**The "People Power" Education Superbook: Book 3. Reading, Writing, Speaking** - Tony Kelbrat 2014-04-06

Reading, writing and speaking used to be the purpose of all college education, to create someone who can express themselves clearly and simply. They called him a liberally-educated man, someone who could say what they thought without babbling. Despite all

the technical-babble that has swept the world, it is still about your ability to communicate simply and clearly. The late Dr. Jeanne Chall developed the theory that learning about literacy occurs in stages: 1.) Pre-reading; six months to six years: The pre-reading child has some phonological awareness or sensitivity to speech sounds, rhyming and alliteration; recognizes some letters and may link some to the sounds they make; some understanding of books and print. 2.) Initial reading or decoding; first and second grade: The child who is just beginning to read can sound out words one at a time and decode them slowly, carefully and accurately. Most of his attention is devoted to decoding with few mental resources left over for deeper comprehension.

*More Than Words* - Sarah Soyei 2022-09-21

Young people develop their value systems during their school years, offering the perfect window of opportunity for educators to challenge prejudice and promote race equality during these formative years. Yet, as teacher training is increasingly school-centred and school budgets are stretched more thinly than ever, most teachers do not feel they have the time to develop

the language or skills to do so. More Than Words is an easily implementable tool for all educators - teachers, senior leaders, governors and support staff - to help them look beyond fire-fighting racist incidents to create long-term systemic changes. Supporting teachers in a non-judgemental fashion, this book dismantles any myths they may be harbouring so they can engage with issues with an open mind, allowing them to create positive change. This comprehensive guide helps school staff to create a safe, inclusive and supportive environment for all young people.

### **Adopting a Harmonized Regional Approach to Customs Regulation for the Tripartite Free Trade**

**Agreement** - Vimbai Lisa

Michelle Jana 2017-11-01

The three regional economic communities (RECs) in Eastern and Southern Africa are the Common Market for Eastern and Southern Africa (COMESA), the East African Community (EAC) and the Southern African Development Community (SADC). Together, they have recognised the need to work towards regional cooperation aimed at the eventual creation of a single regional economic community or Tripartite Free Trade Agreement (TFTA). This will replace the existent RECs in Eastern and Southern Africa to which the member states of these two regions have multiple membership. The TFTA region comprises a total of 27 member states which have a combined population of 527 million people and a combined gross domestic

product (GDP) of USD 624 billion. These statistics translate into a potential regional economic powerhouse for Eastern and Southern Africa. One of the major goals of the TFTA is to harmonise trade arrangements among the three RECs, improve the movement of goods and persons within the single integrated region, facilitate the joint implementation of regional infrastructure projects and enhance co-operation of member states. This is a laudable initiative by the member states of the three RECs and it is recognised that regional integration is the first step towards integration into a multilateral trading system. For the TFTA member states, it is crucial that there is an awareness to move towards a review of domestic customs legislation and policy and to develop regional, supranational legislation and regulations in order to gain a stronger competitive edge in the global market. This study shies away from proposing a „quick fix? or „instant benefit? to the

harmonisation of TFTA member states customs legislative frameworks and policies and the development of a single automated, interoperable electronic customs system. Rather, it places its focus on long-term sustainable benefits which will be realised over time. The harmonisation of TFTA member state customs legislative policies and the resultant Information and Communications Technology (ICT) reforms to the customs processes of the TFTA member states, though not immediate or short-term, will strategically position the region to conduct business in an increasingly volume driven, fast paced, electronic global economy.

**Special Economic Zones in India -** Arpita Mukherjee

2016-07-14

This book examines India's ten years of experience developing Special Economic Zones (SEZs) and the performance of SEZs in the context of India's growing international engagement, its endeavours to attract domestic and foreign investment in manufacturing and services and its aim to increase and diversify exports of goods and services.

SEZs are industrial enclaves/clusters within a country that receive certain incentives and business facilitation benefits that are not generally available to the rest of the country. To facilitate private and foreign investment in SEZs, India introduced the SEZ policy in 2000, which was followed by the SEZ Act in 2005. After ten years under the Act, India now has one of the largest number of approved SEZs in the world and its SEZ policy remains heatedly debated, with a number of studies arguing both for and against it. Given this background, the book also identifies the challenges faced by SEZs in India and offers policy recommendations on how to make the SEZs an engine for India's economic growth and development that can more effectively link the country's manufacturing and services sectors to global value chains.

### **Hong Kong Professional Services and the Belt and**

**Road Initiative** - Linda Chelan Li 2023-03-03

This book scrutinizes the role of Hong Kong in the expansive, and contested, vision of China's Belt and Road Initiative (BRI). In two main parts, it first discusses the defining features of the BRI and the evolving expectations of the role of Hong Kong in the BRI from the perspectives of policy makers and the professional sectors of accountancy-finance and the law. The second part contemplates the potential opportunities for Hong Kong from the perspectives of recipient countries-Sri Lanka, Vietnam, Cambodia and Myanmar. Utilizing an action research approach and engaging the views of a broad spectrum of actors, the authors observe the critical role of agency and innovations in a context of institutional contradictions, the impact of BRI governance structure for the deficits in international participation, gaps between grand state visions and commercial interests, and the salience of effective

communication in navigating complex policy initiatives. Taking these together unpacks the complex processes shaping Hong Kong's participation and role in the BRI. This book will appeal to students and

researchers interested in the BRI and Hong Kong, in the contexts of institutional contradictions, agency innovations, and political dynamics, as well as sustainable development.
