Hindu Mythology: Vedic and Puranic - W. J. Wilkins 1882
BEFORE speaking of the Vedic Deities, it is necessary that something be said concerning the Vedas themselves, the source of our information concerning them. The root of the word is vid, "to know;" hence the term Veda signifies knowledge; and as these books were not written for centuries after they were originally composed, it signifies knowledge that was heard, or orally communicated. The Vedas are not the work of a single person, but, according to popular belief, were communicated to a number of Rishis or saints, who in their turn transmitted them to their disciples. The Seer Vyasa is styled the arranger, or, as we should now say, the editor, of these works. The instruction contained in these writings is said to have been breathed forth by God Himself. Other writers teach that it issued from Him like smoke from fire. Sometimes the Vedas are said to have sprung from the elements. The accounts of their origin, though differing in form, agree in teaching that they were the direct gift of God to man; and hence they are regarded with the greatest veneration. They are the special property of the Brahmans. As early as Manu, the nominal author or compiler of a law book probably not more than two or three centuries later than the Vedas, though some suppose it to have been no earlier than A.D. 500, it was regarded as a grave offence for a single word of these divinely given books to be heard by a man of a lower caste. The Vedas are four in number; of these the Rig-Veda is the oldest, next in order was the Yajur-Veda, then the Sama-Veda, and last of all the Atharva-Veda. Each of these Vedas consists of two main parts: a Sanhita, or collection of mantras or hymns; and a Brahmana, containing ritualistic precept and illustration, which stands in somewhat the same relation to the Sanhita as the Talmud to the Law. In these are found instructions to the priests who conduct the worship of the gods addressed in the hymns. Attached to each Brahmana is an Upanishad, containing secret or mystical doctrine. These are regarded as of lesser authority than the Mantras and Brahmanas. For whilst they are spoken of as Sruti, i.e. heard, the Upanishads are Smriti, learned. Though based on the older compositions, if there is any discrepancy between them, the teaching of the later ones is rejected. The Sanhita and Brahmana are for the Brahmans generally; the Upanishads for philosophical inquirers. Yet, strange to say, whereas the older portions had, until recent years, been almost entirely neglected, with some parts of the Upanishads there was considerable acquaintance amongst the learned pundits of Benares and other places. In many parts of India not a man could be found able to read and interpret them. Of the Sanhitas, the "Rig-Veda Sanhita—containing one thousand and seventeen hymns—is by far the most important; whilst the Atharva-Veda-Sanhita, though generally held to be the most recent, is perhaps the most interesting. Moreover, these are the only two Vedic hymn-books worthy of being called separate original collections;" the others being almost entirely made up of extracts from the Rig-Veda. Between the time of the composition of the Rig-Veda and that of the Atharva, considerable changes in the religious faith

of the people had come about. The childlike trust of the earlier hymns has disappeared, and the deities now seem more cruel, and there is greater need of propitiatory offerings. Probably the old religion of the people whom they had conquered had begun to tell on that of the Aryans.

Mathematical Problem Solving - ALAN H. SCHOENFELD 2014-06-28

This book is addressed to people with research interests in the nature of mathematical thinking at any level, to people with an interest in "higher-order thinking skills" in any domain, and to all mathematics teachers. The focal point of the book is a framework for the analysis of complex problem-solving behavior. That framework is presented in Part One, which consists of Chapters 1 through 5. It describes four qualitatively different aspects of complex intellectual activity: cognitive resources, the body of facts and procedures at one's disposal; heuristics, "rules of thumb" for making progress in difficult situations; control, having to do with the efficiency with which individuals utilize the knowledge at their disposal; and belief systems, one's perspectives regarding the nature of a discipline and how one goes about working in it. Part Two of the book, consisting of Chapters 6 through 10, presents a series of empirical studies that flesh out the analytical framework. These studies document the ways that competent problem solvers make the most of the knowledge at their disposal. They include observations of

students, indicating some typical roadblocks to success. Data taken from students before and after a series of intensive problem-solving courses document the kinds of learning that can result from carefully designed instruction. Finally, observations made in typical high school classrooms serve to indicate some of the sources of students' (often counterproductive) mathematical behavior.

Familiar Messes - Gratiagusti Chananya Rompas 2017-12-18

And days flew by like heavy cigarette smoke floating above the dancing heads in the city's most notorious club, like speech bubbles written in a language you cannot understand, like a dragon's breath you keep chasing, like pills that move from your hand to your red lips." Gratiagusti Chananya Rompas' personal essays are troves of memories she can always turn back to. They started off as day-to-day accounts of events from her younger years and the now. But Anya, as she is often called, is obsessed with how things people do – often in haste – quickly fossilize into memories, and how these memories, in turn, shape their lives.

Journalism and Politics in Indonesia - David T. Hill 2010-01-21

Mochtar Lubis was one of Indonesia's best-known newspaper editors, authors and cultural figures, with a national, regional and international prominence that he retained from the early 1950s until his recent death in 2004. This book traces the major events in the life of Mochtar Lubis, which is also a prism through which much of Indonesia's post-independence history can be interpreted. This book is also the story of Indonesia in the second half of the twentieth century, when the people of the archipelago became an independent nation, and when print media and the influential figures who controlled and produced newspapers, played a pivotal role in national political, educational and cultural life, defining Indonesia. Editors with strong personalities dominated the industry and sparred with the nation's leadership; Lubis was a vocal critic of the abuse of power and a thorn in the side of the country's first two presidents, becoming synonymous with combative journalism. Under both Sukarno and Suharto, Lubis had his newspaper closed down and was imprisoned. As the only comprehensive biography of this towering figure, the book provides a unique insight into the history and development of media, literature and the political system in Indonesia.
