**The Oldest Gospel and the Formation of the Canonical Gospels** - M Klinghardt 2020-11-10

Part I: The Gospel that was part of Marcion's collection in the first half of the 2nd century is the oldest of all Gospels. The author presents a meticulous reconstruction and argues that all canonical Gospels are dependent on this Gospel. This sheds new light on the formation and tradition history of the gospels, contributes new insights on the history of the New Testament text and textual criticism, and has significant consequences for how to assess the formation of the canonical edition of the New Testament and the history of earliest Christianity in general. Part I contains the methodological foundation, substantiating the hypothesis that canonical Luke is a revised edition of this oldest Gospel. On this ground, a model of the Gospels' tradition history is developed. A detailed epilogue comments on recent research on and reconstructions of Marcion's Gospel and analyzes the methodological differences of these approaches. Part II: Reconstructing the text of Marcion's Gospel is essential for the two basic tasks of establishing this Gospel's priority over canonical Luke and understanding the formation process from this oldest Gospel to the canonical Four-Gospel book. Part. II offers a reconstruction of the oldest Gospel. Its text is established on the basis of evidence provided by the heresiological witnesses and the textual variants. A detailed

commentary makes every single decision of the reconstruction transparent and carefully traces the steps of the tradition history for individual sayings and pericopes. The volume includes an English translation as well as an extensive list of the correspondences between the attestations for Marcion's Gospel and the variants of canonical Luke.

The Latest Answers to the Oldest Questions - Nicholas Fearn 2008-01-29

"A serious yet readable overview of philosophy in modern times" from the author of *Zeno and the Tortoise: How to Think Like a Philosopher (The Spectator)*. The work of the classic philosophers is well known. But what do contemporary thinkers say about what it is to be a human being? In his serious, challenging, and remarkably accessible new book, Nicholas Fearn turns to contemporary philosophers to ask the age-old questions: Who am I? What do I know? What should I do? In his search for higher meaning, Fearn consults with thinkers from around the world (including John Searle, Martha Nussbaum, Peter Singer, Richard Rorty, Daniel Dennett, Noam Chomsky, Derek Parfit, Nick Bostrom, among many others) to create an impressive survey of recent thought. Variously, they believe that free will, identity, and consciousness are not what they seem; that the difference between virtue and wickedness can be a matter of sheer luck; and that, one day, we will all be vegetarians. Fearn discovers that the topics haven't changed, though our world has. Or has it? Moving deftly from pop culture to the writings of Plato, *The Latest Answers to the Oldest Questions* is a brilliant and entertaining guide to the current state of philosophical thought. "[A] small marvel."—*The Economist* "The writing is informative, witty and illustrated by vivid anecdotes."—*The Times Literary Supplement* "A readable, challenging guide to the frontiers of thinking."—*The Independent* "A commendable summation of current thought and a good mental workout." —*Leeds Guide (UK)* "Illuminating, profound and witty. Read it and be challenged to think differently about who and what you are."—Raymond Tallis, author of *Aping Mankind*

**On the Internet** - Hubert L. Dreyfus 2013-09-05

Internet is een van de eerste boeken waarin het filosofische inzicht -van Plato tot Kierkegaard - betrokken wordt op het debat over de mogelijkheden en onmogelijkheden van het internet. Dreyfus laat zien dat de onstoffelijke, 'vrij zwevende' websurfer zijn oorsprong vindt in Descartes' scheiding van geest en lichaam, en hoe Kierkegaards inzichten in de opkomst van het moderne leespubliek vooruitlopen op de nieuwsgierige, maar elk risico vermijdende internet-junkie. Uitgaande van recente onderzoeken naar het isolement dat veel internetgebruikers ervaren, toont Dreyfus aan hoe het internet, door zijn nadruk op privé-ervaringen, gebruikers berooft van wezenlijke, belichaamde vermogens zoals vertrouwen, stemmingen en betrokkenheid bij met anderen gedeelde lokale aangelegenheden. Internet is verplichte kost voor iedereen die on line is en is geïnteresseerd in onze plaats in de 'e-revolutie'.

**Disclosing New Worlds** - Charles Spinosa 1999-02-18

Argues that human beings are at their best not when they are engaged in abstract reflection, but when they are intensely involved in changing the taken-for-granted, everyday practices in some domain of their culture—that is, when they are making history. Disclosing New Worlds calls for a recovery of a way of being that has always characterized human life at its best. The book argues that human beings are at their best not when they are engaged in abstract reflection, but when they are intensely involved in changing the taken-for-granted, everyday practices in some domain of their culture—that is, when they are making history. History-making, in this account, refers not to wars and transfers of political power, but to changes in the way we understand and deal with ourselves. The authors identify entrepreneurship, democratic action, and the creation of solidarity as the three major arenas in which people make history, and they focus on three prime methods of history-making—reconfiguration, cross-appropriation, and articulation.

**Background Practices** - Hubert L. Dreyfus 2017

This volume presents a selection of Hubert Dreyfus's pioneering work in bringing phenomenology and existentialism to bear on the philosophical and scientific study of the mind. Each of the thirteen essays interprets, develops, and extends the insights of his predecessors working in the European philosophical tradition. One of Dreyfus' central contributions to reading the historical canon of philosophy comes from his recognition that great philosophers help us to understand the background practices of a culture - the practices that shape and embody our most basic understanding of ourselves and the things and situations we encounter in our world. Background practices are all too often overlooked completely, or else their importance is misunderstood. Each chapter in this volume shows in one way or another how a broad range of philosophical topics can only be properly understood when we recognize how they are grounded in the background practices that shape our lives and give meaning to our activities, our tasks, our normative commitments, our aims and our goals.

**The Last Cold Place** - Naira de Gracia 2023-04-04

Lab Girl meets Why Fish Don't Exist in this brilliant, fascinating memoir about a young scientist's

experience studying penguins in Antarctica—a firsthand account of the beauty and brutality of this remote climate, the direct effects of climate change on animals, and the challenges of fieldwork. Naira de Gracia's *The Last Cold Place* offers a dramatic, captivating window into a once-in-a-lifetime experience: a season living and working in a remote outpost in Antarctica alongside seals, penguins, and a small crew of fellow field workers. In one of the most inhospitable environments in the world (for humans, anyway), Naira follows a generation of chinstrap penguins from their parents' return to shore to build nests from pebbles until the chicks themselves are old enough to head out to sea. In lively and entertaining anecdotes, Naira describes the life cycle of a funny, engaging colony of chinstrap penguins whose food source (krill, or small crustaceans) is powerfully affected by the changing ocean. Weaving together the history of Antarctic exploration with climate science, field observations, and her own personal journey of growth and reflection, *The Last Cold Place* illuminates the complex place that Antarctica holds in our cultural imagination—and offers a rare glimpse into life on this uninhabited continent.

**Being-in-the-World** - Hubert L. Dreyfus 1990-12-14

*Being-in-the-World* is a guide to one of the most influential philosophical works of this century: Division I of Part One of *Being and Time*, where Martin Heidegger works out an original and powerful account of being-in-the-world which he then uses to ground a profound critique of traditional ontology and epistemology. Hubert Dreyfus's commentary opens the way for a new appreciation of this difficult philosopher, revealing a rigorous and illuminating vocabulary that is indispensable for talking about the phenomenon of world. The publication of *Being and Time* in 1927 turned the academic world on its head. Since then it has become a touchstone for philosophers as diverse as Marcuse, Sartre, Foucault, and Derrida who seek an alternative to the rationalist Cartesian tradition of western philosophy. But Heidegger's text is notoriously dense, and his language seems to consist of unnecessarily barbaric neologisms; to the neophyte and even to those schooled in Heidegger thought, the result is often incomprehensible. Dreyfus's approach to this daunting book is straightforward and pragmatic. He explains the text by frequent examples drawn from everyday life, and he skillfully relates Heidegger's ideas to the questions about being and mind that have preoccupied a generation of cognitive scientists and philosophers of mind.

*Triangulating Methodological Approaches in Corpus Linguistic Research* - Paul Baker 2016-06-10

Contemporary corpus linguists use a wide variety of methods to study discourse patterns. This volume provides a systematic comparison of various methodological approaches in corpus linguistics through a series of parallel empirical studies that use a single corpus dataset to answer the same overarching research question. Ten contributing experts each use a different method to address the same broadly framed research question: In what ways does language use in online Q+A forum responses differ across four world English varieties (India, Philippines, United Kingdom, and United States)? Contributions will be based on analysis of the same 400,000 word corpus from online Q+A forums, and contributors employ methodologies including corpus-based discourse analysis, audience perceptions, Multi-Dimensional analysis, pragmatic analysis, and keyword analysis. In their introductory and concluding chapters, the volume editors compare and contrast the findings from each method and assess the degree to which 'triangulating' multiple approaches may provide a more nuanced understanding of a research question, with the aim of identifying a set of complementary approaches which could arguably take into account analytical blind spots. Baker and Egbert also consider the importance of issues such as researcher subjectivity, type of annotation, the limitations and affordances of different corpus tools, the relative strengths of qualitative and quantitative approaches, and the value of considering data or information beyond the corpus. Rather than attempting to find the 'best' approach, the focus of the volume is on how different corpus linguistic methodologies may complement one another, and raises suggestions for further methodological studies which use triangulation to enrich corpus-related research.

*God* - William J. O'Malley 2010-06

Is the existence of God a reasonable premise? In this book, William O'Malley, SJ, examines this critical question and many other related questions with a rare combination of rigorous gravity and irreverent humor. A Jesuit priest and prolific writer, O'Malley delves into the existence of God by looking at modern science, classical philosophy, literature and art, and the religious traditions of East and West. "God: the Oldest Question" provides thoughtful answers for anyone looking to better understand their faith and what it all means.

*Hidden Treasures in the Book of Job (Reasons to Believe)* - Hugh Ross 2011-10-01

Arguably the oldest book in the Bible, the book of Job has a surprising amount to say about some of the newest scientific discoveries and controversies. Far from a book that is just about suffering, Job is filled with rich insight into both ancient and modern questions about the formation of the world the difference between animals and humans cosmology dinosaurs and the fossil record how to care for creation and more With careful consideration and exegesis, internationally known astrophysicist and Christian apologist Hugh Ross adds yet another compelling argument to the case for the veracity of the biblical commentary on the history of the universe, Earth, life, and humanity. Hidden Treasures in the Book of Job shows that the Bible is an accurate predictor of scientific discoveries and a trustworthy source of scientific information, and that both the book of Scripture and the book of nature are consistent both internally and externally.

*The Brain, the Mind and the Self* - Arnold Goldberg 2015-05-01

Psychoanalysis enjoyed an enormous popularity at one time, but has recently fallen out of favor as new psychiatric medications have dominated the treatment of mental illness and a new interest in the brain and neuroscience begins to dominate the theory as to the cause and cure of mental illness. How do we distinguish between the brain, the mind and the self? In his new book, Arnold Goldberg approaches this question from a psychoanalytic perspective, and examines how recent research findings can shed light on it. He repositions psychoanalysis as an interpretive science that is a different activity to most other sciences that are considered empirical. Giving clear coverage of the various psychoanalytic models of the mind and the self, Goldberg examines how these theories fare against neuroscientific evidence, and what implications these have for psychoanalytic clinical practice. The Brain, the Mind and the Self: A psychoanalytic road map sets up evidence-based, robust psychoanalytic theory and practice that will give psychoanalysts, social workers and practicing psychologists a valuable insight into the future of psychoanalysis. Arnold Goldberg, M.D. was born and raised in Chicago and trained at the University of Illinois, Michael Reese Hospital and the Institute for Psychoanalysis in Chicago. He is recently retired from the Cynthia Oudejans Harris MD chair, and Professor of Psychiatry at Rush Medical Center.

**Zeno and the Tortoise** - Nicholas Fearn 2007-12-01

For those who don't know the difference between Lucretius's spear and Hume's fork, Zeno and the Tortoise explains not just who each philosopher was and what he thought, but exactly how he came to think in the way he did. Nicholas Fearn presents philosophy as a collection of tools — the tricks of a trade that, in the end, might just be all tricks, each to be fruitfully applied to a variety of everyday predicaments. In a witty and engaging style that incorporates everything from Sting to cell phones to Bill Gates, Fearn demystifies the ways of thought that have shaped and inspired humanity — among many others, the Socratic method, Descartes's use of doubt, Bentham's theory of utilitarianism, Rousseau's social contract, and, of course, the concept of common sense. Along the way, there are fascinating biographical snippets about the philosophers themselves: the story of Thales falling down a well while studying the stars, and of Socrates being told by a face-reader that his was the face of a monster who was capable of any crime. Written in twenty-five short chapters, each readable during the journey to work, Zeno and the Tortoise is the ideal course in intellectual self-defense. Acute, often irreverent, but always authoritative, this is a unique introduction to the ideas that have shaped us all. "Entertaining and witty. A smooth, sweet concoction that should tickle the taste buds of the most philosophic readers." — Julian Boggini, The Times Educational Supplement (U.K.) "A concise and entertaining attempt to place the skills of philosophy at our fingertips." — Olivier Burckhardt, The Independent on Sunday (U.K.)
