Has Asia Lost It?: Dynamic Past, Turbulent Future - Vasuki Shastry 2021-02-25

Asia has been the greatest show on earth since Japan's rise from the ashes of World War II, accompanied in successive decades with the emergence of the Asian tigers, and eventually the two giants China and India. The Asian miracle has few precedents in the modern era, with billions lifted from poverty in a generation. The region's openness to trade and investment aligned perfectly with the tailwinds of globalisation. However, in recent years Asia has become a victim of its own success with commentators not differentiating between a utopian high-income Asia and a dystopian middle- and low-income Asia, where a significant majority of the region's population live. Asia today can be divided into countries which have a lot, have a little, and have none. The continent's dream run is also coming to an end as Covid-19 exposes sharp weaknesses in state capacity and structural challenges like the U.S.-China trade war is putting globalisation into reverse gear, jeopardising the region's hard-earned economic success. Asia's growth-obsessed policymakers have also ignored social pressures from the impact of technology on jobs, rising inequality, fabulous wealth accumulation by a favoured billionaire class, a deepening demographic divide, climate distress, and gender disparity, which threaten to destabilise the region's famed cohesiveness. In his penetrating new book, well-known Asia expert Vasuki Shastry argues that while Asia's reckoning may have been the subject of speculation before the pandemic, Covid-19 has made that inevitable. Inspired by Dante's Inferno, Shastry takes readers on a journey through modern Asia's eight circles of hell where we encounter urban cowboys and cowgirls fleeing rural areas to live in increasingly uninhabitable cities, disadvantaged teenage girls unable to meet their aspirations due to social strictures, internal mutiny, messy geopolitics from the rise of China, and a political and business class whose interests are in conflict with a majority of the population. Shastry challenges conventional thinking about Asia's place in the world and the book is essential reading for those with an interest in the continent's future.

Business Strategy in Asia - Kulwant Singh 2004

The second edition follows the highly successful first edition in filling an important under-served niche in the strategy arena: a casebook on business strategy in Asia. As a teaching tool, the usage of case studies is widespread in business strategy courses. Many case studies are focused on companies from developed economies, especially from the U.S. and Western Europe, leaving a large void in terms of understanding the strategies of Asian companies. This book aims to fill this void in the current offerings of textbooks. Written by experts on Asian business, it is a unique and comprehensive collection of cases about the strategies of Asian firms. The cases are wide-ranging, covering a diverse range of issues, geographic contexts, industries and decision situations. The rigor and depth of

information included in each of the cases provides considerable versatility to educators in terms of usage at various levels. The cases have been carefully chosen to represent the geographic and economic diversity of the different countries, industries, and firms within Asia.

Food systems for an urbanizing world - Food and Agriculture Organization of the United Nations 2018-08-29

Food Systems for an Urbanizing World is a joint report prepared by the World Bank and FAO. It aims to stimulate discussion and suggest pathways to support local and national governments, and civil society and private sector actors in their efforts to improve the performance and capacity of food systems. The report describes the diversity and ever-changing nature of food systems, with interlinked traditional, modern and informal channels that respond to different market segments and different consumer preferences. It also underscores the importance of targeting support to the type of city and food system. The task is not an easy one. Data are weak and empirical analysis is weaker. As cities' engagement in urban food issues is relatively new, the institutions, governance mechanisms and capacities needed for effective design, implementation and delivery of this agenda must be strengthened. Finding effective ways to prioritize, mobilize and coordinate contributions from multiple sectors will be essential for achieving food system goals.

Regional Outlook - Daljit Singh 2000

What are the challenges facing the new leadership in Indonesia? How is the Anwar Ibrahim case affecting the politics of Malaysia? How sustainable are the economic recoveries in regional countries? Why is Laos so severely affected by the regional economic crisis? Why is Vietnam not embarking upon bolder economic reforms? What are the prospects for the Philippines? *Regional Outlook: Southeast Asia 2000-2001* attempts to answer these and many other questions with succinct yet substantive analyses of current political and economic trends in the region and the likely developments over the next year or two. It is written by a team of international and local experts for the busy non-specialist reader who does not have the time for lengthy academic analyses.

The Oxford Handbook of Business Groups - Asli M. Colpan 2010-08-05

This handbook provides a comprehensive analysis of business groups around the world. It focuses on the adaptive and competitive capabilities of business groups and their evolutionary dynamics, as well as considering the historical and theoretical contexts of business groups.

Capitalist Restructuring and the Pacific Rim - Ravi Palat 2004-07-31

This book situates the evolution of capitalist economies along Asia's Pacific Rim after the Second World War within broader global, political and economic changes. Specifically, it charts their growth at the interface of periodic

crises and successive waves of restructuring, and links changes in the world economy to shifts in regional dynamics in east and southeast Asia. It suggests that while the expansion of Japanese corporate networks was crucial to the emergence of the region as a low-cost exporter to the world, the reintegration of China into the world market will free the region from its dependence on the US as a market of last resort.

Business Recoded - Peter Fisk 2021-02-08

CMI MANAGEMENT BOOK OF THE YEAR 2021 - SHORTLIST 'Business Recoded is a great source of inspiration for leaders who want to explore, shape and prepare themselves for the future.' ALEXANDER OSTERWALDER, author of Business Model Generation and The Invincible Company 'It is not often that we have moments of magic in any business. What Peter has given us is more than just ideas and inspiration, but a whole way of thinking about how we could reinvent our future, and start making it happen tomorrow.' ALBERTO UNCINI-MANGANELLI, GM and SVP, Adidas 'With energy, enthusiasm and a deep reservoir of fantastic examples, Peter Fisk maps out what each of us needs to do in order to re-calibrate ourselves and our organizations to create the future. Business Recoded is persuasive and compelling.' STUART CRAINER, founder, Thinkers50 'Peter Fisk's excellent new book, Business Recoded, will help 'recode' your business by tapping into the minds of some of the world's most brilliant business leaders. It's a must-read for anyone in need of a quick fix of inspiration and tried-and-tested advice.' MARTIN LINDSTROM, author of Buyology and Small Data 'Peter Fisk is a terrific storyteller with an encyclopaedic grasp of best business practices across the globe. If you want to disrupt the future of your business, this book is your decoder ring.' WHITNEY JOHNSON, author of Disrupt Yourself 'A brilliant collection of practical guidelines intended to refresh and reinvent our mindsets, from a global thoughtful leader with vast experience in management development.' SANTIAGO INIGUEZ, President of IE University. 'Business Recoded is definitely a must-read for leaders that want to succeed with their organizations in our fast-changing world.' ANTONIO NIETO-RODRIGUEZ, author of The Project Revolution Business needs a new code for success! Change is dramatic, pervasive and relentless. The challenges are numerous. The opportunities are greater. Incredible technologies and geopolitical shifts, complex markets and stagnating growth, demanding customers and disruptive entrepreneurs, environmental crisis and social distrust, unexpected shocks and uncertain futures. The old codes that got us here don't work anymore. Moving forwards needs a new mindset. Business Recoded is for business leaders who seek to progress in today's rapidly changing world, and to create the organisations that will thrive in tomorrow's world. It explores how to lead a better future, to reimagine your business, to reinvent markets, to energise your people. It describes how to combine profit with more purpose, intelligent technologies with creative people, radical innovation with sustainable impact. It dives deep into the minds of some of today's most inspiring business leaders - people like Anne Wojcicki and Jeff Bezos, Emily Weiss and Devi Shetty, Daniel Ek and Tan Le, Mary Barra and Masayoshi Son, Satya Nadella and Zhang Ruimin. Learn from the innovative strategies of incredible companies – Alibaba and Amazon, Babylon and BlackRock, Meituan Dianping and Microsoft, Narayana Health and Netflix, Patagonia and PingAn, Spotify and Supercell, and many more. The book is built on 7 seismic shifts driving a more enlightened future of business, unlocking 49 codes that collectively define a new DNA for organisations and their leadership. It's about you – realising your future potential - by developing your own codes for more enlightened progress, personal and business success. Do you have the courage to create a better future, for you and your business?

The Critical Few - Jon Katzenbach 2019-01-16

In a global survey by the Katzenbach Center, 80 percent of respondents believed that their organization must evolve to succeed. But a full quarter of them reported that a change effort at their organization had resulted in no visible results. Why? The fate of any change effort depends on whether and how leaders engage their culture: the self-sustaining patterns of behaving, feeling, thinking, and believing that determine how things are done in an organization. Culture is implicit rather than explicit, emotional rather than rational—that's what makes it so hard to work with, but that's also what makes it so powerful. For the first time, this book lays out the Katzenbach Center's proven methodology for identifying your culture's three most critical elements: traits, characteristics that are at the heart of people's emotional connection to what they do; keystone behaviors, actions that would lead your company to succeed if they were replicated at a greater scale; and authentic informal leaders, people who have a high degree of "emotional intuition" or social connectedness. By leveraging these critical few elements, you can tap into a source of catalytic change within your organization. People will make an emotional, not just a rational, commitment to new initiatives. You will elicit enthusiasm and creativity and build the kind of powerful company that people recognize for its innate value and effectiveness.

Dual Transformation - Scott D. Anthony 2017-03-28

Game-changing disruptions will likely unfold on your watch. Be ready. In Dual Transformation, Scott Anthony, Clark Gilbert, and Mark Johnson propose a practical and sustainable approach to one of the greatest challenges facing leaders today: transforming your business in the face of imminent disruption. Dual Transformation shows you how your company can come out of a market shift stronger and more profitable, because the threat of disruption is also the greatest opportunity a leadership team will ever face. Disruptive change opens a window of opportunity to create massive new markets. It is the moment when a market also-ran can become a market leader. It is the moment when business legacies are created. That moment starts with the core dual transformation framework: Transformation A: Repositioning today's business to maximize its resilience, such as how Adobe boldly shifted from selling packaged software to providing software as a service. Transformation B: Creating a new growth engine, such as how Amazon became the world's largest provider of cloud computing services. Capabilities link: Fighting unfairly by taking advantage of difficult-to-replicate assets without succumbing to the "sucking sound of the core." Anthony, Gilbert, and Johnson also address the characteristics leaders must embrace: courage, clarity, curiosity, and conviction. Without them, dual transformation efforts can founder. Building on lessons from diverse companies, such as Adobe, Manila Water, and Netflix, and a case study from Gilbert's firsthand experience transforming his own media and publishing company, Dual Transformation will guide executives through the journey of creating the next version of themselves, allowing them to own the future rather than be disrupted by it.

Handbook of Markets and Economies: East Asia, Southeast Asia, Australia, New Zealand - Anthony Pecotich 2016-07-22

East and Southeast Asia is a vast and complex region. Its countries have a bewildering array of histories, demographics, economic structures, cultural backgrounds, and global marketing potential. This Handbook unravels the mystery. Each chapter is written by a country specialist and provides a thorough and up-to-date analysis of one

of the ESEA countries. Each author follows a consistent model and covers geography and natural resources, the political system, the economic system, the social system, and the marketing environment. Complete chapters are devoted to: Australia, Brunei, Cambodia, China and Hong Kong, East Timor, Indonesia, Japan, Korea (North and South), Laos, Malaysia, Myanmar, New Zealand, Papua New Guinea, the Philippines, Singapore, Taiwan, Thailand, and Vietnam. Not just a review of current conditions, the Handbook offers prognoses for future marketing and commercial activity in each country. This definitive resource is generously illustrated with maps, figures, and tables, and includes comprehensive references and source materials for each country. It is an essential reference for students, researchers, and practitioners in the global economy.

Singapore - International Monetary Fund 2012-08-27

Singapore's large financial sector has remained resilient. The output has shown to rebound strongly despite a drop of 9 percent in GDP during 2008-early 2009. The new challenges include consumer price inflation, income inequality, and rising housing prices. The downside risks for the Singapore economy are large, but the country has large buffers and significant policy room to dampen the immediate and longer-term effects of a sharp global slowdown. The authorities have ample policy space and instruments to address the negative impact of economic shocks.

International Financial Centres after the Global Financial Crisis and Brexit - Youssef Cassis 2018-07-05

As well as marking the tenth anniversary of the collapse of Lehman Brothers and the consequent unleashing of the global financial crisis, 2018 is also the year of negotiations on the terms of the UK's exit from the European Union. Within a decade the banking world has witnessed two epochal events with potential to redraw the map of international financial centres: but how much has this map actually changed since 2008, and how is it likely to change in the near future? *International Financial Centres after the Global Financial Crisis and Brexit* gathers together leading economic historians, geographers, and other social scientists to focus on the post-2008 developments in key international financial centres. It focuses on the shifting hierarchies of New York, London, Paris, Geneva, Zurich, Frankfurt, Singapore, Hong Kong, Beijing, Shanghai, and Tokyo to question whether Asian financial centres have taken advantage of the crisis in the West. It also examines the medium-effects of the crisis, the level of regulation, and the rise of new technology (fintech). By exploring these crucial changes, it questions whether shifts in the financial industry and the global landscape will render these centres unnecessary for the functioning of the global economy, and which cities are likely to emerge as hubs of new financial technology.
