The Intelligent School -

Barbara MacGilchrist

2004-02-17

`This is a challenging book and makes for uncomfortable

reading at times because one realises that there is so much more to be accomplished in education. How can the teacher who wants to follow this further find out more? Barbara MacGilchrist, Jane Reed and Kate Myers have given the next step: each chapter has a conclusion and "questions for discussion and activities" which are very open and will lead to considerable introspection' - Education Review `I have rarely been so enthusiastic about a book. Reviewers are supposed to highlight some imperfections - I am at a loss. Recommend this book to all you meet' - Mervyn Flecknoe, Improving Schools `This book would be an invaluable read for all who work in schools including LEA advisors, inspectors and consultants. It contains a chapter on teachers' learning and has some excellent questions for discussion at the end of each chapter that could usefully stimulate ideas for staff development sessions. It would be great if this book were read and taken seriously

by those who make policy as well as those who try to put it into practice' - Escalate `The book is easy to use, clear, well organized, full of practical examples and equally practical questions. It could be a signpost to the future - if the days of educational diktat are really almost over' - Michael Duffy, Times Educational Supplement, Friday Magazine `This Second Edition of The Intelligent School offers a concise and accessible insight into the key aspects of educational leadership. In my view, it ought to be read by anyone who is keen to develop their understanding of theoretical frameworks expertly illustrated through practical examples' - Neil Saunders, Primary Phase Inspector - Hampshire LEA ,(Doctoral Student - The University of Hull) `This is an excellent book. I will use its insights and the wealth of practical questions it offers to help with my present politically driven imperative - the transformation of London's secondary schools. If I have

this book at my elbow and make sure it's well thumbed, there is every chance that we can create 411 intelligent schools across London. The new insights in *The Intelligent School* are a testament to the extraordinary proficiency of these three authors. As the waiter in the restaurant says when serving the meal "Enjoy" - Tim Brighouse, *Times Educational Supplement*

Barbara MacGilchrist, Kate Myers and Jane Reed have written a masterpiece. The First Edition of *The Intelligent School* in 1997 was an outstanding book and it is no surprise that a Second Edition has followed relatively quickly to share more good news for practitioners, policymakers, researchers and scholars. The First Edition shaped my thinking more than most in the late 1990's and I cited it in scores of presentations in different countries around the world. It was a perfect complement to our work on the self-managing school. In this Second Edition, the concept of the Intelligent School is

expanded and the different kinds of intelligences are carefully explained and illustrated. The authors are able to draw on more than five years of implementation in the field and further and broader work in the research and development centres with which they are associated. They offer the best synthesis of the international literature on school effectiveness and school improvement that I have seen. They have performed a great service in making this literature accessible to the profession. I recommended the First Edition as essential reading for all the work in schools. Those who did not do so should certainly acquire the second, but it is important that policymakers and academics do the same. `This book will quickly gain recognition as the leader among an increasing number of books that provide hope that all students in every setting can achieve a high quality education. It is one of the truly outstanding features of this book that it also conveys an unbridled spirit of optimism'

- Brian Caldwell, Professor & Dean, Faculty of Education, University of Melbourne In writing *The Intelligent School*, Second Edition, the authors offer a practical resource to schools to help them maximise their improvement efforts. The aim is to help schools to be intelligent organizations; to be the type of school that can synthesise different kinds of knowledge, experience and ideas in order to be confident about current achievements, and to be able to decide what to do next. This Second Edition has been fully revised and updated particularly in terms of new research evidence about how to improve the quality of learning and teaching in classrooms. The authors set out fresh thinking about the nine intelligences and provide a new framework for school improvement which includes the exploration of spiritual, ethical and emotional intelligence. The book also includes examples of Intelligent Schools in action. Observation Skills for Effective Teaching - Gary D. Borich 2011

The sixth edition of *Observation Skills for Effective Teaching* focuses on observing others and incorporating the right tools, knowledge, and skills into your own practice - key principal means by which you can become an effective and professional teacher. Using this text, you will learn to observe in the following eight areas: learning climate, classroom management, lesson clarity, instructional variety, task orientation, student engagement, student success, and higher thought processes. These eight areas have been found by researchers to be related to desirable cognitive, social, and emotional outcomes in learners. This book will also teach you how to decide what to observe, how to effectively and efficiently observe in the classroom, and how to apply what you have learned through observation to grow as a reflective teacher. In addition, the book provides methodological concepts, observation instruments, and dialogues designed to help you see and practice research-

based patterns of effective teaching. General Methods K-8 and Student Teaching

The SAGE Glossary of the Social and Behavioral Sciences provides college and university students with a highly accessible, curriculum-driven reference work, both in print and on-line, defining the major terms needed to achieve fluency in the social and behavioral sciences.

Comprehensive and inclusive, its interdisciplinary scope covers such varied fields as anthropology, communication and media studies, criminal justice, economics, education, geography, human services, management, political science, psychology, and sociology. In addition, while not a discipline, methodology is at the core of these fields and thus receives due and equal consideration. Curriculum Perspective in Education - Dr. Pragyan Mohanty, Ms. Parama Kundu, Mr. Amal Sankar Mukherjee, Mr. Pranay Pandey 2022-06-20
Introduction Curriculum is often one of the primary concerns in any educational field. What kind of curricula should we suggest to learners? Educators and teachers are concerned about what choices

are to make about teaching content and methods. As for the parents, they would like to know what their children are going to learn. Learners are also concerned about what kinds of content they are going to have in class. "Curriculum" seems to be considered greatly as what teachers are going to teach and, in other words, what learners are going to learn. In fact, "curriculum" is also closely related to how well the learners learn. Thus, as an umbrella term, "curriculum" includes a lot of issues, for example, teaching curriculum, learning curriculum, testing curriculum, administrative curriculum and the hidden curriculum.
