Mindfulness-Based Compassionate Living -

Erik van den Brink 2015-05-08

Mindfulness involves learning to be more aware of life as it unfolds moment by moment, even if these moments bring us difficulty, pain or suffering. This is a challenge we will all face at some time in our lives, and which health professionals face every day in their work. The Mindfulness-Based Compassionate Living programme presents a new way of learning how to face the pressures of modern living by providing an antidote which teaches us how to cultivate kindness and compassion – starting with being kind to ourselves.

Compassion involves both sensitivity to our own and others' suffering and the courage to deal with it. Integrating the work of experts in the field such as Paul Gilbert, Kristin Neff, Christopher Germer and Tara Brach, Erik van den Brink and Frits Koster

have established an eight stage step-by-step compassion training programme, supported by practical exercises and free audio downloads, which builds on basic mindfulness skills. Grounded in ancient wisdom and modern science, they demonstrate how being compassionate shapes our minds and brains, and benefits our health and relationships. The programme will be helpful to many, including people with various types of chronic or recurring mental health problems, and can be an effective means of coping better with low self-esteem, self-reproach or shame, enabling participants to experience more warmth, safeness, acceptance and connection with themselves and others. Mindfulness-Based Compassionate Living will be an invaluable manual for mindfulness teachers, therapists and counsellors wishing to bring the 'care' back into healthcare, both for their clients and themselves. It can also

be used as a self-help guide for personal practice.

The Mindful Way to Study - Jake Gibbs
2013-05-25

The ability to pay attention is a key component of effective learning. Just think of all the times in your life when parents, teachers, bosses, and coaches have told you to pay attention to what you are doing. You would think that with all of the attention

paid to paying attention, we would be pretty good at it. The problem is we're not, because most of us have never been taught how. Commonly adopted methods like forced concentration are actually counterproductive to learning and achieving our goals. In addition, too much focus on future goals and rewards takes our attention away from what we need to be doing in order to achieve them. Luckily, there is another way, a better way: the mindful way. *The Mindful Way To Study: Dancing With Your Books* is a guide to help students, professionals, and other lifelong learners develop a better approach to their educational and career pursuits. By using mindfulness, or the practice of bringing full awareness to the present moment, the authors blend the latest research with entertaining stories and specific techniques

to teach readers how to truly pay attention, and even learn to enjoy it.
