Key features: Detailed exploration of AVT, including historical perspectives and current research that continue to drive clinical practice Essential use of hearing aids, cochlear implants, and other implantable devices, and additional hearing technologies in AVT Goals of the AV practitioner and strategies used in AVT to develop listening, talking, and thinking Effective parent coaching strategies in AVT Blueprint of the AVT session Step-by-step AVT session plans for infants, toddlers, preschoolers, and early school-age children Critical partnerships of the family and the AV practitioner with the audiologist, speech-language pathologist, physical therapist, occupational therapist, hearing resource teacher, and psychologist Families Journeys in AVT from 12 countries around the world In AVT, parents and caregivers become actively engaged as their child's first and most enduring teachers. Following an evidence-based framework, **Auditory-Verbal Therapy: For Young Children with Hearing Loss and Their Families, and the Practitioners Who Guide Them** demonstrates how AV practitioners work in tandem with the family to integrate listening and spoken language into the child's everyday life. The book concludes with personal family stories of hope, inspiration, and encouragement, written by parents from twelve countries across the world who have experienced the desired outcomes for their children following AVT. This book is relevant to AVT practitioners, administrators, teachers of children with hearing loss, special educators, audiologists, speech-language pathologists, psychologists, surgeons, primary care physicians, and parents.

**Curriculum for Young Children: An Introduction** - Eve-Marie Arce 2012-01-01

This book presents basic introductory material on developing and managing curriculum for early childhood education. Designed as a resource for beginning students and as a reference manual for experienced teachers, the text presents focused, sequential coverage on curriculum for young children--excluding potentially confusing details about related topics that are covered in longer books. Discussions cover such important topics as similarities in existing approaches to early childhood education, how to meet children's needs through curriculum, and planning and organizing curriculum. The Second Edition features enhanced standards coverage, increased material on diversity and multiculturalism, video integration, new information on how child development affects curriculum, and more. CURRICULUM FOR YOUNG CHILDREN also helps students and teachers assess the wealth of activity ideas available from other textbooks, resource manuals, and websites. Grade R in Perspective - Anel Pepler 2015-12-01

**Grade R in Perspective** is a structured academic guide for students, educators and practitioners in the field of early child development. It is compiled according to the Curriculum and Assessment Policy Declaration (CAPS) of the National Department of Education 2011 and presents the latest tendencies of international sources. The focus is put on preparing the student to understand the principles of the informal teaching approach and to implement them. Clear directions are given to develop knowledge, skills and attitudes in the

young child so that each learner can achieve self-realisation. Information is given on organising the classroom and the play area to create optimal learning opportunities for the learners. The different levels of development and cultures of the learners are taken into consideration. Valuable suggestions for teaching in practice are illustrated with appropriate examples and photos.

**Effective Interviewing of Children** - Michael Zwiers 2013-08-21

Interviews comprise the majority of professionals' interactions with children. In order to conduct effective interviews, professionals must possess effective communication skills, as well as knowledge of growth and developmental issues, data collection, and analysis. Though this is an important area of study, there has yet to be a book that effectively addresses this topic. In most cases, students studying to become clinicians are forced to rely on the observations of practicing professionals to learn child-focused interview techniques. **Effective Interviewing of Children** is unique in that it is the only comprehensive resource for information on child-focused interviews. The authors differentiate between child- and adult-focused interviews, present an integrated account of the literature on child-focused interviews, and offer techniques and suggestions for addressing developmental differences. Chapters address a wide range of topics including child and professional variables, effective use of language, children with special needs, ethics in interviewing, research interviews, and diagnostic clinical interviews. Aimed at upper-level undergraduate and graduate students, this book is essential for clinically oriented programs such as mental health counseling, social work, psychology, and marriage and family therapy. The book is also of interest to practicing professionals who seek to expand their knowledge of child-focused interview techniques.

Book Talk - Sherry Sanden 2021

"This book envisions the language and learning possibilities of young children's active engagement in literature discussion, which is not often found in books about early read-alouds. This book promotes read-aloud experiences that keep children, their backgrounds, and their experiences front and center. This book shares our journey, as educators and researchers, with a goal to support the learning journey of other early childhood educators. This book includes vignettes from classroom literature discussions as well as conversations between educators"--

Special Education in Contemporary Society - Richard M. Gargiulo 2019-12-05  
*Special Education in Contemporary Society: An Introduction to Exceptionality* offers a comprehensive, engaging, and readable introduction to the dynamic field of special education. Grounded in research and updated to reflect the most current thinking and standards of the field, this book provides students with the knowledge, skills, attitudes, and beliefs that are crucial to constructing learning environments that allow all students to reach their full potential. Authors Richard M. Gargiulo and Emily C. Bouck encourage a deep awareness and understanding of the "human" side of special education, providing students with a look into the lives of exceptional students and their families, as well as the teachers that work with exceptional persons throughout their lives. The Seventh Edition maintains the broad context and research focus for which the book is known while expanding on current trends and contemporary issues to better serve both pre-service and in-service teachers of exceptional individuals. This title is accompanied by a complete teaching and learning package.

**How We Learn** - Klaus Issler 2002-05-17

No one fully understands how learning works, but educational psychologists understand a great deal about what works. The collaborative team of Klaus Issler and Ronald Habermas has assembled an integration of theology and instructional theory in *Teaching for Reconciliation: Foundations and Practice of Christian Educational Ministry*. Now they expound on one aspect of educational theory/theology to help teachers choose the method that best reaches particular learners in a specific learning situation. *How We Learn* demystifies the principles of educational psychology. The book identifies: -- means and barriers in learning- --motivational factors that make learners receptive --learning's outcome in attitudes, spirituality, and behavior Application sections, special exercises and examples, plus dozens of figures and tables aid understanding of learning effectiveness, age-related development, individual learning style, special education, and other issues.

**Positive Child Guidance** - Darla Ferris Miller 2000

Beginning with the idea that children should ultimately become cooperative members of a democratic society, this text outlines both the theory and practice needed to achieve this goal, offering tools for supporting the long-term development of responsibility, self-confidence, and self-control in children. In considering children's individuality and diverse cultural needs and interests, this process teaches adults how to deal with a broad range of behaviors and provides tips about how to maintain a positive assertiveness in the face of many challenges. Miller has been a teacher, child-care center director, teacher trainer, consultant, and professor, and now works in administration at North Harris College. Early Childhood Education - Kimberly A. Gordon Biddle 2013-01-02

Early Childhood Education: Becoming a Professional is an inspiring introduction to the world of early childhood education, preparing the teachers of tomorrow to reach their full potential in their schools and communities.

Written by a diverse and experienced author team (Kimberly A. Gordon Biddle, Ana Garcia-Nevarez, Wanda J. Roundtree-Henderson, and Alicia Valero-Kerrick), this text engages readers to connect contemporary educational and developmental theory and research to developmentally appropriate practices and applications that are easily implemented in the classroom. In response to today's ever-changing educational environment, the text focuses on both the importance of taking personal and professional responsibility, as well as today's issues in diversity—from supporting children with exceptionalities to supporting children and families in broader cultural contexts.

*Curriculum and Teaching Dialogue* - Barbara Slater Stern 2005-09-01

Curriculum and Teaching Dialogue is the journal of the American Association of Teaching and Curriculum (AATC). An important historical event in the development of organizations dealing with the scholarly field of teaching and curriculum was the founding of the AATC on October 1, 1993. The members of the AATC believed that the time was long overdue to recognize teaching and curriculum as a basic field of scholarly study, to constitute a national learned society for the scholarly field of teaching and curriculum (teaching is the more inclusive concept; curriculum is an integral part of teaching—the "what to teach" aspect). Since that AATC has produced scholarship in teaching and curriculum and serve the general public through its conferences, journals, and the interaction of its members. The purpose of the organization as originally defined in Article 1, Section 2 of the AATC Constitution: "To promote the scholarly study of teaching and curriculum; all analytical and interpretive approaches that are appropriate for the scholarly study of teaching and curriculum shall be encouraged." Curriculum and Teaching Dialogue seeks to fulfill that mission.

**Smarter Teacher Leadership** - Marcus Conyers 2016

This pioneering book shares a fresh vision for school leadership that connects current knowledge from mind, brain, and adult learning research to the process of teacher development and leadership. The authors provide clear steps to enable and inspire teachers to embrace leadership and collaboration opportunities for improving instruction and student outcomes, and increasing professional satisfaction. To demonstrate the broad array of leadership pathways, a flexible "spectrum of teacher leadership" suggests the myriad ways for teachers to contribute to their school and community beyond their classrooms. This spectrum is illustrated with real-life examples of teacher leadership in practice. Smarter Teacher Leadership will guide teachers to bridge what has been discovered about the brain and how metacognitive, cognitive, and affective skills support learning, teaching, and leading to stimulate collaboration with colleagues and advocacy with administrators, parents, and the wider community. "Using neuroplasticity and metacognition as key vehicles, Marcus Conyers and Donna Wilson elevate the concept of teacher leadership to a new level of understanding and significance. Their work has a research-based authority, and a deep sensitivity to teachers as professionals, that is both rare and admirable." —Frank Crowther, emeritus professor, University of Southern Queensland "Teaching and learning are

inherently social activities, but too often school culture and teachers' training and expectations leave them working in a social vacuum. Conyers and Wilson have produced a clear, practical guide to improving teaching through strategic collaboration—a useful addition to the ambitious teacher's library!" —Mary Helen Immordino-Yang, associate professor of Education, Psychology and Neuroscience, University of Southern California "Smarter Teacher Leadership is an excellent and really useful book for both aspiring and serving leaders. The power model of leadership is developed and is a welcome shift towards purposeful collaboration among teams of people. In an age of dominance of systems and structures this is a refreshing approach." —Elaine Wilson, University of Cambridge

*A Guide to Teaching Practice* - Louis Cohen 2010-06-17

A Guide to Teaching Practice has long been a major standard text for all students of initial teacher training courses. This new edition has been thoroughly revised and updated to take account of the many changes that have taken place both within.

*Advocating for English Learners* - James Crawford 2008

A collection of 18 essays addressing the policy and politics of educating English language learners. Subjects include demographic change and its educational implications, American responses to language diversity, public controversies over bilingual education, high-stakes testing and its impact on English language learners, and the precarious status of language rights in the USA.

**Teaching Young Children: Choices In Theory And Practice** - Mac Naughton, Glenda 2008-11-01

This book presents early childhood students and staff with a broad and diverse range of teaching techniques to support children's learning. It examines 26 techniques ranging from simple ones, such as describing and listening, to more complex methods, such as deconstruction and scaffolding. The strategies selected are derived from the best current research knowledge about how young children learn. A detailed evaluation of each strategy enables childcare staff, early childhood teachers and students to expand their repertoire of teaching strategies and to critically evaluate their own teaching in early childhood settings. Vignettes and examples show how early childhood staff use the techniques to support children's learning and help to bring the discussion of each technique to life. Revised and updated in light of the latest research, new features include: \* Coverage of the phonics debate \* Addition of ICT content \* Questions for further discussion \* Revision to the chapter on problem solving \* Updated referencing throughout Teaching Young Children is key reading for students and experienced early childhood staff working in diverse settings with young children.

*Developmentally Appropriate Practice in Early Childhood Programs Serving Children from Birth Through Age 8, Fourth Edition (Fully Revised and Updated)* - NaeYC 2021-08

The long-awaited new edition of NAEYC's book *Developmentally Appropriate Practice in Early Childhood Programs* is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally

appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.

*Assessment of Children and Youth* - Libby G. Cohen 1998

Grade level: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, k, p, e, i, s, t.

**Teaching Young Children** - Michael L. Henniger 2012-01

Offering a curriculum focus, this is one of the most accessible introductory early childhood texts. It's an engaging introduction to practical developmentally appropriate practice. Teaching Young Children is organized around five essential elements of early education--understanding child development, play, guidance, working with families and communities, and diversity. These elements are clearly identified and explored in the prose, through boxed features in every chapter, and in one chapter devoted to each essential element. The book also presents many concrete applications strategies so that you'll know exactly what to do, including what traits and behaviors to observe and factors to consider and reflect upon in order to insure that you have a firm grasp on each child's interest and abilities--essential to planning learning activities.

**EBOOK: Inspiring Science in the Early Years: Exploring Good Practice** - Lois Kelly 2015-02-16

This book explores the science inherent in good early years practice and provides a rich range of ideas to inspire you to 'have a go' in your setting. It provides a balance between theory which underpins good practice and plenty of ideas of how you might put the theory into practice. With a focus on how children learn about the world they live in and activities intended to develop scientific understanding the book offers an holistic approach, with key topics including: How children construct scientific meaning Tuning into children's initial scientific understanding How play supports the development of children's science ideas Providing a rich environment for learning early years science Developing children's scientific experiences This handy guide is ideal to support you if you are studying on an early years course, or if you are an established early years professional who wishes to enrich early scientific learning in your setting. Lois Kelly and Di Stead are Education Consultants specializing in primary science. This clearly written and engaging book examines Science in the Early Years through a variety of activities, including role-play, toys and technology. The vital importance of sensory experiences and language is emphasized throughout. The wide experience and knowledge of the authors guarantees a highly enjoyable read. The links to all curricula in the UK are extremely beneficial and I particularly liked the way that photographs and Key Points text boxes have been used throughout the book. The breadth and depth of writing about science makes this a highly desirable book for any practitioner working or studying in the Early Years. Kathy Brodie, Independent Early Years Consultant As an Early Years consultant who is passionate about children's thinking, exploring, questioning, investigating and most of all engaging...I really enjoyed this book. I especially liked it because it provokes practitioners to think about 'science' as the discovery and exploration of the world around us and not just as a National Curriculum subject. The mix of authors, their writing styles and the content of each chapter makes it a really easy and engaging read. Definitely one to add to your reading list if you work with children in the Early Years. Alistair Bryce-Clegg, Early Years Consultant As the title suggests, this book from the first page onwards inspires the reader to learn more about how to develop, enhance and incorporate effective practice in science in the early years. In addition to developing an understanding of how to approach the teaching of science, it gives a clearly articulated and accessible theoretical insight into how young children learn. To compliment this there are points of reflection, case studies, practical tasks and examples from the field. This is a valuable book for both students and practitioners alike as it goes beyond just giving suggestions for what to do; it explains the why and the how as well. Joanne McNulty, Manchester Metropolitan University This is a warm, accessible book, strongly grounded in research. It interweaves real life examples of science in the early

years with underlying pedagogic principles and inspires new possibilities.

The enthusiasm of the authors is contagious! Kendra McMahon, Bath Spa University

*An Introduction to spelling and reading English. ... Fifth edition. To which is added a Treatise on the Art of Writing, etc* - William MARKHAM (Schoolmaster.) 1779

**Children's Books in Children's Hands** - Charles A. Temple 2011

Pre-service and in-service teachers alike benefit from the experience of renowned authors Charles Temple, Miriam Martinez, and Junko Yokota as they share a wealth of richly illustrated, practical ideas for sharing literature with children. The authors focus on creating an understanding of how literature works and how children respond to literature, they provide a wide range of good books to use with children, and they suggest ways to guide children into books and help them enjoy the experience. Dozens of new authors and books have been added to this new edition of Children's books in Children's Hands: An Introduction to Their Literature, 4e, making it interesting and current, and the continued emphasis on cultural diversity includes a new chapter on international books.

*Language Arts* - Gail E. Tompkins 2001-07-01

Appropriate for Language Arts courses offered in education departments in universities and colleges across Canada. The Second Canadian edition of this popular core text for beginning teachers presents the content of the language arts curriculum and the most effective strategies for teaching it to kindergarten through Grade Eight students. The philosophy of the text reflects a constructivist approach to teaching and learning. The book's coverage focuses on the six language arts paired skills, and offers the strongest treatment available of the reading-writing connection.

Teaching to Change the World - Jeannie Oakes 2015-11-17

This is an up-to-the-moment, engaging, multicultural introduction to education and teaching and the challenges and opportunities they present. Together, the four authors bring a rich blend of theory and practical application to this groundbreaking text. Jeannie Oakes is a leading education researcher and former director of the UCLA teacher education program. Martin Lipton is an education writer and consultant and has taught in public schools for 31 years. Lauren Anderson and Jamy Stillman are former public school teachers, now working as teacher educators. This unique, comprehensive foundational text considers the values and politics that pervade the U.S. education system, explains the roots of conventional thinking about schooling and teaching, asks critical questions about how issues of power and privilege have shaped and continue to shape educational opportunity, and presents powerful examples of real teachers working for equity and justice. Taking the position that a hopeful, democratic future depends on ensuring that all students learn, the text pays particular attention to inequalities associated with race, social class, language, gender, and other social categories and explores teachers role in addressing them. The text provides a research-based and practical treatment of essential topics, and it situates those topics in relation to democratic values; issues of diversity; and cognitive, sociocultural, and constructivist perspectives on learning. The text shows how knowledge of education foundations and history can help teachers understand the organization of today's schools, the content of contemporary curriculum, and the methods of modern teaching. It likewise shows how teachers can use such knowledge when thinking about and responding to headline issues like charter schools, vouchers, standards, testing, and bilingual education, to name just a few. Central to this text is a belief that schools can and must be places of extraordinary educational quality and institutions in the service of social justice. Thus, the authors address head-on tensions between principles of democratic schooling and competition for always-scarce high-quality opportunities. Woven through the text are the voices of a diverse group of teachers, who share their analyses and personal anecdotes concerning what teaching to change the world means and involves. Click Here for Book Website Pedagogical Features: Digging Deeper sections referenced at the end of each chapter and featured online include supplementary readings and resources from scholars and practitioners who are addressing issues raised in

the text. Instructor s Manual offers insights about how to teach course content in ways that are consistent with cognitive and sociocultural learning theories, culturally diverse pedagogy, and authentic assessment. New to this Edition: "Transforming the Workforce for Children Birth Through Age 8 - National Research Council 2015-07-23

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

**EDUCATING EXCEPTIONAL CHILDREN** - S. K. MANGAL 2007-08-14  
Intended as a text for undergraduate and postgraduate courses (B.Ed./M.Ed.; B.A./M.A. Education) and diploma level courses in Education as well as for courses in Special Education, this comprehensive and accessible book provides a sound base for understanding Special Children through an insightful and incisive discussion on Special Education. The text dwells on exceptional children, or children with special needs, who either suffer from various deficits or disabilities, or are gifted. Such children include the mentally retarded, the visually and hearing impaired, the emotionally disturbed, those with autism, cerebral palsy, and the deprived, as well as the gifted and the creative. This well-organized and pedagogically rich text should be extremely useful to students as well as professionals—special education teachers, those engaged in guidance and counselling, educational policy makers, and field workers, who have an abiding interest in the education of exceptional children and in special education. **KEY FEATURES** ☑ Includes student-friendly features like illustrations, examples, tables, and research-based experimental findings. ☑ Provides a complete picture of exceptionality, from the early years of human history to the present day. ☑ Gives case histories to practically illustrate the subject.

The Effective Teaching of Language Arts - Donna E. Norton 1993

Field-tested and backed by sound research, this popular methods book provides readers with a broad background in language arts, including assessment and instruction in the major areas of speaking, listening, writing, and reading. Thoroughly encompassing the 'back-to-basics' movement and the trend toward literature-based instruction, it offers clearly developed methodologies and lessons, and makes extensive use of children's actual language samples to illustrate ways literature can enhance the development of language arts skills. Written by an award-winning author, the book focuses on material that embraces the needs of all learners: linguistically-different children, multicultural children, and children with learning disabilities and handicaps. Emphasizing the importance of literature-based strategies and the identification of literature that can be applied to each of the language arts, it offers 'For Your Plan Book', a special section at the end of most chapters which provides concrete ideas, field-tested lessons and unit plans teachers can take right into their classroom. Literature chapters are now moved to the forefront of the book, enabling instructors to place a greater emphasis on literature-related language arts. Strong methodologies in the composition chapters now encompass the writing process, plus results of a five-year composition study of the relationships between writing and literature. Public school educators, parents in home schooling, and library personnel.

*Thinking and Learning through Children's Literature* - Miriam G. Martinez 2017-04-18

Much of teachers' attention these days is focused on having students read closely to ferret out the author's intended meaning and the devices used to convey that meaning. But we cannot forget to guide students to have moving engagements with literature, because they need to make strong personal connections to books of merit if they are to become the next generation of readers: literate people with awareness of and concern for the diversity of human beings around them and in different times and places. Fortunately, guiding both students' personal engagement with literature and their close reading to appreciate the author's message and craft are not incompatible goals. This book enthusiastically and intelligently addresses both imperatives, first surveying what is gained when students are immersed in literature; then celebrating and explicating the main features of literature students need to understand to broaden their tastes and deepen their engagement, at the same time they meet external standards; then presenting a host of active methods for exploring all major genres of children's books; and finally presenting suggestions for interdisciplinary teaching units grounded in literature.

Created by noted leaders in the fields of children's literature and literacy, the book is enlivened by recurring features such as suggested reading lists, issues for discussion, links to technology, and annotations of exemplary books.

**Introduction to Early Childhood Education** - Eva L. Essa 2019-01-09

Introduction to Early Childhood Education provides current and future educators with a highly readable, comprehensive overview of the field. The underlying philosophy of the book is that early childhood educators' most important task is to provide a program that is sensitive to and supports the development of young children. Author Eva L. Essa and new co-author Melissa Burnham provide valuable insight by strategically dividing the book into six sections that answer the "What, Who, Why, Where, and How" of early childhood education. Utilizing both NAEYC (National Association for the Education of Young Children) and DAP (Developmentally Appropriate Practice) standards, this supportive text provides students with the skills, theories, and best practices needed to succeed and thrive as early childhood educators. **Multidisciplinary Perspectives on Play from Birth and Beyond** - Sandra Lynch 2017-01-27

While firmly acknowledging the importance of play in early childhood, this book interrogates the assumption that play is a birthright. It pushes beyond traditional understandings of play to ask questions such as: what is the relationship between play and the arts – theatre, music and philosophy – and between play and wellbeing? How is play relevant to educational practice in the rapidly changing circumstances of today's world? What do Australian Aboriginal conceptions of play have to offer understandings of play? The book examines how ideas of play evolve as children increasingly interact with popular culture and technology, and how developing notions of play have changed our work spaces, teaching practices, curricula, and learning environments, as well as our understanding of relationships between children and adults. This multidisciplinary volume on the subject of play combines the work of some of the world's leading researchers in the field of early childhood education with contributions from distinguished and emerging scholars in areas as diverse as education, theatre studies, architecture, literature, philosophy, cultural studies, theology and the creative arts. Reconsidering the common focus on play in early education, to investigate its broader impact, this collection offers a refreshing and valuable addition to studies on play, reconceptualizing it for the 21st century.
