

The Law In Nazi Germany Ideology Opportunism And The Perversion Of Justice Vermont Studies On Nazi Germany And The Holocaust

Getting the books **The Law In Nazi Germany Ideology Opportunism And The Perversion Of Justice Vermont Studies On Nazi Germany And The Holocaust** now is not type of challenging means. You could not single-handedly going afterward books store or library or borrowing from your connections to contact them. This is an definitely simple means to specifically acquire guide by on-line. This online declaration The Law In Nazi Germany Ideology Opportunism And The Perversion Of Justice Vermont Studies On Nazi Germany And The Holocaust can be one of the options to accompany you later than having supplementary time.

It will not waste your time. take me, the e-book will completely declare you supplementary situation to read. Just invest little era to door this on-line declaration **The Law In Nazi Germany Ideology Opportunism And The Perversion Of Justice Vermont Studies On Nazi Germany And The Holocaust** as without difficulty as review them wherever you are now.

Ideology and Criminal Law - Stephen Skinner 2019-09-05

With populist, nationalist and repressive governments on the rise around the world, questioning the impact of politics on the nature and role of law and the state is a pressing concern. If we are to understand the effects of extreme ideologies on the state's legal dimensions and powers – especially the power to punish and to determine the boundaries of permissible conduct through criminal law – it is essential to consider the lessons of history. This timely collection explores how political ideas and beliefs influenced the nature, content and application of criminal law and justice under Fascism, National Socialism, and other authoritarian regimes in the twentieth century. Bringing together expert legal historians from four continents, the collection's 16 chapters examine aspects of criminal law and related jurisprudential and criminological questions in the context of Fascist Italy, Nazi Germany, Nazi-occupied Norway, apartheid South Africa, Francoist

Spain, and the authoritarian regimes of Brazil, Romania and Japan. Based on original archival, doctrinal and theoretical research, the collection offers new critical perspectives on issues of systemic identity, self-perception and the foundational role of criminal law; processes of state repression and the activities of criminal courts and lawyers; and ideological aspects of, and tensions in, substantive criminal law.

[The Remnants of the Rechtsstaat](#) - Jens Meierhenrich 2018-02-23

This book is an intellectual history of Ernst Fraenkel's *The Dual State* (1941, reissued 2017), one of the most erudite books on the theory of dictatorship ever written. Fraenkel's was the first comprehensive analysis of the rise and nature of Nazism, and the only such analysis written from within Hitler's Germany. His sophisticated – not to mention courageous – analysis amounted to an ethnography of Nazi law. As a result of its clandestine origins, *The Dual State* has been hailed as the ultimate piece of intellectual resistance to the Nazi regime.

In this book, Jens Meierhenrich revives Fraenkel's innovative concept of "the dual state," restoring it to its rightful place in the annals of public law scholarship. Blending insights from legal theory and legal history, he tells in an accessible manner the remarkable gestation of Fraenkel's ethnography of law from inside the belly of the behemoth. In addition to questioning the conventional wisdom about the law of the Third Reich, Meierhenrich explores the legal origins of dictatorship elsewhere, then and now. The book sets the parameters for a theory of the "authoritarian rule of law," a cutting edge topic in law and society scholarship with immediate policy implications.

Transnational Nazism - Ricky W. Law
2019-05-23

The first English-language study of German-Japanese interwar relations to employ sources in both languages.

[The Betrayal of the Humanities](#) - Bernard M. Levinson
2022-09-06

How did the academy react to the rise, dominance, and ultimate fall of Germany's Third Reich? Did German professors of the humanities have to tell themselves lies about their regime's activities or its victims to sleep at night? Did they endorse the regime? Or did they look the other way, whether out of deliberate denial or out of fear for their own personal safety? *The Betrayal of the Humanities: The University during the Third Reich* is a collection of groundbreaking essays that shed light on this previously overlooked piece of history. *The Betrayal of the Humanities* accepts the regrettable news that academics and intellectuals in Nazi Germany betrayed the humanities, and explores what went wrong, what occurred at the universities, and what happened to the major disciplines of the humanities under National Socialism. *The Betrayal of the Humanities* details not only how individual scholars, particular departments, and even entire universities collaborated with the Nazi regime but also examines the legacy of this era on higher education in Germany. In particular, it looks at the peculiar position of many German

scholars in the post-war world having to defend their own work, or the work of their mentors, while simultaneously not appearing to accept Nazism.

The Law in Nazi Germany - Alan E. Steinweis
2013-03-30

While we often tend to think of the Third Reich as a zone of lawlessness, the Nazi dictatorship and its policies of persecution rested on a legal foundation set in place and maintained by judges, lawyers, and civil servants trained in the law. This volume offers a concise and compelling account of how these intelligent and well-educated legal professionals lent their skills and knowledge to a system of oppression and domination. The chapters address why German lawyers and jurists were attracted to Nazism; how their support of the regime resulted from a combination of ideological conviction, careerist opportunism, and legalistic self-delusion; and whether they were held accountable for their Nazi-era actions after 1945. This book also examines the experiences of Jewish lawyers who fell victim to anti-Semitic measures. The volume will appeal to scholars, students, and other readers with an interest in Nazi Germany, the Holocaust, and the history of jurisprudence.

'For Their Own Good' - Julia S. Torrie
2010-03-30

The early twentieth-century advent of aerial bombing made successful evacuations essential to any war effort, but ordinary people resented them deeply. Based on extensive archival research in Germany and France, this is the first broad, comparative study of civilian evacuations in Germany and France during World War II. The evidence uncovered exposes the complexities of an assumed monolithic and all-powerful Nazi state by showing that citizens' objections to evacuations, which were rooted in family concerns, forced changes in policy. Drawing attention to the interaction between the Germans and French throughout World War II, this book shows how policies in each country were shaped by events in the other. A truly cross-national comparison in a field dominated by

accounts of one country or the other, this book provides a unique historical context for addressing current concerns about the impact of air raids and military occupations on civilians.

International Human Rights Law and Practice - Ilias Bantekas 2020-04-23

This unique textbook merges human rights law with its practice, from the courtroom to the battlefield. Human rights are analysed in their particular context and the authors assess, among other things, the impact of international finance, the role of NGOs, and the protection of rights in times of emergency, including the challenges posed by counter-terrorism. In parallel, a series of interviews with practitioners, case studies and practical applications offer multiple perspectives and challenging questions on the effective implementation of human rights. Although the book comprehensively covers the traditional areas of international human rights law, including its regional and international legal and institutional framework, it also encompasses through distinct chapters or large sections areas that have a profound impact on human rights worldwide, such as women's rights, human rights and globalisation, refugees and migration, human rights obligations of non-state actors, debt and human rights and others.

The Dual State - Ernst Fraenkel 2018-12-13

The Dual State, first published in 1941, remains one of the most erudite books on the logic of dictatorship. It was the first comprehensive analysis of the rise and nature of National Socialism and the only such analysis written from within Hitler's Germany. Ernst Fraenkel's courageous ethnography of law was widely acclaimed upon publication, and it has influenced considerably postwar debates about the nature of the Third Reich. But *The Dual State* also has relevance for the study of dictatorship in the twenty-first century. Fraenkel's innovative concept of the dual state, with its two halves—the normative state (which generally respects its own laws and regulations) and the prerogative state (which violates them wantonly) illuminates

powerfully the complicated relationship between law and order in many countries around the world. It speaks directly to the idea of an authoritarian rule of law. This republication of Fraenkel's classic makes it once again available to scholars and students in law, the social sciences, and the humanities. It includes Fraenkel's 1974 preface to and two appendices from the first German edition never before published in English. An extensive introduction by Jens Meierhenrich places Fraenkel's ethnography of law in historical and theoretical context. *Social Outsiders in Nazi Germany* - Robert Gellately 2018-06-05

When Hitler assumed power in 1933, he and other Nazis had firm ideas on what they called a racially pure "community of the people." They quickly took steps against those whom they wanted to isolate, deport, or destroy. In these essays informed by the latest research, leading scholars offer rich histories of the people branded as "social outsiders" in Nazi Germany: Communists, Jews, "Gypsies," foreign workers, prostitutes, criminals, homosexuals, and the homeless, unemployed, and chronically ill. Although many works have concentrated exclusively on the relationship between Jews and the Third Reich, this collection also includes often-overlooked victims of Nazism while reintegrating the Holocaust into its wider social context. The Nazis knew what attitudes and values they shared with many other Germans, and most of their targets were individuals and groups long regarded as outsiders, nuisances, or "problem cases." The identification, the treatment, and even the pace of their persecution of political opponents and social outsiders illustrated that the Nazis attuned their law-and-order policies to German society, history, and traditions. Hitler's personal convictions, Nazi ideology, and what he deemed to be the wishes and hopes of many people, came together in deciding where it would be politically most advantageous to begin. The first essay explores the political strategies used by the Third Reich to gain support for its ideologies and programs, and each following essay concentrates on one group

of outsiders. Together the contributions debate the motivations behind the purges. For example, was the persecution of Jews the direct result of intense, widespread anti-Semitism, or was it part of a more encompassing and arbitrary persecution of "unwanted populations" that intensified with the war? The collection overall offers a nuanced portrayal of German citizens, showing that many supported the Third Reich while some tried to resist, and that the war radicalized social thinking on nearly everyone's part. In addition to the editors, the contributors are Frank Bajohr, Omer Bartov, Doris L. Bergen, Richard J. Evans, Henry Friedlander, Geoffrey J. Giles, Marion A. Kaplan, Sybil H. Milton, Alan E. Steinweis, Annette F. Timm, and Nikolaus Wachsmann.

Hitler's Justice - Ingo Müller 1991

Why did the judges, lawyers, and law professors of a civilized state succumb to a lawless regime? What happened to liberalism and the rule of law under the Third Reich? How many of the legal institutions and how much of their personnel carried over to the West German state after World War II?

Hannah Arendt - Peter Burdon 2017-09-18

Hannah Arendt is one of the great outsiders of twentieth-century political philosophy. After reporting on the trial of Nazi war criminal Adolf Eichmann, Arendt embarked on a series of reflections about how to make judgments and exercise responsibility without recourse to existing law, especially when existing law is judged as immoral. This book uses Hannah Arendt's text *Eichmann in Jerusalem* to examine major themes in legal theory, including the nature of law, legal authority, the duty of citizens, the nexus between morality and law and political action.

German Reich 1933-1937 - Wolf Gruner 2019-04-15

This source edition on the persecution and murder of the European Jews by Nazi Germany presents in a total of 16 volumes a thematically comprehensive selection of documents on the Holocaust. The work illustrates the contemporary contexts, the dynamics, and the intermediate stages of

the political and social processes that led to this unprecedented mass crime. It can be used by teachers, researchers, students, and all other interested parties. The edition comprises authentic testimony by persecutors, victims, and onlookers. These testimonies are furnished with academic annotations and the vast majority of them are published here for the first time in English. Volume 1 documents the persecution of the Jews between 1933 and 1937. The chronologically-arranged written sources reveal how the disenfranchisement and social isolation of the Jews in Germany was driven forward, and which role terror, calculations on the part of the state, and the indifference of very many Germans played. For more information on the edition, please visit the project website.

[Hitler and Nazi Germany](#) - Jackson J. Spielvogel 2020-05-05

Hitler and Nazi Germany: A History is a brief but comprehensive survey of the Third Reich based on current research findings that provides a balanced approach to the study of Hitler's role in the history of the Third Reich. The book considers the economic, social, and political forces that made possible the rise and development of Nazism; the institutional, cultural, and social life of the Third Reich; World War II; and the Holocaust. World War II and the Holocaust are presented as logical outcomes of the ideology of Hitler and the Nazi movement. This new edition contains more information on the Kaiserreich (Imperial Germany), as well as Nazi complicity in the Reichstag Fire and increased discussion of consent and dissent during the Nazi attempt to create the ideal Volksgemeinschaft (people's community). It takes a greater focus on the experiences of ordinary bystanders, perpetrators, and victims throughout the text, includes more discussion of race and space, and the final chapter has been completely revised. Fully updated, the book ensures that students gain a complete and thorough picture of the period and issues. Supported by maps, images, and thoroughly updated bibliographies that offer further reading suggestions for students to take

their study further, the book offers the perfect overview of Hitler and the Third Reich.

The Germans and the Holocaust -

Susanna Schrafstetter 2015-11-01

For decades, historians have debated how and to what extent the Holocaust penetrated the German national consciousness between 1933 and 1945. How much did "ordinary" Germans know about the subjugation and mass murder of the Jews, when did they know it, and how did they respond collectively and as individuals? This compact volume brings together six historical investigations into the subject from leading scholars employing newly accessible and previously underexploited evidence. Ranging from the roots of popular anti-Semitism to the complex motivations of Germans who hid Jews, these studies illuminate some of the most difficult questions in Holocaust historiography, supplemented with an array of fascinating primary source materials.

Nazi Law - John J. Michalczyk 2017-12-28

A distinguished group of scholars from Germany, Israel and right across the United States are brought together in *Nazi Law* to investigate the ways in which Hitler and the Nazis used the law as a weapon, mainly against the Jews, to establish and progress their master plan for German society. The book looks at how, after assuming power in 1933, the Nazi Party manipulated the legal system and the constitution in its crusade against Communists, Jews, homosexuals, as well as Jehovah's Witnesses and other religious and racial minorities, resulting in World War II and the Holocaust. It then goes on to analyse how the law was subsequently used by the opponents of Nazism in the wake of World War Two to punish them in the war crime trials at Nuremberg. This is a valuable edited collection of interest to all scholars and students interested in Nazi Germany and the Holocaust.

A History of Western Public Law - Bruno Aguilera-Barchet 2014-12-31

The book outlines the historical development of Public Law and the state from ancient times to the modern day,

offering an account of relevant events in parallel with a general historical background, establishing and explaining the relationships between political, religious, and economic events.

Handbook on the Rule of Law -

Christopher May 2018-08-31

The discussion of the norm of the rule of law has broken out of the confines of jurisprudence and is of growing interest to many non-legal researchers. A range of issues are explored in this volume that will help non-specialists with an interest in the rule of law develop a nuanced understanding of its character and political implications. It is explicitly aimed at those who know the rule of law is important and while having little legal background, would like to know more about the norm.

Laying Down the Law - R. W. Kostal 2019-10-15

After WWII, U.S. leaders sought to create liberal rule-of-law regimes in Germany and Japan, but the effort was often unsuccessful. Kostal argues that the manifest failings of America's own rule-of-law democracy were partially to blame, weakening U.S. credibility and resolve and revealing the country's ambiguous status as a global moral authority.

Empire of Law - Kaius Tuori 2020-04-02

The history of exiles from Nazi Germany and the creation of the notion of a shared European legal tradition.

Crime and Criminal Justice in Modern Germany - Richard F. Wetzell 2014-05-01

The history of criminal justice in modern Germany has become a vibrant field of research, as demonstrated in this volume. Following an introductory survey, the twelve chapters examine major topics in the history of crime and criminal justice from Imperial Germany, through the Weimar and Nazi eras, to the early postwar years. These topics include case studies of criminal trials, the development of juvenile justice, and the efforts to reform the penal code, criminal procedure, and the prison system. The collection also reveals that the history of criminal justice has much to contribute to other areas of historical inquiry: it explores

the changing relationship of criminal justice to psychiatry and social welfare, analyzes representations of crime and criminal justice in the media and literature, and uses the lens of criminal justice to illuminate German social history, gender history, and the history of sexuality.

Business and Industry in Nazi Germany -

Francis R. Nicosia 2004

During the past decade, the role of Germany's economic elites under Hitler has once again moved into the limelight of historical research and public debate. This volume offers a brief but focused introduction to the role of German businesses and industries in the crimes of Hitler's Third Reich.

Hitler's American Model - James Q.

Whitman 2017-02-14

How American race law provided a blueprint for Nazi Germany Nazism triumphed in Germany during the high era of Jim Crow laws in the United States. Did the American regime of racial oppression in any way inspire the Nazis? The unsettling answer is yes. In *Hitler's American Model*, James Whitman presents a detailed investigation of the American impact on the notorious Nuremberg Laws, the centerpiece anti-Jewish legislation of the Nazi regime. Contrary to those who have insisted that there was no meaningful connection between American and German racial repression, Whitman demonstrates that the Nazis took a real, sustained, significant, and revealing interest in American race policies. As Whitman shows, the Nuremberg Laws were crafted in an atmosphere of considerable attention to the precedents American race laws had to offer. German praise for American practices, already found in Hitler's *Mein Kampf*, was continuous throughout the early 1930s, and the most radical Nazi lawyers were eager advocates of the use of American models. But while Jim Crow segregation was one aspect of American law that appealed to Nazi radicals, it was not the most consequential one. Rather, both American citizenship and antimiscegenation laws proved directly relevant to the two principal Nuremberg

Laws—the Citizenship Law and the Blood Law. Whitman looks at the ultimate, ugly irony that when Nazis rejected American practices, it was sometimes not because they found them too enlightened, but too harsh. Indelibly linking American race laws to the shaping of Nazi policies in Germany, *Hitler's American Model* upends understandings of America's influence on racist practices in the wider world.

Hitler's Willing Executioners - Daniel Jonah Goldhagen 2007-12-18

This groundbreaking international bestseller lays to rest many myths about the Holocaust: that Germans were ignorant of the mass destruction of Jews, that the killers were all SS men, and that those who slaughtered Jews did so reluctantly. *Hitler's Willing Executioners* provides conclusive evidence that the extermination of European Jewry engaged the energies and enthusiasm of tens of thousands of ordinary Germans. Goldhagen reconstructs the climate of "eliminationist anti-Semitism" that made Hitler's pursuit of his genocidal goals possible and the radical persecution of the Jews during the 1930s popular. Drawing on a wealth of unused archival materials, principally the testimony of the killers themselves, Goldhagen takes us into the killing fields where Germans voluntarily hunted Jews like animals, tortured them wantonly, and then posed cheerfully for snapshots with their victims. From mobile killing units, to the camps, to the death marches, Goldhagen shows how ordinary Germans, nurtured in a society where Jews were seen as unalterable evil and dangerous, willingly followed their beliefs to their logical conclusion. "*Hitler's Willing Executioner's* is an original, indeed brilliant contribution to the...literature on the Holocaust."--New York Review of Books "The most important book ever published about the Holocaust...Eloquently written, meticulously documented, impassioned...A model of moral and scholarly integrity."--Philadelphia Inquirer
Hitler's War in the East, 1941-1945 - Rolf-Dieter Müller 2002
Provides a guide to the extensive literature

on the war in the East, including largely unknown Soviet writing on the subject. Sections on policy and strategy, the military campaign, the ideologically motivated war of annihilation in the East, the occupation, and coming to terms with the results of the war offer a wealth of bibliographic citations, and include introductions detailing history of the period and related issues. For military historians, and for scholars who approach this period in history from a socio-economic or cultural perspective. No index. Annotation copyrighted by Book News, Inc., Portland, OR

National Socialist Extermination Policies - Ulrich Herbert 2000

This volume comprises 11 essays--most of them revised versions of lectures given 1996-1997 at the Albert-Ludwigs University in Freiburg--by German historians of the younger generation (all born since 1951). The purpose of the lecture series was to "leave behind the stale and rigid terms of Holocaust scholarship and public discussion of the issue" (from the editor's foreword). The essays, focusing on Poland, the Soviet Union, Serbia, and France, aim to identify the impulses that drove German activities in each area and to identify how various political goals and ideological convictions combined to produce policy. Annotation copyrighted by Book News, Inc., Portland, OR

Nazism, the Holocaust, and the Middle East - Francis R. Nicosia 2018-01-31

Given their geographical separation from Europe, ethno-religious and cultural diversity, and subordinate status within the Nazi racial hierarchy, Middle Eastern societies were both hospitable as well as hostile to National Socialist ideology during the 1930s and 1940s. By focusing on Arab and Turkish reactions to German anti-Semitism and the persecution and mass-murder of European Jews during this period, this expansive collection surveys the institutional and popular reception of Nazism in the Middle East and North Africa. It provides nuanced and scholarly yet accessible case studies of the ways in which nationalism, Islam, anti-Semitism, and

colonialism intertwined, all while sensitive to the region's political, cultural, and religious complexities.

War of Extermination - Hannes Heer 2004-11

This volume contains the most important contributions by distinguished historians who have thoroughly demolished this Wehrmacht myth. The picture that emerges from this collection is a depressing one and raises many questions about why "ordinary men" got involved as perpetrators and bystanders in an unprecedented program of extermination of "racially inferior" men, women, and children in Eastern Europe and the Soviet Union during the Second World War."--Pub. desc.

Legal Entanglements - Sebastian Gehrig 2021-05-01

Of all the dramatic ruptures occasioned by the division of East and West Germany, one of the most consequential was in the realm of law, as two nations scrambled to put the Nazi past behind them and forge new legal regimes. *Legal Entanglements* gives a comprehensive account of this often-overlooked chapter in postwar history, showing how the GDR and FRG established mutually incompatible legal frameworks that premised each state as the sole legitimate successor to the German Reich. Drawing on wide-ranging archival research and recently declassified documents, it follows the politicians, intellectuals, and other historical actors who helped their nations to navigate volatile legal circumstances.

Refugees From Nazi Germany and the Liberal European States - Frank Caestecker 2010-01-01

The exodus of refugees from Nazi Germany in the 1930s has received far more attention from historians, social scientists, and demographers than many other migrations and persecutions in Europe. However, as a result of the overwhelming attention that has been given to the Holocaust within the historiography of Europe and the Second World War, the issues surrounding the flight of people from Nazi Germany prior to 1939 have been seen as *Vorgeschichte* (pre-history), implicating the Western European

democracies and the United States as bystanders only in the impending tragedy. Based on a comparative analysis of national case studies, this volume deals with the challenges that the pre-1939 movement of refugees from Germany and Austria posed to the immigration controls in the countries of interwar Europe. Although Europe takes center-stage, this volume also looks beyond, to the Middle East, Asia and America. This global perspective outlines the constraints under which European policy makers (and the refugees) had to make decisions. By also considering the social implications of policies that became increasingly protectionist and nationalistic, and bringing into focus the similarities and differences between European liberal states in admitting the refugees, it offers an important contribution to the wider field of research on political and administrative practices.

Ilse Koch on Trial - Tomaz Jardim 2023-04-04

After WWII, Ilse Koch became known worldwide as the “Bitch of Buchenwald.” She was assuredly guilty of atrocities, but the most sensational crimes ascribed to her by prosecutors and newspapers went unproven. Tomaz Jardim reveals how Koch’s perceived betrayal of womanhood sealed her fate as a scapegoat for a society seeking absolution.

Nazi Law - John J. Michalczyk 2017-12-28

A distinguished group of scholars from Germany, Israel and right across the United States are brought together in *Nazi Law* to investigate the ways in which Hitler and the Nazis used the law as a weapon, mainly against the Jews, to establish and progress their master plan for German society. The book looks at how, after assuming power in 1933, the Nazi Party manipulated the legal system and the constitution in its crusade against Communists, Jews, homosexuals, as well as Jehovah's Witnesses and other religious and racial minorities, resulting in World War II and the Holocaust. It then goes on to analyse how the law was subsequently used by the opponents of Nazism in the wake of World War Two to punish them in the war crime trials at Nuremberg. This is a

valuable edited collection of interest to all scholars and students interested in Nazi Germany and the Holocaust.

Legal Sabotage - Douglas G. Morris
2020-08-27

A stirring account of the years that the leftist Jewish lawyer Ernst Fraenkel spent in Nazi Germany resisting the regime.

Under the Swastika in Nazi Germany -
Kristin Semmens 2023-02-09

Under the Swastika in Nazi Germany begins in flames in 1933 with Adolf Hitler taking power and ends in the ashes of total defeat in 1945. Kristin Semmens tells that story from five different perspectives over five chronologically distinct phases in the Third Reich's lifespan. The book offers a much-needed integrated history of insiders and outsiders – Nazis, accomplices, supporters, racial and social outsiders and resisters – that captures the complexity of Germans' lives under Hitler. Incorporating recent research and the voices of those who often remain silent in histories of this period, *Under the Swastika in Nazi Germany* delivers an up to date, engaging and accessible introduction. Its narrative is further supported by well-chosen images, some familiar and others rarely seen. By revealing the potent combination of coercion and consent at work during the dictatorship, the book allows a deeper understanding of Nazi Germany and provides a vital platform for further inquiry into these twelve years of German history.

Justifying Injustice - Herlinde Pauer-Studer
2020-09-24

Examines Nazi legal theory, the normative ideas driving the Führer state and the legal subtext to the regime's escalating atrocities.

Modernisation, National Identity and Legal Instrumentalism (Vol. II: Public Law) -
2019-12-16

This book, one of two volumes, is an anthology that analyses, through selected examples, the role played in the development of public law by the pursuit of goals serving modernisation or national ideologies in various countries, cultural spheres, and periods.

Heidegger's Entscheidung - Norman K.

Swazo 2020-05-15

This book critically examines the debate on Martin Heidegger's concept of Entscheidung ("decision") and his engagement and confrontation with Nazism in terms of his broader philosophical thought. It argues that one cannot explain Heidegger's actions without accounting for his idea of "decision" and its connection to his understanding of individual "fate" and national (and European) "destiny." The book looks at the relation of biography to philosophy and the ethical and political implications of appropriating Heidegger's thinking in these domains of inquiry. It highlights themes such as Heidegger's differences with the neo-Kantians in Germany; Heidegger on Kant and practical reason; and his reading of Nietzsche and Hegel. It offers a philosophical assessment grounded in Heidegger's own texts, with reference to historical and other philosophical commentaries on the rise of National Socialism in post-Weimar Germany and the philosophical issues associated with the interpretation of Nazi genocide and ideology. An important intervention in Western philosophy, this book will be of great interest to scholars and researchers of political philosophy, continental philosophy, German philosophy, philosophy in general, and political studies.

The Triumph of Propaganda - Hilmar Hoffmann 1996

Seeing German film during the Third Reich as a powerful and sinister tool for both indoctrination and escapist pacification, analyses the pictorial and spoken language to identify the psychological techniques used in the various genres, including news reels, documentaries, features, and cultural films. Two chapters focus on the role of flags, and another explains the rise of Hitler. Not illustrated. No subject index. First published as *Und die Fahne fuhr uns in die*

Ewigkeit in 1988 by Fischer Taschenbuch Verlag in Frankfurt am Main. Annotation copyright by Book News, Inc., Portland, OR
Nazi Characters in German Propaganda and Literature - Dagmar C. G. Lorenz
2018-06-19

Antifascist literature repurposed Nazi stereotypes to express opposition. These stereotypes became adaptable ideological signifiers during the political struggles in interwar Germany and Austria, and they remain integral elements in today's cultural imagination.

Nazism in Central Germany - Claus-Christian W. Szejnmann 1999

This study fills a large gap as most texts on Nazism in German society around 1933 concentrate on the country's western parts. This book deals with the problems caused by the constitutional monarchy, democracy, and dictatorship.

Territorial Revisionism and the Allies of Germany in the Second World War - Marina Cattaruzza 2012-12-30

A few years after the Nazis came to power in Germany, an alliance of states and nationalistic movements formed, revolving around the German axis. That alliance, the states involved, and the interplay between their territorial aims and those of Germany during the interwar period and World War II are at the core of this volume. This "territorial revisionism" came to include all manner of political and military measures that attempted to change existing borders. Taking into account not just interethnic relations but also the motivations of states and nationalizing ethnocratic ruling elites, this volume reconceptualizes the history of East Central Europe during World War II. In so doing, it presents a clearer understanding of some of the central topics in the history of the war itself and offers an alternative to standard German accounts of the period and East European national histories.
