Health visitors play a crucial role in supporting mothers who choose to breastfeed and their families. This accessible text enables readers to practise confidently in this vital area, focusing on underpinning knowledge and parent-centred counselling skills, and understanding cultural contexts. Breastfeeding a child improves the lifelong health of a population, and promoting breastfeeding is an important area of public health practice. *Breastfeeding for Public Health* incorporates the voices of health visitors, mothers and fathers to give insight into common practical challenges faced and suggestions for overcoming or working around them. Presenting up-to-date research, it explores the practical skills needed by health visitors to support mothers with breastfeeding; how to develop the communication skills and self-awareness necessary to build successful and trusting relationships with women and their families; why breastfeeding is so important for babies' and mothers' health and psychological attachment, closeness and long-term mental health; what we know about the content of breastmilk and the positive effect it has on the baby's gut microbiome, which in turn benefits the infant's long-term health and helps to protect against non-communicable diseases; the role of the father and grandparents in successfully initiating and sustaining breastfeeding; and how cultural awareness and

sensitivity can influence practice for the better. She's the one woman I'd give anything to forget--and now I'm stuck living with her. I'm making a fresh start in Lake Tahoe, until my stubborn sister decides to move Mira into our cabin. I'll be damned if I move out on Mira's account. Nothing has changed in the years since I last saw Mira. Her tempting body and smart mouth taunt me daily. The only hope I have at keeping my sanity is the knowledge that Mira is hiding something. Sooner or later I'll discover her secret, and knowing her, it'll be damning. But first, I have to ignore the urge to kiss and touch and make Mira mine again. --EXCERPT-- I grab her waist, guiding her back against the shelves. She kisses my cheekbone, nibbles my earlobe. "We can't do this here." That nibble shoots straight to my groin. "I beg to differ. I think we can manage." Once the walls come down, emotions run hot. Untersuchung des Abgasverhaltens bezüglich der gesetzlich nicht limitierten Schadstoffe Aldehyde & Ketone bzw. polyzyklische aromatische Kohlenwasserstoffe - Peter Achilles 2004-05-24

Inhaltsangabe:Zusammenfassung: Aufgrund der abzusehenden Ressourcenerschöpfung von Kraftstoffen auf Mineralölbasis sowie deren

erheblichem Beitrag zum Treibhauseffekt bei der Verbrennung werden vielfältige Untersuchungen angestrebt, Dieselmotoren mit Pflanzenölkraftstoffen zu betreiben. In der vorliegenden Arbeit wird das Betriebs- und Emissionsverhalten eines direkteinspritzenden Dieselmotors beim Betrieb mit unterschiedlichen Pflanzenölmethylestern untersucht. Es sind dies im einzelnen Sojamethylester, Kokosmethylester und Palmkernmethylester. Die Versuche wurden an einem aufgeladenen, direkteinspritzenden 3-Zylinder-Dieselmotor vom Typ MWM TD 226B-3 durchgeführt. Grundlage für die vergleichenden Untersuchungen ist die ISO/DIS 8178-4, nach welcher der Motor in einem 5-Stufen-Test betrieben wurde. Während der Abfolge von 5 definierten Last-Drehzahl-Kombinationen wurde neben den Betriebsdaten auch die Konzentration der gesetzlich limitierten, gasförmigen Abgasbestandteile Kohlenmonoxid, unverbrannte Kohlenwasserstoffe und Stickoxide sowie die Schwärzungszahl nach Bosch als Anhaltspunkt für die Partikelemission protokolliert. Hauptinhalt ist jedoch die Abgasprobennahme zum Zweck der Ermittlung der Emissionen der nicht limitierten Abgaskomponenten polyzyklische aromatische Kohlenwasserstoff PAH sowie Aldehyde & Ketone. Hierfür wurden spezielle Probenahmegeräte zur Verfügung gestellt. Die von der Arbeitsgruppe Organische Chemie durchgeführte nasschemische Analyse lieferte Ergebnisse, welche in geeigneter Form aufbereitet wurden. Die Wirksamkeit eines Oxidationskatalysators auf den Schadstoffausstoß wurde mituntersucht. Alle gewonnenen Ergebnisse für Betriebsverhalten, Schadstoffkonzentrationen und spezifische Schadstoffemissionen wurden rechnerisch und graphisch ausgewertet sowie in übersichtlicher Form dargestellt.

East European Change and Shipping Policy - GILLIAN. LEDGER
2021-12-20

Originally published in 1996, this work begins by considering the changes that have taken place in the social, political and economic environment of Eastern Europe as a whole and then concentrates upon the shipping market with reference to Poland, Romania, Bulgaria, the Czech Republic and Hungary. A detailed model of the relationship between the shipping industry and the contextual changes that have occurred in the region in recent years is then developed before looking specifically at the liner shipping market of Poland and its market positioning within the context of competition in the North Atlantic and European Union operators.

Aquatecture - Robert Barker 2016-01-21

Water plays a vital role in shaping our built environment, as it has done for centuries. We depend on it, we use it, we live with it and we must respect it. *Aquatecture* is the first book to outline new ways of 'designing for water,' using examples from around the world to illustrate methods of utilizing water innovatively, efficiently and safely. The first part of the book explores the historical relationship between water and architecture, examining how cities and civilisations have been drawn to water and have attempted to control it. The chapters go on to assess how this relationship has changed over time, and introduce readers to a range of brand new techniques that will revolutionise the way we think about water, design and urban planning. Solutions such as amphibious housing, wet-proof buildings, zero carbon development, rain gardens, flood storage and new methods of waterfront design are discussed and their effectiveness assessed. Full colour illustrations and international case studies are used throughout the book to bring these new theories to life; practical, technical advice sits alongside truly ground-breaking and

ambitious ideas for the future. This book is an ideal reference tool for all architects, urban designers, planners and sustainability experts who have an interest in creating a beautiful, sustainable, intelligent and pleasurable built environment on land, in water and with water.

A thousand years before the Winter War, Elgo, prince of the Vanadurin, killed the Dragon Sleeth and returned home with the fabulous wealth from the dead beast's lair. But there was more in the bounty than gems and gold, for the treasure was cursed, and in time it brought death to noble and peasant, war between Man and Dwarf, strife and destruction beyond reckoning. Now, generations later, as the conflict continues, the great Dragon Black Kalgalath, in league with the Wizard Andrak, appears to avenge Sleeth's death and claim the Dragon-cursed hoard. Against this unholy alliance, two sworn enemies set forth to find a legendary long-lost weapon: a warhammer of incalculable power that may be the only hope of victory. But neither the Warrior Maiden Elyn nor the Dwarf Thork is prepared for the dangers awaiting them on this quest....

ASEAN and Power in International Relations - Jamie D. Stacey
2020-09-14

This book analyses the Association of Southeast Asian Nations (ASEAN) as a powerful actor in International Relations by examining how the ASEAN community has evolved, looking specifically at its relationship with the EU with regards to human rights. The book adds to important contemporary debates within constructivist theory, shedding light on the need for 'critical' constructivism that emphasises language and contestation and what that may entail. On an empirical level, it challenges the idea of an 'EU-centrism,' demonstrating how ASEAN is the major driving force behind its human rights and community aspirations, as well as within the ASEAN-EU relationship. Furthermore, this book engages with the introspection surrounding constructivism by addressing the trouble with 'norms,' and instead unpacking the relationship between ASEAN and the EU to show language power in play. In particular, the book looks at how language, or rather coercive language, helps us 'see' contestation in action, something that researchers sympathetic towards the idea of ASEAN's 'resistance' have been unable to show through a focus on norms. Tracing the evolution of the ASEAN community and human rights aspirations in a new light, showing how exactly the EU remains an inspiration, but not a model, and more interestingly how ASEAN demonstrates power in the relationship, the book will be of interest to academics working on Asian Studies, European Studies, International Relations Theory and human rights.

Valve train - Simone Dreger 2013-04-18

Valve train systems control the gas exchange in a combustion engine, which means that they represent a significant opportunity for optimizing the combustion process. Since they draw energy from the crankshaft, an efficient valve train contributes greatly to improving overall efficiency. The components of the valve train system are subjected to high loads. In addition to wear due to mechanical forces increasing combustion pressures and temperatures, in particular, place greater demands on the materials and heat dissipation of components on the combustion side. This technical book clearly and thoroughly presents a holistic understanding of the valve train system.

Rotordynamics of Automotive Turbochargers - Hung Nguyen-Schäfer 2015-05-15

Rotordynamics of automotive turbochargers is dealt with in this book encompassing the widely working field of small turbomachines under real operating conditions at the very high rotor speeds up to 300000 rpm. The broadly interdisciplinary field of turbocharger rotordynamics involves 1) Thermodynamics and Turbo-Matching of Turbochargers 2) Dynamics of Turbomachinery 3) Stability Analysis of Linear Rotordynamics with the Eigenvalue Theory 4) Stability Analysis of Nonlinear Rotordynamics with the Bifurcation Theory 5) Bearing Dynamics of the Oil Film using the Two-Phase Reynolds Equation 6) Computation of Nonlinear Responses of a Turbocharger Rotor 7) Aero and Vibroacoustics of Turbochargers 8) Shop and Trim Balancing at Two Planes of the Rotor 9) Tribology of the Bearing Surface Roughness 10) Design of Turbocharger Platforms using the Similarity Laws The rotor response of an automotive turbocharger at high rotor speeds is studied analytically, computationally, and experimentally. Due to the nonlinear characteristics of the oil-film bearings, some nonlinear responses of the rotor besides the harmonic response 1X, such as oil whirl, oil whip, and modulated frequencies occur in Waterfall diagram. Additionally, the influences of the surface roughness and oil characteristics on the rotor behavior, friction, and wear are discussed. This book is written by an industrial R&D expert with many years of experience in the automotive and turbocharger industries. The all-in-one book of turbochargers is intended for scientific and engineering researchers, practitioners working in the rotordynamics field of automotive turbochargers, and graduate students in applied physics and mechanical engineering.

Modeling and Control of Engines and Drivelines - Lars Eriksson

2014-04-07

Control systems have come to play an important role in the performance of modern vehicles with regards to meeting goals on low emissions and low fuel consumption. To achieve these goals, modeling, simulation, and analysis have become standard tools for the development of control systems in the automotive industry. *Modeling and Control of Engines and Drivelines* provides an up-to-date treatment of the topic from a clear perspective of systems engineering and control systems, which are at the core of vehicle design. This book has three main goals. The first is to provide a thorough understanding of component models as building blocks. It has therefore been important to provide measurements from real processes, to explain the underlying physics, to describe the modeling considerations, and to validate the resulting models experimentally. Second, the authors show how the models are used in

the current design of control and diagnosis systems. These system designs are never used in isolation, so the third goal is to provide a complete setting for system integration and evaluation, including complete vehicle models together with actual requirements and driving cycle analysis. Key features: Covers signals, systems, and control in modern vehicles Covers the basic dynamics of internal combustion engines and drivelines Provides a set of standard models and includes examples and case studies Covers turbo- and super-charging, and automotive dependability and diagnosis Accompanied by a web site hosting example models and problems and solutions *Modeling and Control of Engines and Drivelines* is a comprehensive reference for graduate students and the authors' close collaboration with the automotive industry ensures that the knowledge and skills that practicing engineers need when analysing and developing new powertrain systems are also covered.
