*The Beginner Guitarist Book 1* - Nigel Tuffs

2012-10-24

Welcome to The Beginner Guitarist! This book has been born out of 20 years of teaching experience. Although specifically designed as a teacher's aid, it can also be used for independent study. Topics like posture, tuning and phrasing are not prescribed, being left to the judgement of the teacher. With the exception of right and left-hand fingering advice, this approach is used

throughout the series. The entire series has the goal of being a measured and progressive tutor. Ideas are usually introduced one at a time to avoid overloading the student. Basic right-hand technique is the foundation of the early part of book one. The ability to strike the string effectively and produce a clear sound is paramount. Left-hand technique is then addressed with notes on the top three strings in first position. Use of the thumb is also covered briefly. Light relief comes in the form of small amounts of glissando and percussive work. Dynamics are then introduced onto a stable base

of notes, followed by accidentals (key of G). The book is rounded off with chords and arpeggios, giving the student a chance to ‘swap seats’ with the teacher and play the role of accompanist. Elsewhere the teacher may accompany the pupil with the suggested chords, either playing the root note or the full voicings as notated. A daily practice session for the completion of book one, extra repertoire and other helpful information are all available at [www.thebeginnerguitarist.com](http://www.thebeginnerguitarist.com). About the author: Nigel Tuffs is an instrumental teacher with more than 20 years of experience in all areas of guitar teaching. Originally a member

of several rock bands he completed an honours degree at the Colchester Institute, specialising in composition and performance, and has since worked extensively as a chamber musician, in guitar ensembles, as an accompanist and also as an educator.

*Hacking the CAGED System* - Graham Tippett  
2016-10-18

The Hacking the CAGED System series was inspired by my own, and other guitarist's frustrations with the infamous CAGED System for learning guitar. It all started back in Music College in the early 2000s, at the ACM in Guildford (UK) to be precise, where we were handed, by none other than Guthrie Govan, an inch-thick binder containing all manner of shapes and patterns for the CAGED system, including chords and

arpeggios. I duly slaved over the book while burning the midnight oil for an entire semester and while my technique improved no end, I just couldn't turn those patterns into music, or connect them to what I was learning in music theory class. Fast forward to 2016, and with the benefit of hindsight from more than 20 years of playing, I've been able to look at the CAGED system from a different perspective, and one that will hopefully make it a useful system for anyone wishing to learn it. The CAGED system has many flaws, but these can be hacked and rectified to turn it into a powerful system for understanding how the guitar

fretboard works, leading to a versatile, and above all, functional knowledge of chords, arpeggios, scales and modes, and key signatures. What's in Book 1? Book 1 teaches you the basic major scale forms, shows you where to find the basic diatonic chords as well as seventh chords. We then venture into intervals which are the key to making your solos sound like you know what you're doing. Next we bring out the arpeggios, and finally the modes. Everything is tied together using key signatures as a framework to build up a practical knowledge of chords, scales, arpeggios and modes on the guitar.
