The Siege - Ismail Kadare 2010-02-12

From Ismail Kadare, winner of the inaugural Man Booker International Prize – a novelist in the class of Coetzee, Pamuk, Márquez, and Rushdie – the stunning new translation of one of his major works. In the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets, and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. The Siege tells the enthralling story of the weeks and months that follow – of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in the balance, from the Pasha himself to the artillerymen, astrologer, blind poet, and harem of women who accompany him. "Believe me," the general said. "I've taken part in many sieges but this," he waved towards the castle walls, "is where the most fearful carnage of our times will take place. And you surely know as well as I do that great massacres always give birth to great books. You really do have an opportunity to

write a thundering chronicle redolent with pitch and blood, and it will be utterly different from the graceful whines composed at the fireside by squealers who never went to war." Brilliantly vivid, as insightful as it is compelling, *The Siege* is an unforgettable account of the clash of two great civilisations, and a portrait of war that will resonate across the centuries.

Temperament in Context - Theodore D. Wachs 2001-03

Although the importance of context has been emphasized by temperament researchers, until now there has been remarkably little systematic research on the unique role specific aspects of context play in the development and impact of temperament. The goal of this volume is to systematize current knowledge and theory on the role played by specific aspects of context in the etiology, expression, and influence of temperament, particularly for those aspects of temperament that are most likely to relate to later personality traits. Reflecting the editors' view that the interface between temperament and context is a bidirectional phenomenon, this volume focuses on two broad issues: 1) How does context moderate the expression, continuity, or consequences of individual differences in introversion-extraversion, sociability, emotionality, and inhibition (the I-ESEI family of traits)? 2) How do individual differences in the I-ESEI family of traits moderate the nature of characteristics of the individual's context? By bringing together outstanding international researchers who present their current research and theories, the editors systematize research contributions in the domain of contextual contributions to the I-ESIA family of traits and set the agenda for future research directions. Appropriate for use by scholars and practitioners in developmental science and family studies.

Reading Khaled Hosseini - Rebecca Stuhr 2009

Making Culture, Changing Society proposes a challenging new account of the relations between culture and society focused on how particular forms of cultural knowledge and expertise work on, order and transform society. Examining these forms of culturee(tm)s action on the social as aspects of a historically distinctive ensemble of cultural institutions, it considers the diverse ways in which culture has been produced and mobilised as a resource for governing populations. These concerns are illustrated in detailed case studies of how anthropological conceptions of the relations between race and culture have shaped e" and been shaped by e" the relationships between museums, fieldwork and governmental programmes in early twentieth-century France and Australia. These are complemented by a closely argued account of the relations between aesthetics and governance that, in contrast to conventional approaches, interprets the historical emergence of the autonomy of the aesthetic as vastly expanding the range of arte(tm)s social uses. In pursuing these concerns, particular attention is given to the role that the cultural disciplines have played in making up and distributing the freedoms through which modern forms of liberal government operate. An examination of the place that has been accorded habit as a route into the regulation of conduct within liberal social, cultural and political thought brings these questions into sharp focus. The book will be of interest to students and scholars of sociology, cultural studies, media studies, anthropology, museum and heritage studies, history, art history and cultural policy studies.

Public Policy in International Economic Law - Diane A. Desierto 2015

States reject inequality when they choose to ratify the International Covenant on Economic, Social and Cultural Rights (ICESCR), but to date the ICESCR has not yet figured prominently in the policy calculus behind States' international economic decisions. This book responds to the modern challenge of operationalizing the ICESCR, particularly in the context of States' decisions within international trade, finance, and investment. Differentiating between public policy mechanisms and institutional functional mandates in the international trade, finance, and investment systems, this book shows legal and policy gateways for States to feasibly translate their fundamental duties to respect, protect, and fulfil economic, social and cultural rights into their trade, finance, and investment commitments, agreements, and contracts. It approaches the problem of harmonizing social protection objectives under the ICESCR with a State's international economic treaty obligations, from the designing and interpreting international treaty

texts, up to the institutional monitoring and empirical analysis of ICESCR compliance. In examining public policy options, the book takes into account around five decades of States' implementation of social protection commitments under the ICESCR; its normative evolution through the UN Committee on Economic, Social and Cultural Rights, and the Committee's expanded fact-finding and adjudicative competences under the Optional Protocol to the ICESCR; as well as the critical, dialectical, and deliberative roles of diverse functional interpretive communities within international trade, finance, and investment law. Ultimately, the book shows how States' ICESCR commitments operate as the normative foundation of their trade, finance, and investment decisions.

"A useful text and reference book. These essays are at their best in serving both area study and political sociology."---Slavic Review "Wolchik and Curry have assembled an all-star cast of experts for an authoritative assessment of the progress the region has made toward liberal democracy and a market economy in the last two decades. The book's particular strength is to cast the process in terms of a return to Europe. It thus pays attention not only to crucial developments in domestic politics but also to the influence of important international actors. Another exceptionally useful feature is the inclusion of essays

that address important issues cross-nationally, as well as in-depth studies of each country individually, making the book especially valuable to students and scholars interested in the politics of the region and those interested in the interaction between domestic issues and global political and economic forces."---Michael Bernhard, Pennsylvania State University "This is a straightforward and lucid overview of the paths taken away from communism by Central and East European states. The authors effectively address the domestic and international influences on the course of political development in the former communist states. The book is highly recommended to anyone who wants a clear picture of a complex and important region and its constituent parts."---Zvi Gitelman, University of Michigan Now in a fully updated edition, this essential text explores the other half of Europe, the new and future members of the EU along with the problems and potential they bring to the region and to the world stage. The book presents a set of comparative country case studies as well as thematic chapters on key issues, including European Union and NATO expansion, the economic transition and its social ramifications, the role of women, persistent problems of ethnicity and nationalism, and political reform. New to this edition is a chapter on Albania. For students and specialists alike, this book will be an invaluable resource on the newly democratizing states of Europe.
