Tonalization - Dr. Shinichi Suzuki 1985

Dr. Suzuki questioned why all vocalists vocalize every day to improve their voices, but instrumentalists do not do so every day with their instruments. He believes that on any instrument, one needs to practice to make a more beautiful tone. First he talks about playing a beautiful resonant tone with the bow while plucking the string with a finger. When a pizzicato is played, the resonance goes on for a long time. Students should listen to that resonance and play the same kind of clear beautiful sound. He talks about how to make a difference in the tone by using a different bow speed, how to practice to find the resonance point, how to change the weight of the arm on the bow to produce a different kind of tone, and how to change tone color. This book includes all of Dr. Suzuki's

basic ideas about tone.

Music Education - Joseph A. Labuta 1997

Music Education: Historical Contexts and Perspectives provides a comprehensive exploration of public school music in the United States. It reviews the history of music education in America from the 1600s through the present, offers a working philosophy of music education, examines the role that this philosophy plays in developing and implementing music curricula, and presents a thorough discussion of music teaching and learning. Chapter instructions suggest relationships between the topics presented in the text, and study and review questions at the end of each chapter promote investigation, synthesis and critical thinking. The final chapter encourages readers to use information presented in the text as the basis for speculation about the future of music education in the United States.

The Woodwinds: Perform, Understand, Teach - James Byo

2016-06-17

The Woodwinds: Perform, Understand, Teach provides comprehensive coverage about the woodwind family of musical instruments for prospective instrumental music teachers. What sets this book apart is its focus on how to teach the instruments. Preparing students in the how of teaching is the ultimate goal of the woodwind class and the ultimate goal of this book, which organizes information by its use in teaching beginning instrumentalists. In developing performance and understanding, pre-service teachers are positioned to learn to teach

through performance—contrasted with an "old-school" belief that one must first spend much time tediously trying to understand how things work before playing the instruments. The book is organized in three parts: Preliminaries, Teaching the Instruments, and Foundations. Chapters in Teaching the Instruments are organized by instrument (flute, clarinet, saxophone, oboe, bassoon) and, within each instrument, according to how an effective teacher might organize experiences for novice learners. Basic embouchure and air stream are covered first, followed by instrument assembly, then hands and holding. Embouchure coverage returns in greater depth, then articulation, and finally "the mechanism," which includes sections on the instruments of the family, transposition, range, special fingerings, tuning and intonation, and reeds. In Foundations, topics are situated in big picture contexts, calling attention to the broad applicability of information across instruments.

The Low Brass Player's Guide to Doubling - Micah Everett

2014-10-17

The Low Brass Player's Guide to Doubling is a guide for low brass players who wish to learn a different low brass instrument. By performing well on several instruments, doublers become more complete musicians, regardless of the instrument being played at any given moment. Taking up a secondary instrument will introduce you to new composers, repertoire, and ideas that will enhance your musicianship. Doubling necessitates more thoughtful playing and leads to more thoughtful teaching; your resulting instruction becomes more effective on every instrument you teach. Playing more instruments will also increase your earning potential! The Low Brass Player's Guide to Doubling includes chapters devoted to: tenor trombonists doubling on bass trombone; bass trombonists doubling on tenor trombone; trombonists doubling on euphonium; trombonists doubling on tuba; tuba players doubling on euphonium; euphonium and tuba players doubling on trombone; alto trombone; contrabass trombone; bass trumpet; and cimbasso. Also included are fingering charts, overtone series charts and

targeted fundamentals for each instrument. The targeted fundamentals are designed to help players learn the new instrument efficiently by extracting fundamental skills unique to the new instrument.

Oboe Unbound - Libby Van Cleve 2014-10-16

After decades of experimentation, musicians have begun to utilize a strikingly colorful palette of sounds on woodwind instruments. Flute, clarinet, and saxophone players, in many different musical settings, regularly use sounds that were unheard of in the middle of the twentieth century. Oboists, in comparison, have lagged somewhat behind their more adventurous colleagues. In writing *Oboe Unbound: Contemporary Techniques*, author Libby Van Cleve opens up the tradition-bound assumptions of the instrument's capabilities. Not only does she include descriptions of the instrument's standard technique from range and reeds to the use of vibrato, but she also discusses recent techniques, such as multiphonics, microtones, altered timbres, and extended range, to name a few. Van Cleve bolsters this book with numerous music examples and professionally-tested fingering charts, and concludes with basic information about the use of electronics for amplification,

recording, and sound enhancement. The book's appendixes include a substantial bibliography of music and literature and a discography including jazz, non-western, and art music recordings. The revised edition incorporates new information about resources now available through the internet and marks the launch of a website that includes examples of all the contemporary sounds as well as audio and video recordings of unreleased compositions.

Woodwind Basics - Bret Pimentel 2021-11-09

Woodwind Basics: Core concepts for playing and teaching flute, oboe, clarinet, bassoon, and saxophone is a fresh, no-nonsense approach to woodwind technique. It outlines the principles common to playing all of the woodwind instruments, and explains their application to each one. The ideas in this book are critical for woodwind players at all levels, and have been battle-tested in university woodwind methods courses, private studios, and school band halls. Fundamental questions answered with newfound clarity include:- What should I listen for in good woodwind playing?- Why is breath support so important, and how do I do and teach it?- What is voicing? How does it relate to ideas like air speed, air temperature, and vowel shapes?- What things does an embouchure need to accomplish?- How can I (or my students) play better in tune?- What role does the tongue really play in articulation?- Which alternate fingering should I choose in a given situation?- How do I select the best reeds, mouthpieces, and instruments?- How should a beginner choose which instrument is the best fit? Woodwind Basics by Bret Pimentel is the new go-to reference for woodwind players and teachers.
