6th International Munich Chassis Symposium 2015 - Peter Pfeffer 2015-06-18
Connectivity has arrived in the vehicle - whether it is in-car internet or car-to-car communication. For the chassis too, the

connected car is increasingly becoming a driver of innovation. Predictive and intelligent chassis systems and automated driving are just some of the topics being addressed. In addition to enhancing driving

comfort and safety, interconnecting the powertrain with the chassis can also provide new functions, not only in cars but also in commercial vehicles. What is more, modularization, electrification of the powertrain, intelligent development methods and efforts to reduce fuel consumption are also driving innovations in chassis systems.

BALCHIK SECRET - Silvi Stamen
2021-08-12

What do you regard as a Secret? Silviya has it all. Beauty, frivolous, loyal best friend, reliable English boyfriend, and studies in a university. However, one distant trip to the

Bulgarian Black Sea coast threatens to tear her world apart and reveal a deeply hidden secret. From this point on, Sylvia's only target is to visit beautiful places and meet with Mr Big, leading her into a web of secrets, passions and intriguing adventures. After her encounter with Mr Big, a rich and old construction site boss, who quickly falls in love with her, Sylvia starts to discover the hidden pleasures of life and a story of the distant past. Balchik Secret is astounding, a story that evokes such powerful emotions, and the author has taken us back and forth in the timeline like somewhere in 1922 and sometimes in the present era. This passionate debut novel by the author Silvi Stamen tells us a story of three strong female characters' attempts to protect the love of their lives; a realistic novel about ordinary people that will stay with the reader for a long time. If you love romance fiction, you will definitely love this one!

Silver - Beax Rivers 2011-12-21
Despite her light-tan skin, Zarah is, in her own words, the blackest black chick anyone could ever meet. Raised by parents who came of age in the 1960s, she is proud of her identity: Mississippi born and raised, pro-black and anti-white. As a student in the College of Communications at Jackson City University, she is clear about her commitment to black people and to staying close to home once she has earned her PhD. Smart, ambitious, and beautiful, Zarah aspires to be a journalist and, eventually, an executive editor. She has one big problem: landing her dream internship in publishing

means working for someone whitesomeone shes not sure she can stand to be around. When Zarah finally meets legendary publishing mogul Harvey Wilson, she fully expects him to be the jerk she has always envisioned. Instead she falls in love with him and is forced to question everything she thought she knew about herself. From Mississippi to New York to Hawaii and back, Zarah and Harvey are swept up in a passionate romance. But the couple faces differences in race, class, and agenot to mention the fact that Harvey is still married. With so many obstacles to happiness, its difficult to see how their love can survive. Challenging long-held ideas about what makes love last, Silver: Currents of Change is a romantic story about an unlikely couples unpredictable journey to true love and happiness.

Advances in Human Aspects of Transportation - Neville Stanton

2018-06-27

This book discusses the latest advances in research and development, design, operation and analysis of transportation systems and their complementary infrastructures. It reports on both theories and case studies on road and rail, aviation and maritime transportation. Further, it covers a wealth of topics, from accident analysis, vehicle intelligent control, and human-error and safety issues to next-generation transportation systems, model-based design methods, simulation and training techniques, and many more. A special emphasis is placed on smart technologies and automation in transport, and on the user-centered, ergonomic and sustainable design of transport systems. The book, which is based on the AHFE 2018 International Conference on Human Factors in Transportation, held in Orlando, Florida, USA on July 21–25, 2018, mainly addresses

the needs of transportation system designers, industrial designers, human-computer interaction researchers, civil and control engineers, as well as vehicle system engineers. Moreover, it represents a timely source of information for transportation policy-makers and social scientists whose work involves traffic safety, management, and sustainability issues in transport.

Flip the Funnel - Joseph Jaffe 2010-01-26

Why customer retention is the new acquisition If there's anything the recession of 2009 taught us, it was the importance of investing in our customers, but when was this any different? So says Joseph Jaffe, bestselling author of *Life After the 30-Second Spot* and *Join the Conversation*, and a leading expert and thought leader on new media and social media. In most businesses,

it costs roughly five-to-ten times more to acquire a new customer than it does to retain an existing one, and yet companies continue to disproportionately spend their budgets into the "wrong" end of the funnel – the mass media or awareness side. What we haven't paid enough attention to is the "right" end of the funnel—the word-of-mouth component that essentially acts as a multiplier for future business. The economic impact of an active, engaged and loyal customer is tremendous. And the same is true of the opposite scenario, namely the impact of angry customers and negative word-of-mouth or referrals. It is this thinking that Jaffe has channeled to challenge marketers to "flip the funnel" once and for all. With a renewed focus and energy on customer experience, it is possible to grow your sales, while decreasing your budget – in other words, getting more from less. Engaging a few customers to spread the

word to many. Using this new "flipped funnel" model, together with a set of new rules of customer service and a revolutionary customer referral and activation process, you'll learn how to transform your existing customers into your best salespeople. In addition, Jaffe will explain how to best introduce and combine both digital and social media tools to boost your loyalty arsenal, deploy "influencer marketing" and implement word-of-mouth strategies that inspire your loyal, opinionated, and most vocal customers to become credible, persuasive, and influential endorsers of your products and services. Explains how to cut your marketing budget AND grow sales! Illustrates practical ways to use existing customers to reach out to new prospects Outlines the authentic role of social media Demonstrates key ideas with rich, real life examples including Comcast, Apple, The Obama Campaign, Dell,

Panasonic, American Airlines, Delta Airlines, Johnson & Johnson, Coca-Cola and many, many more Written by one of the most sought-after consultants, keynote speakers, and thought-leaders on new marketing change and innovation; renowned blogger and podcaster at Jaffe Juice (www.jaffejuice.com) and host/presenter of web video show, JaffeJuiceTV (www.jaffejuice.tv) Visit www.flipthefunnelnow.com to join the conversation.

Introducing New Materials in the Automotive Industry - Fredrik Henriksson
2017-11-15

Passenger vehicles are central to Western society, and contribute to a significant part of our greenhouse gas emissions. In order to reduce emissions, the automotive industry as a whole is working to reduce mass in passenger vehicles in order to reduce energy consumption. One way to reduce mass is to introduce lightweight materials in the body of the vehicle. This research aims to explore the relationship between product and production system when introducing new materials. Besides a theoretical review and an industry-centered technological mapping, four case studies have been conducted during the course of this licentiate thesis. Two case studies were conducted with engineering design students working as development teams, one case

study with the author as the developer and finally one case study in an industrial environment at a product owning company with in-house production. The goal of the case studies has been to increase the collective knowledge of how product development decisions affect production development decisions, and vice versa, when developing passenger vehicles in new materials. In the following analysis of case study outcomes, a number of factors important for introducing new materials are discussed. The relationship between product and production is investigated, both in terms of how the production system affects the product and how the product affects the production system. The outcome from this analysis is a mapping of important factors for automotive industry companies to understand and identify when looking at introducing new materials in existing production systems. Finally, a suggestion for

future research efforts is presented.

Holding On - KiKi Malone 2019-08-13

Carter Montgomery knows exactly what he wants and needs in life. A wife. A home. A family. And lastly, a career. Just when he thought he had it all and would soon be checking off each of those boxes, everything changed. A girl can only take so much before she loses hope and resigns herself to a life that is nothing like the one she'd dreamed of, but everything can change in a moment, for better or worse. One call is all it takes for me. One call to help someone and I'm staring face-to-face with the picture of a life my heart desperately yearns for. A life I wasn't sure was in the cards for me, but could I be wrong? Maybe there is that "someone special" for everyone. The question is, how do you actually know they're the one when you've been wrong before and have the scars to prove it? Everything can change in a moment and

holding on is the only option.

With a special focus on marketing, positioning, and branding, this book presents issues and solutions of both large multinationals and small niche market players.

Learning Rates of Electric Vehicles - Andreas Zerfaß 2017-07-25

Governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport-related carbon dioxide (CO₂) and air pollutant

emissions. However, battery-electric vehicles (BEVs) and plug-in hybrid-electric vehicles (PHEVs) have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges, which still hampers the market potential of these vehicles. Despite persisting shortfalls, mechanisms such as technological learning and economics of scale promise to improve the techno-economic performance of BEVs and PHEVs in the short- to mid-term. Here, the author seeks to obtain insight into the techno-economic prospects of BEVs and PHEVs by: (i) establishing experience curves and (ii) quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time-series analysis. The analysis captures the situation in Germany between 2010 and 2016.
