*Scenes of Sympathy* - Audrey Jaffe 2018-03-15  
In *Scenes of Sympathy*, Audrey Jaffe argues that representations of sympathy in Victorian fiction both reveal and unsettle Victorian ideologies of identity. Situating these representations within the context of Victorian visual culture, and offering new readings of key works by Charles Dickens, Elizabeth Gaskell, Ellen Wood, George Eliot, Oscar Wilde, and Arthur Conan Doyle, Jaffe shows how mid-Victorian spectacles of social difference construct the middle-class self, and how late-Victorian narratives of feeling pave the way for the sympathetic affinities of contemporary identity politics. Perceptive and elegantly written, *Scenes of Sympathy* is the first detailed examination of the place of sympathy in Victorian fiction and ideology. It will redirect the current critical conversation about sympathy and refocus discussions of late-Victorian fictions of identity.

**The Electrification of Russia, 1880-1926** - Jonathan Coopersmith 2016-05-20  
The *Electrification of Russia, 1880-1926* is the first full account of the widespread adoption of electricity in Russia, from the beginning in the 1880s to its early years as a state technology under Soviet rule. Jonathan Coopersmith has mined the archives for both the tsarist and the Soviet periods to examine a crucial element in the modernization of Russia. Coopersmith shows how the Communist Party forged an alliance with engineers to harness the socially transformative power of this science-based enterprise. A centralized plan of electrification triumphed, to the benefit of the Communist Party and the detriment of local governments and the electrical

engineers. Coopersmith's narrative of how this came to be elucidates the deep-seated and chronic conflict between the utopianism of Soviet ideology and the reality of Soviet politics and economics.

*Supreme Command* - Eliot A. Cohen 2012-04-17

The relationship between military leaders and political leaders has always been a complicated one, especially in times of war. When the chips are down, who should run the show -- the politicians or the generals? In *Supreme Command*, Eliot Cohen examines four great democratic war statesmen -- Abraham Lincoln,

Georges Clemenceau, Winston Churchill, and David Ben-Gurion -- to reveal the surprising answer: the politicians. Great states-men do not turn their wars over to their generals, and then stay out of their way. Great statesmen make better generals of their generals. They question and drive their military men, and at key times they overrule their advice. The generals may think they know how to win, but the statesmen are the ones who see the big picture. Lincoln, Clemenceau, Churchill, and Ben-Gurion led four very different kinds of democracy, under the most difficult circumstances imaginable. They came from four very different backgrounds -- backwoods lawyer, dueling French doctor, rogue aristocrat, and impoverished Jewish socialist. Yet they faced similar challenges, not least the possibility that their conduct of the war could bring about their fall from power. Each exhibited mastery of detail and fascination with technology. All four were great learners, who studied war as if it were their own profession,

and in many ways mastered it as well as did their generals. All found themselves locked in conflict with military men. All four triumphed. Military men often dismiss politicians as meddlers, doves, or naifs. Yet military men make mistakes. The art of a great leader is to push his subordinates to achieve great things. The lessons of the book apply not just to President Bush and other world leaders in the war on terrorism, but to anyone who faces extreme adversity at the head of a free organization -- including leaders and managers throughout the corporate world. The lessons of Supreme Command will be immediately apparent to all managers and leaders, as well as students of history.
