lives of African American men. She addresses questions critical to understanding how race, gender, and violence are insinuated into black men's everyday lives and how experiences are constructed, reconstructed, and interpreted. By appreciating the significance of how African American men live through what it means to be black and male in America, this book envisions the complicated dynamics that devalue their lives, those of their family, and society.

**Federal Narcotics Laws and the War on Drugs** - Thomas C Rowe 2013-04-15

We're losing the "war on drugs"—but the fight isn't over yet. *Federal Narcotics Laws and the War on Drugs* examines our current anti-drug programs and policies, explains why they have failed, and presents a plan to fix them. Author Thomas C. Rowe, who has been educating college students on recreational drug use for nearly 30 years, exposes the truth about anti-drug programs he believes were conceived in ignorance of the drugs themselves and motivated by racial/cultural bias. This powerful book advocates a shift in federal spending to move funds away from the failed elements of the "war on drugs" toward policies with a more realistic chance to succeed—the drug courts, education, and effective treatment. Common myths and misconceptions about drugs have produced anti-drug programs that don't work, won't work, and waste millions of dollars. *Federal Narcotics Laws and the War on Drugs* looks at how—and why—this has happened and what can be done to correct it. The book is divided into "How did we get into this mess?" which details the history of anti-narcotic legislation, how drug agencies evolved, and the role played by Harry Anslinger, Commissioner of the United States Bureau of Narcotics from 1930 to 1962; "What works and what doesn't work," which looks at the failure of interdiction efforts and the negative consequences that have resulted with a particular focus on the problems of prisons balanced against the drug court system; and a third section that serves as an overview of various recreational drugs, considers arguments for and against drug legalization, and offers suggestions for more effective methods than our current system allows. *Federal Narcotics Laws and the War on Drugs* also examines: the creation of the Federal Bureau of Narcotics current regulations and structures current federal sentencing guidelines current state of the courts and the prison system mandatory sentencing and what judges think interdiction for heroin, cocaine and crack cocaine, and marijuana early education efforts the DARE program drug use trends drug treatment models the debate over legalization *Federal Narcotics Laws and the War on Drugs* also includes several appendices of federal budget figures, cocaine and heroin purity and price, and federal bureau of prisons statistics. This unique book is required reading for anyone concerned about the drug problem in the United States and what is—and isn't—being done to correct it.

**How Sex Got Screwed Up: The Ghosts that Haunt Our Sexual Pleasure - Book Two** - Jon Knowles 2019-06-28

The ghosts that haunt our sexual pleasure were born in the Stone Age. Sex and gender taboos were used by tribes to differentiate themselves from one another. These taboos filtered into the lives of Bronze and Iron Age men and women who lived in city-states and empires. For the early Christians, all sex play was turned into sin, instilled with guilt, and punished severely. With the invention of sin came the construction of women as subordinate beings to men. Despite the birth of romance in the late middle ages, Renaissance churches held inquisitions to seek out and destroy sex sinners, all of whom it saw as heretics. The Age of Reason saw the demise of these inquisitions. But, it was doctors who would take over the roles of priests and ministers as sex became defined by discourses of crime, degeneracy, and sickness. The middle of the 20th century saw these medical and religious teachings challenged for the first time as activists, such as Alfred Kinsey and Margaret Sanger, sought to carve out a place for sexual freedom in society. However, strong opposition to their beliefs and the growing exploitation of sex by the media at the close of the century would ultimately shape 21st century sexual ambivalence. Book Two of this two-part publication traces the history of sex from the Victorian Era to present day. Interspersed with 'personal hauntings' from his own life and the lives of friends and relatives, Knowles reveals how historical discourses of sex continue to haunt us today. This book is a page-turner in simple and plain language about 'how sex got screwed up' for millennia. For Knowles, if we know the history of sex, we can get over it.
