The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

The Literature 100 - Daniel S. Burt 2008

Here is the revised and expanded edition of Daniel S. Burt's fascinating assessment of the 100 most influential novelists, playwrights, and poets of all times and cultures now with 25 additional entries and some reassessments as well as 25 new black-and-white photographs and illustrations. From Doris Lessing and Gabriel Garcia Marquez to Homer and Marcel Proust, the entries provide a compelling, accessible introduction to significant writers of world literature. All of the writers selected have helped to redefine literature, establishing a standard with which succeeding generations of writers and readers have had to contend. The ranking attempts to discern, from the broadest possible perspective, what makes a literary artist great and how that greatness can be measured and compared.

Each profile distills the essence of the writer's career and character to help prompt consideration of literary merit and relationships by the reader.

Monument - Paul Hemenway Altrocchi, MD 2014-08-21

Most people are completely unaware that the Shakespeare authorship question is the greatest cultural mystery in Western Civilization. Few realize that Will Shakspere of Stratford-on-Avon was an uneducated grain speculator and real estate investor

who could not read or write, yet he was chosen as the front man for a fraudulent conspiracy perpetrated by Queen Elizabeth's chief counselor, Robert Cecil, for reasons of monarchical succession, greed and power. The astonishing power of Conventional Wisdom has kept the ruse going, perpetrated by Professors of English who cannot break the tenacious shackles of their guild mythology and thus refuse to believe the reams of authoritative evidence discovered in the past century in favor of Edward de Vere, 17th Earl of Oxford, as Shakespeare. Volume 10 of this anthology series--Moniment-- contains eighteen brilliant, compelling articles by highly qualified authorship experts who convincingly reinforce the case for Edward de Vere and annihilate the completely impossible candidacy of the illiterate Stratford Man. Judge Philip Howerton, Jr. BA, JD: "It doesn't take an 'academically based' person to realize that the quarter page of known facts of William Shakspeare's life can be mastered by a twelve year old and that all the rest of the stuff that has been written--in the attempt to connect his 'life' and the works--by [Professors] Brown, Chambers, Chute, Rowse, Schoenbaum, et al, ad nauseam, is, and always has been, as Vladimir Nabokov once put it, in another context, 'thirty-two percent nonsense and fifty of neutral padding.' "[Scottish Author]Josephine Tey called it 'tonypandy' [a nonsensical, untrue story grown to legend and accepted by the public in the face of all evidence to the contrary]." Michael H. Hart, Ph.D. in Astrophysics, Princeton. Author of *The 100: A Ranking of the Most Influential Persons in History*: "I made a serious error in the first edition when, without carefully checking the facts, I simply 'followed the crowd' and accepted the Stratford man as the author of the [Shakespeare] plays. Since then I have carefully examined the arguments on both sides of the question and have concluded that the weight of the evidence is heavily against the Stratford man and in favor of de Vere." *The Intelligence of Dogs* - Stanley Coren 2006-01-05

A revised edition of the best-selling reference on canine psychology incorporates the latest scientific findings and interviews with top breeders and trainers to enable dog lovers to evaluate a pet's intelligence, read dog body language, and adapt a training program suited to an animal's specific needs. By the author of *How Dogs Think*. Original. 10,000 first printing.

The Fictional 100 - Lucy Pollard-Gott, PhD 2010-01-13

Some of the most influential and interesting people in the world are fictional. Sherlock Holmes, Huck Finn, Pinocchio, Anna Karenina, Genji, and Superman, to name a few, may not have walked the Earth (or flown, in Superman's case), but they certainly stride through our lives. They influence us personally: as childhood friends, catalysts to our dreams, or even fantasy lovers. Peruvian author and presidential candidate Mario Vargas Llosa, for one, confessed to a lifelong passion for Flaubert's *Madame Bovary*. Characters can change the world. Witness the impact of Solzhenitsyn's Ivan Denisovich, in exposing the conditions of the Soviet Gulag, or Harriet Beecher Stowe's *Uncle Tom*, in arousing anti-slavery feeling in America. Words such as quixotic, oedipal, and herculean show how fictional characters permeate our language. This list of the Fictional 100 ranks the most influential fictional persons in world literature and legend, from all time periods and from all over the world, ranging

from Shakespeare's Hamlet [1] to Toni Morrison's Beloved [100]. By tracing characters' varied incarnations in literature, art, music, and film, we gain a sense of their shape-shifting potential in the culture at large. Although not of flesh and blood, fictional characters have a life and history of their own. Meet these diverse and fascinating people. From the brash Hercules to the troubled Holden Caulfield, from the menacing plots of Medea to the misguided schemes of Don Quixote, *The Fictional 100* runs the gamut of heroes and villains, young and old, saints and sinners. Ponder them, fall in love with them, learn from their stories the varieties of human experience-- let them live in you.

The 100 - Michael H. Hart 1993

Explaining his ratings, the author presents 100 people who swayed the destinies of millions of people, determined the rise and fall of civilizations or transformed the course of history. An opportunity for a deadly weapon. Juliette has never fought for herself before. But when she's reunited with the one person who ever cared about her, she finds a strength she never knew she had. And don't miss *Defy Me*, the shocking fifth book in the Shatter Me series!

TV (The Book) - Alan Sepinwall 2016-09-06

Is *The Wire* better than *Breaking Bad*? Is *Cheers* better than *Seinfeld*? What's the best high school show ever made? Why did *Moonlighting* really fall apart? Was the *Arrested Development* Netflix season brilliant or terrible? For twenty years--since they shared a TV column at *Tony Soprano's* hometown newspaper--critics Alan Sepinwall and Matt Zoller Seitz have been debating these questions and many more, but it all ultimately boils down to this: What's the greatest TV show ever? That debate reaches an epic conclusion in *TV (THE BOOK)*. Sepinwall and Seitz have identified and ranked the 100 greatest scripted shows in American TV history. Using a complex, obsessively all-encompassing scoring system, they've created a Pantheon of top TV shows, each accompanied by essays delving into what made these shows great. From vintage classics like *The Twilight Zone* and *I Love Lucy* to modern masterpieces like *Mad Men* and *Friday Night Lights*, from huge hits like *All in the Family* and *ER* to short-lived favorites like *Firefly* and *Freaks and Geeks*, *TV (THE BOOK)* will bring the triumphs of the small screen together in one amazing compendium. Sepinwall and Seitz's argument has ended. Now it's time for yours to begin!

The Baseball 100 - Joe Posnanski

2021-09-28

NEW YORK TIMES BESTSELLER * Winner of the CASEY Award for Best Baseball Book of the Year "An instant sports classic." —New York Post * "Stellar." —The Wall Street Journal * "A true masterwork...880 pages of sheer baseball bliss." —BookPage (starred review) * "This is a remarkable achievement." —Publishers Weekly (starred review) A magnum opus from acclaimed baseball writer Joe Posnanski, *The Baseball 100* is an audacious, singular, and masterly book that took a lifetime to write. The entire story of baseball rings through a countdown of the 100 greatest players in history, with a foreword by George Will. Longer than *Moby-Dick* and nearly as ambitious, *The Baseball 100* is a one-of-a-kind work by award-

winning sportswriter and lifelong student of the game Joe Posnanski that tells the story of the sport through the remarkable lives of its 100 greatest players. In the book's introduction, Pulitzer Prize-winning commentator George F. Will marvels, "Posnanski must already have lived more than 200 years. How else could he have acquired such a stock of illuminating facts and entertaining stories about the rich history of this endlessly fascinating sport?" Baseball's legends come alive in these pages, which are not merely rankings but vibrant profiles of the game's all-time greats. Posnanski dives into the biographies of iconic Hall of Famers, unfairly forgotten All-Stars, talents of today, and more. He doesn't rely just on records and statistics—he lovingly retraces players' origins, illuminates their characters, and places their accomplishments in the context of baseball's past and present. Just how good a pitcher is Clayton Kershaw in the twenty-first-century game compared to Greg Maddux dueling with the juiced hitters of the nineties? How do the career and influence of Hank Aaron compare to Babe Ruth's? Which player in the top ten most deserves to be resurrected from history? No compendium of baseball's legendary geniuses could be complete without the players of the segregated Negro Leagues, men whose extraordinary careers were largely overlooked by sportswriters at the time and unjustly lost to history. Posnanski writes about the efforts of former Negro Leaguers to restore sidelined Black athletes to their due honor, and draws upon the deep troves of the Negro Leagues Baseball Museum and extensive interviews with the likes of Buck O'Neil to illuminate the accomplishments of players such as pitchers Satchel Paige and Smokey Joe Williams; outfielders Oscar Charleston, Monte Irvin, and Cool Papa Bell; first baseman Buck Leonard; shortstop Pop Lloyd; catcher Josh Gibson; and many, many more. *The Baseball 100* treats readers to the whole rich pageant of baseball history in a single volume. Chapter by chapter, Posnanski invites readers to examine common lore

with brand-new eyes and learn stories that have long gone unheard. The epic and often emotional reading experience mirrors Posnanski's personal odyssey to capture the history and glory of baseball like no one else, fueled by his boundless love for the sport. Engrossing, surprising, and heartfelt, *The Baseball 100* is a magisterial tribute to the game of baseball and the stars who have played it.

A View from the Year 3000 - Michael H. Hart 1999-01-01

The First Muslim - Lesley Hazleton 2014-02-04

The extraordinary life of the man who founded Islam, and the world he inhabited—and remade. Lesley Hazleton's new book, *Agnostic: A Spirited Manifesto*, is out now from Riverhead Books. Muhammad's was a life of almost unparalleled historical importance; yet for all the iconic power of his name, the intensely dramatic story of the prophet of Islam is not well known. In *The First Muslim*, Lesley Hazleton brings him vibrantly to life. Drawing on early eyewitness sources and on history, politics, religion, and psychology, she renders him as a man in full, in all his complexity and vitality. Hazleton's account follows the arc of Muhammad's rise from powerlessness to power, from anonymity to renown, from insignificance to lasting significance. How did a child shunted to the margins end up revolutionizing his world? How did a merchant come to challenge the established order with a new vision of social justice? How did the pariah hounded out of Mecca turn exile into a new and victorious beginning? How did the outsider become the ultimate insider? Impeccably researched and thrillingly readable, Hazleton's narrative

creates vivid insight into a man navigating between idealism and pragmatism, faith and politics, nonviolence and violence, rejection and acclaim. The First Muslim illuminates not only an immensely significant figure but his lastingly relevant legacy.

The 100 Inventions - Fakrudeen Ali Ahmed 2021-06-16

When thinking about inventions I am reminded of the quote, "We wanted flying cars, instead we got 140 characters". This book aims to list 100 greatest hits of humanity in terms of inventions to introduce and motivate future generations of inventors to the true range of human inventions. One of the books which made an impact on me as a child was *The 100* by Princeton professor Michael Hart. This book takes a similar style and I hope will motivate a few future inventors. This is a book which ranks all the innovations we people invented and played a role in shaping humanity itself. This book ranks innovation based on impact to human cultural evolution irrespective whether it was purely positive. I have tried to give the rankings rational justification as much as possible, particularly by comparing an invention with its closest competitors and why it is ranked in a particular place relative to them. Think about the collective loss to humanity if Jonas Salk went to work on financial innovations for Goldman Sachs or advertising optimization for Google in the 1950s. How many of us know Robert Cochrane's work in India on leprosy (chapter on Antibiotic) or Maurice Hilleman's work who invented 40 vaccines including MMR (chapter on Vaccine) while we know all about the umpteenth billionaire selling a battery driven car or yet another useless form of social media. If humanity doesn't get our priorities right, the innovation that powered human productivity can slow down and human talent will be wasted away in serving advertisements a few more milliseconds faster or serving celebrities' thoughts in the toilet in one sentence bites or trading stocks using sophisticated neural networks. If the book helps few of the readers focus on fundamental inventions and human productivity this book will have

done its job.

Drawdown - Paul Hawken 2017-04-18

• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts, Vox "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook." —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold

solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

100 Greatest African Americans - Molefi
Kete Asante 2010-06-28

Since 1619, when Africans first came ashore in the swampy Chesapeake region of Virginia, there have been many individuals whose achievements or strength of character in the face of monumental hardships have called attention to the genius of the African American people. This book attempts to distill from many wonderful possibilities the 100 most outstanding examples of greatness. Pioneering scholar of African American Studies Molefi Kete Asante has used four criteria in his selection: the individual's significance in the general progress of African Americans toward full equality in the American social and political system; self-sacrifice and the demonstration of risk for the collective good; unusual will and determination in the face of the greatest danger or against the most stubborn odds; and personal achievement that reveals the

best qualities of the African American people. In adopting these criteria Professor Asante has sought to steer away from the usual standards of popular culture, which often elevates the most popular, the wealthiest, or the most photogenic to the cult of celebrity. The individuals in this book - examples of lasting greatness as opposed to the ephemeral glare of celebrity fame - come from four centuries of African American history. Each entry includes brief biographical information, relevant dates, an assessment of the individual's place in African American history with particular reference to a historical timeline, and a discussion of his or her unique impact on American society. Numerous pictures and illustrations will accompany the articles. This superb reference work will complement any library and be of special interest to students and scholars of American and African American history.

SPQR: A History of Ancient Rome - Mary
Beard 2015-11-09

New York Times Bestseller A New York Times Notable Book Named one of the Best Books of the Year by the Wall Street Journal, the Economist, Foreign Affairs, and Kirkus Reviews Finalist for the National Book Critics Circle Award (Nonfiction) Shortlisted for the Cundill Prize in Historical Literature Finalist for the Los Angeles Times Book Prize (History) A San Francisco Chronicle Holiday Gift Guide Selection A New York Times Book Review Editors' Choice Selection A sweeping, "magisterial" history of the Roman Empire from one of our foremost classicists shows why Rome remains "relevant to people many centuries later"

(Atlantic). In *SPQR*, an instant classic, Mary Beard narrates the history of Rome "with passion and without technical jargon" and demonstrates how "a slightly shabby Iron Age village" rose to become the "undisputed hegemon of the Mediterranean" (Wall Street Journal). Hailed by critics as animating "the grand sweep and the intimate details that bring the distant past vividly to life" (Economist) in a way that makes "your hair stand on end" (Christian Science Monitor) and spanning nearly a thousand years of history, this "highly informative, highly readable" (Dallas Morning News) work examines not just how we think of ancient Rome but challenges the comfortable historical perspectives that have existed for centuries. With its nuanced attention to class, democratic struggles, and the lives of entire groups of people omitted from the historical narrative for centuries, *SPQR* will to shape our view of Roman history for decades to come.

Pepper: A History of the World's Most Influential Spice - Marjorie Shaffer

2013-04-02

Filled with anecdotes and fascinating information, "a spicy read indeed." (Mark Pendergrast, author of *Uncommon Grounds: The History of Coffee and How it Transformed the World*) The perfect companion to Mark Kurlansky's *Salt: A World History*, *Pepper* illuminates the rich history of pepper for a popular audience. Vivid and entertaining, it describes the part pepper played in bringing the Europeans, and later the Americans, to Asia and details the fascinating encounters they had there. As Mark Pendergrast, author of *Uncommon Grounds*, said, "After reading Marjorie Shaffer's *Pepper*, you'll reconsider the significance of that grinder or shaker on your dining room table. The pursuit of this

widened berry with the bite changed history in ways you've never dreamed, involving extraordinary voyages, international trade, exotic locales, exploitation, brutality, disease, extinctions, and rebellions, and featuring a set of remarkable characters." From the abundance of wildlife on the islands of the Indian Ocean, which the Europeans used as stepping stones to India and the East Indies, to colorful accounts of the sultan of Banda Aceh entertaining his European visitors with great banquets and elephant fights, this fascinating book reveals the often surprising story behind one of mankind's most common spices.
