**All Over the Map** - Ron James 2022-11-01

NATIONAL BESTSELLER Canada's most verbally virtuosic comic makes his literary debut—and he's just as richly, gloriously funny on the page as on stage. His legion of fans—the ones who ensure his every show the length and breadth of Canada is sold out—recognize Ron James as one of the great stand-ups of his generation. His seemingly improvisational flights of fancy—no two shows are ever the same—are crammed with inventive phrase-making, feature a voluminous vocabulary, and put every word into the service of uproarious comedy. He sounds like a man born to write a great book—and now at last he has. But this is a book he has been writing for most of his life, in his head, in his car, while driving from gig to gig. In *All Over the Map*, Ron has brilliantly captured the voice that has enthralled millions on stage and screen. He also lets up a little on the usually relentless laughs (though there are still plenty of those) to reveal a new dimension to his beloved showbiz character. His hilarious reminiscences of growing up in Nova Scotia and his early struggles as an aspiring comic, his reveries on such topics as family, country, celebrity and lessons learned from myriad chance encounters will deepen our appreciation for this great comic and win him many new fans in his new role as author.

*Language Play, Language Learning* - Guy Cook 2000-02-03

This book has two related purposes. The first is to demonstrate the extent and importance of language play in human life; the second is to draw out the implications for applied linguistics and language teaching. Language play should not be thought of as a trivial or peripheral activity, but as central to human thought and culture, to learning, creativity, and intellectual enquiry. It fulfils a major function of language, underpinning the human capacity to adapt: as individuals, as societies, and as a species.

*Effective Leadership in Adventure Programming* - Simon Priest 2018-10-30

Some books address outdoor leadership; others focus on adventure programming. None delve into the specifics of both topics like *Effective Leadership in Adventure Programming*, Third Edition, does. The first edition of

this book helped define the body of knowledge for an emerging profession. Two editions later, this groundbreaking text—now in full color—provides adventure leaders with the tools and evidence they need to show that their outdoor programs are effective and have a lasting impact on their participants. Internationally renowned authors Simon Priest and Michael Gass have significantly updated the content, based on the latest research, issues, and trends in the field of adventure education and leadership. They have reorganized chapters to conform to their new model of building core competencies. In addition, this third edition includes the following features: • Material on technology, social justice, cultural adaptation, sustainability, and facilitation techniques • An online instructor guide that offers activities, discussion questions, and assessments compiled from a group of acclaimed instructors • A digital field handbook that offers quick reference to key models, concepts, and checklists covered in the text • An expanded version of global perspectives, valuable for long-standing programs as well as those just beginning to enter the field *Effective Leadership in Adventure Programming* details both the art and science of adventure leadership, helping a new generation of outdoor leaders develop their skills. The text extends the focus on evidence-based models, theories, and best practices, showing that science and research are as important to the profession as the natural beauty of the environment. The book describes the core competencies of outdoor leadership, providing a framework that helps leaders connect with participants in meaningful ways, based on mutual goals. The focus on the science side is invaluable to new leaders and less-experienced leaders, and it is a great refresher for leaders with more experience. This new edition offers a more detailed look at diversity and cultural competencies, preparing leaders to effectively manage diverse populations of participants. In addition, the content is in line with the updated accreditation standards from the Association for Experiential Education. The opening chapters of *Effective Leadership in Adventure Programming* supply a solid foundation in the research, philosophy, ethics, and history of outdoor leadership. Numerous chapters explore the skills leaders need, with topics that include technical activity, safety and risk management, environment, organization, instruction, and facilitation. The authors also examine leadership styles and conditional leadership issues, communication, sound judgment, decision making, problem solving, and the trends and issues in adventure programming. *Effective Leadership in Adventure Programming* will help readers understand the four adventure program areas—recreation, education, development, and therapy—and how they influence the delivery of outdoor leadership. The book is a valuable resource for the training and education of future outdoor leaders. It will help readers know why they should work in the profession and understand how they can make a difference by being an effective outdoor leader.

**Recomposing Ecopoetics** - Lynn Keller 2018-01-16

In the first book devoted exclusively to the ecopoetics of the twenty-first century, Lynn Keller examines poetry of what she terms the "self-conscious Anthropocene," a period in which there is widespread awareness of the scale and severity of human effects on the planet. *Recomposing Ecopoetics* analyzes work written since the year 2000 by thirteen North American poets--including Evelyn Reilly, Juliana Spahr, Ed Roberson, and Jena Osman--all of whom push the bounds of literary convention as they seek forms and language adequate to complex environmental problems. Drawing as often on linguistic experimentalism as on traditional literary resources, these poets respond to environments transformed by people and take "nature" to be a far more inclusive and culturally imbricated category than conventional nature poetry does. This interdisciplinary study not only brings cutting-edge work in ecocriticism to bear on a diverse archive of contemporary environmental poetry; it also offers the environmental humanities new ways to understand the cultural and affective dimensions of the Anthropocene.

*Tragsysteme* - Heino Engel 2007

Back in print--the standard work on Heino Engel's structure systems. The hundreds of drawings and photographs reproduced in this hardback volume offer almost endless variations on the many structural systems that can keep buildings together: within a few pages of one another, tents, domes and cubes are shown supported by poles, cables, ribs, rafters and beams. Engel's presentation and explanation of this highly complex material differs fundamentally from others' work on the subject in that he focuses entirely upon the functions and design effects of these mechanisms, without regard for technical details: More than an engineering text, this is a catalogue of ideas and forms for architects and dreamers, a David Macaulay book for adults. *Structure Systems* skips over more commonly treated special designs and completed buildings for typical, representative and surprising shapes. As a reference work or daydream material, it is an indispensable repertoire of forms.

Overcoming School Refusal - Joanne Garfi 2018-01-31

School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue

it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include:

- types of school refusers
- why children refuse to go to school
- symptoms
- short term and long term consequences
- accurate assessment
- treatment options
- what parents can do

*The Justice Motive in Everyday Life* - Michael Ross 2002-02-11

This book contains essays in honour of Melvin J. Lerner, a pioneer in the psychological study of justice. The contributors to this volume are internationally renowned scholars from psychology, business, and law. They examine the role of justice motivation in a wide variety of contexts, including workplace violence, affirmative action programs, helping or harming innocent victims and how people react to their own fate. Contributors explore fundamental issues such as whether people's interest in justice is motivated by self-interest or a genuine concern for the welfare of others, when and why people feel a need to punish transgressors, how a concern for justice emerges during the development of societies and individuals, and the relation of justice motivation to moral motivation. How an understanding of justice motivation can contribute to the amelioration of major social problems is also examined.

**Experiencing a Foreign Culture** - Werner Delanoy 1993

**Alex Katz** - Alex Katz 2010

Alex Katz (born 1927) is best known as a painter--specifically, as a painter of his family and his distinguished circle of friends, including poets, writers and artists. In the early 1950s, he began experimenting with printmaking, but it was not until the mid 1960s that he intensified his interest and production in the medium. Pushing at the limits of various printing techniques, Katz tested out pictorial ideas first conceived for his paintings, retaining planes of matte color but further simplifying his forms and dramatically cropping his images. These reduced compositions were wonderfully compatible with the graphic clarity of printmaking, and by effectively translating his paintings into prints, the artist achieved what he called the "final synthesis of painting." This publication provides insight into an often-neglected yet vital aspect of Katz's work, from the early 1950s to the present day.

**Composing the Party Line** - David G. Tompkins 2013-10-15

This book examines the exercise of power in the Stalinist music world as well as the ways in which composers and ordinary people responded to it. It presents a comparative inquiry into the relationship between music and politics in the German Democratic Republic and Poland from the aftermath of World War II through Stalin's death in 1953, concluding with the slow process of de-Stalinization in the mid-to late-1950s. The author explores how the Communist parties in both countries expressed their attitudes to music of all kinds, and how composers, performers, and audiences cooperated with, resisted, and negotiated these suggestions and demands. Based on a deep analysis of the archival and contemporary published sources on state, party, and professional organizations concerned with musical life, Tompkins argues that music, as a significant part of cultural production in these countries, played a key role in instituting and maintaining the regimes of East Central Europe. As part of the Stalinist project to create and control a new socialist identity at the personal as well as collective level, the ruling parties in East Germany and Poland sought to saturate public space through the production

of music. Politically effective ideas and symbols were introduced that furthered their attempts to, in the parlance of the day, "engineer the human soul." Music also helped the Communist parties establish legitimacy. Extensive state support for musical life encouraged musical elites and audiences to accept the dominant position and political missions of these regimes. Party leaders invested considerable resources in the attempt to create an authorized musical language that would secure and maintain hegemony over the cultural and wider social worlds. The responses of composers and audiences ran the gamut from enthusiasm to suspicion, but indifference was not an option.

**El Hadji Sy** - Clémentine Deliss 2015

**PAINTING-PERFORMANCE-POLITICS** is the first critical and comprehensive publication on the Senegalese artist, curator and activist, El Sy (\*1954), who is one of the most significant figures in African contemporary art. Not only has his innovative practice as a painter, performance artist, stage designer and curator shaped the art scene in Dakar since the late 1970s, but he is also internationally recognized as a leading protagonist of conceptual and politicized art collectives in Africa including the Laboratoire Agit Art and Tenq. This publication is the first art historical analysis that contextualizes his work and connects it to notions of resistance and activism in post-Independence Africa. It includes new essays by internationally renowned art historians, writers, and curators as well as unseen archival material. It places El Sy's activities within the framework of Senegalese post-Independence aesthetics, artists collectives in Africa, and Senegalese-German post-war relations. This publication offers a rare insight into intellectual and activist art practice in Africa prior to the "Global Turn" of 1989. "

**Scalable String and Suffix Sorting** - Timo Bingmann 2018-09-23

This dissertation focuses on two fundamental sorting problems: string sorting and suffix sorting. The first part considers parallel string sorting on shared-memory multi-core machines, the second part external memory suffix sorting using the induced sorting principle, and the third part distributed external memory suffix sorting with a new distributed algorithmic big data framework named Thrill.

A first novel, concerning the experiences of an Asian professor of English and his wife who migrate to Australia. The author is herself a professor of English at Macquarie University and holds the Order of Australia.

**The Politics of Time** - Peter Osborne 1995

If Aristotle sought to understand time through change, might we not reverse the procedure and seek to understand change through time? Once we do this, argues Peter Osborne, it soon becomes clear that ideas such as avant-garde, modern, postmodern and tradition—which are usually only treated as markets for empirically discrete periods, movements or styles—are best understood as categories of historical totalization. More specifically, Osborne claims, such ideas involve distinct "temporalizations" of history, giving rise to conflicting politics of time. His book begins with a consideration of the main aspects of modernity and develops through a series of critical engagements with the major twentieth-century positions in the philosophy of history. He concludes with a fascinating history of the avant-garde intervention into the temporality of everyday life in surrealism, the situationists and the work of Henri Lefebvre.

*Socialist Escapes* - Cathleen M. Giustino 2013-03-30  
During much of the Cold War, physical escape from countries in the Eastern Bloc was a nearly impossible act. There remained, however, possibilities for other socialist escapes, particularly time spent free from party ideology and the mundane routines of everyday life. The essays in this volume examine sites of socialist escapes, such as beaches, campgrounds, nightclubs, concerts, castles, cars, and soccer matches. The chapters explore the effectiveness of state efforts to engineer society through leisure, entertainment, and related forms of cultural programming and consumption. They lead to a deeper understanding of state-society relations in the Soviet sphere, where the state did not simply "dictate from above" and inhabitants had some opportunities to shape solidarities, identities, and meaning.

**Construction 4.0** - Anil Sawhney 2020  
Modelled on the concept of Industry 4.0, the idea of Construction 4.0 is based on a confluence of trends and technologies that promise to reshape the way built environment assets are designed, constructed, and operated. With the pervasive use of Building Information Modelling (BIM), lean principles, digital technologies, and offsite construction, the industry is at the cusp of this transformation. The critical challenge is the fragmented state of teaching, research, and professional practice in the built environment sector. This handbook aims to overcome this fragmentation by describing Construction 4.0 in the context of its current state, emerging trends and technologies, and the people and process issues that surround the coming transformation. Construction 4.0 is a framework that is a confluence and convergence of the following broad themes discussed in this book: Industrial production (prefabrication, 3D printing and assembly, offsite manufacture) Cyber-physical systems (actuators, sensors, IoT, robots, cobots, drones) Digital and computing technologies (BIM, video and laser scanning, AI and cloud computing, big data and data analytics, reality capture, Blockchain, simulation, augmented reality, data standards and interoperability, and vertical and horizontal

integration) The aim of this handbook is to describe the Construction 4.0 framework and consequently highlight the resultant processes and practices that allow us to plan, design, deliver, and operate built environment assets more effectively and efficiently by focusing on the physical-to-digital transformation and then digital-to-physical transformation. This book is essential reading for all built environment and AEC stakeholders who need to get to grips with the technological transformations currently shaping their industry, research, and teaching.

*Exploiting Semantic Web Knowledge Graphs in Data Mining* - P. Ristoski 2019-06-28

Data Mining and Knowledge Discovery in Databases (KDD) is a research field concerned with deriving higher-level insights from data. The tasks performed in this field are knowledge intensive and can benefit from additional knowledge from various sources, so many approaches have been proposed that combine Semantic Web data with the data mining and knowledge discovery process. This book, *Exploiting Semantic Web Knowledge Graphs in Data Mining*, aims to show that Semantic Web knowledge graphs are useful for generating valuable data mining features that can be used in various data mining tasks. In Part I, *Mining Semantic Web Knowledge Graphs*, the author evaluates unsupervised feature generation strategies from types and relations in knowledge graphs used in different data mining tasks such as classification, regression, and outlier detection. Part II, *Semantic Web Knowledge Graphs Embeddings*, proposes an approach that circumvents the shortcomings introduced with the approaches in Part I, developing an approach that is able to embed complete Semantic Web knowledge graphs in a low dimensional feature space where each entity and relation in the knowledge graph is represented as a numerical vector. Finally, Part III, *Applications of Semantic Web Knowledge Graphs*, describes a list of applications that exploit Semantic Web knowledge graphs like classification and regression, showing that the approaches developed in Part I and Part II can be used in applications in various domains. The book will be of interest to all those working in the field of data mining and KDD.
