Ten Years to Midnight - Blair H. Sheppard 2020-08-04

"Shows how humans have brought us to the brink and how humanity can find solutions. I urge people to read with humility and the daring to act." —Harpal Singh, former Chair, Save the Children, India, and former Vice Chair, Save the Children International In conversations with people all over the world, from government officials and business leaders to taxi drivers and schoolteachers, Blair Sheppard, global leader for strategy and leadership at PwC, discovered they all had surprisingly similar concerns. In this prescient and pragmatic book, he and his team sum up these concerns in what they call the ADAPT framework: Asymmetry of wealth; Disruption wrought by the unexpected and often problematic consequences of technology; Age disparities--stresses caused by very young or very old populations in developed and emerging countries; Polarization as a symptom of the breakdown in global and national consensus; and loss of Trust in the institutions that underpin and stabilize society. These concerns are in turn precipitating four crises: a crisis of prosperity, a crisis of technology, a crisis of institutional legitimacy, and a crisis of leadership. Sheppard and his team analyze the complex roots of these crises--but they also offer solutions, albeit often seemingly counterintuitive ones. For example, in an era of globalization, we need to place a much greater emphasis on developing self-sustaining local economies. And as technology permeates our lives, we need computer scientists and engineers conversant with sociology and psychology and poets who can code. The authors argue persuasively that we have only a decade to make headway on these problems. But if we tackle

them now, thoughtfully, imaginatively, creatively, and energetically, in ten years we could be looking at a dawn instead of darkness.

This fully updated new edition provides the best-known practical overview of the law regarding companies, business activities, and capital markets in Europe, at both the European Union (EU) and Member State levels. It incorporates analysis of recent developments including the impact of global initiatives in such aspects of the corporate environment as regulation of financial institutions and non-financial reporting obligations with a view to sustainability and other social responsibility concerns. The authors, all leading experts in European corporate law, describe current and emerging trends in such areas of corporate law practice as the following: - rules on cross-border mergers; - employee involvement in business activities; - the initiatives by the Organisation for Economic Co-operation and Development (OECD) and the EU to curb tax avoidance; - Member States' implementation of EU legislation; - a company's freedom to incorporate in a jurisdiction not its own; - competition among the legal forms of different Member States; and - safeguarding of employee involvement in cross-border transactions. With respect to national law, the laws of Belgium, France, Germany, the Netherlands, Poland, Spain, and the United Kingdom are taken into account; Italy is now included in this new edition. As in earlier editions, the authors demonstrate that analysis and comparison of national corporate laws yield highly valuable general principles and observations, not least because business organizations, wherever located, tend to show a fundamentally similar set of legal characteristics. The Third Edition will continue to be of great value to practitioners and academics who wish to acquire a better understanding of European corporate law, in its supranational dimension as well as in the similarities and differences among the various national legal systems.
