Excerpt from English-Japanese Conversation Dictionary:
Preceded by a Few Elementary Notions of Japanese Grammar
All Japanese writing begins at the top right-hand corner and is written in columns downwards. Odd words and short sentences are sometimes written in horizontal lines: they are usually, though not always, to be read from right to left. It is important to notice the little accents (or which modify certain sounds; these modified sounds are called m'gori These accents show us that in Japanese ya, for instance, is only a modified pronunciation of ka and not a totally different sound. This may very frequently be observed when words enter into composition; thus, from akai (red) and kane (metal) we have aka-gene (copper). The following syllables are written by means of two kana symbols. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
