So Good They Can't Ignore You - Cal Newport 2012-09-18
In an unorthodox approach, Georgetown University professor Cal Newport debunks the long-held belief that "follow your passion" is good advice, and sets out on a quest to discover the reality of how people end up loving their careers. Not only are pre-existing passions rare and have little to do with how most people end up loving their work, but a focus on passion over skill can be dangerous, leading to anxiety and chronic job hopping. Spending time with organic farmers, venture capitalists, screenwriters, freelance computer programmers, and others who admitted to deriving great satisfaction from their work, Newport uncovers the strategies they used and the pitfalls they avoided in developing their compelling careers. Cal reveals that matching your job to a pre-existing passion does not matter. Passion comes after you put in the hard work to become excellent at something valuable, not before. In other words, what you do for a living is much less important than how you do it. With a title taken from the comedian Steve Martin, who once said his advice for

aspiring entertainers was to "be so good they can't ignore you," Cal Newport's clearly written manifesto is mandatory reading for anyone fretting about what to do with their life, or frustrated by their current job situation and eager to find a fresh new way to take control of their livelihood. He provides an evidence-based blueprint for creating work you love, and will change the way you think about careers, happiness, and the crafting of a remarkable life.

The networked computer, from smartphone to mainframe, has become the central hub of written, spoken, and visual communication in today's scientific and technical workplace. Firmly rooted in core rhetorical principles, *Technical Communication Today* presents computers as thinking tools that powerfully influence how we develop, produce, design, and deliver technical documents and presentations. This popular text helps communicators draft and design documents, prepare material for print and web publication, and make oral presentations. Retaining these features, the 6th Edition of *Technical Communication Today* also marks an important shift to drawing readers' attention to the centralization of innovation and entrepreneurship in the technical workplace. Revised chapters, new case studies, and new exercises and projects demonstrate that those who know how to write clearly, speak persuasively, and design functional and attractive texts will be the most likely to succeed in today's innovation-based and entrepreneurial workplace. *Technical Communication Today*, 6th Edition is also available via Revel™, an interactive learning environment that enables students to read, practice, and study in one continuous experience. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There is detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. In *Citizenship and Advocacy in Technical Communication*, teachers, researchers, and practitioners will find a variety of theoretical frameworks, empirical studies, and teaching approaches to advocacy and citizenship. Specifically, the collection is organized around three main themes or sections: considerations for understanding and defining advocacy and citizenship locally and globally, engaging with the local and global community, and introducing advocacy in a classroom. The collection covers an expansive breadth of issues and topics that speak to the complexities of undertaking advocacy work in TPC, including local grant writing activities, cosmopolitanism and global transnational rhetoric, digital citizenship and social media use, strategic and tactical communication, and diversity and social justice. The contributors themselves, representing fifteen academic institutions and occupying various academic ranks, offer nuanced definitions, frameworks, examples, and strategies for students, scholars, practitioners, and educators who want to or are already engaged in a variegated range of advocacy work. More so, they reinforce the inherent humanistic values of our field and discuss effective rhetorical and current technological tools at our disposal.
