The human face of poverty The poor in India are, too often, reduced to statistics. In this thoroughly researched study of the poorest of the poor, we get to see how they manage, what sustains them, and the efforts, often ludicrous, to do something for them. The people who figure in this book typify the lives and aspirations of a large section of Indian society, and their stories present us with the true face of development.

*Coaching* - Ruchira Chaudhary 2021-01-25

This book lucidly illustrates how a leader can bring out the very best in people by coaching them, and how coaching can unleash creativity as well as innovation while inspiring teams to play to their potential. It also examines how coaching helps leaders maintain a fine balance between managing and guiding, and between appraising and supporting their teammates. While many excellent books have been written about leadership, talent and coaching, this is a rare book that stands boldly at the intersection of leadership and coaching. This is a book for our times.

Businesses are facing a new reality, characterized by a VUCA (volatile, uncertain, complex and ambiguous) world. This new reality has forced organizations to depart from conventional command-and-control practices to a completely new model - a model in which leaders support and guide, rather than instruct and control, their team members. Exploring some of the key ingredients of impactful leadership, *Coaching* offers tips and tricks, backed by research and incisive insights, on how to become an effective leader-coach. Peppered with interesting anecdotes and analogies, drawn from sports, performing arts and other walks of life, the book is a breezy read. Interviews with corporate leaders and academics further enrich the narrative. Guaranteed to make for a very interesting read, the book will be useful to leaders, aspiring leaders and especially those that wish to transition from being just good leaders to extraordinary ones.

*Daughters of Legacy* - Rinku Paul 2018-07-23

What are the challenges and perks of handling age-old legacies? If you come into a position of power through a position of privilege, how do you make sure that you earn respect, more so if you are a woman? These and many more questions are what *Daughters of Legacy* seeks to answer through the stories of twelve successful women who grew up with strong business lineages. While Ashni Biyani, chief ideator, Future Group, looks at herself as a co-creator of the business rather than a just a legacy bearer, Manasi Kirloskar, executive director and CEO, Kirloskar Systems Ltd, admits that she is hugely privileged in inheriting a large business, but also goes on to point out that she could lose everything overnight if she isn't competent. And Meher Pudumjee's acceptance as non-executive chairperson of Thermax Global that legacies can sometimes feel like a burden is followed close on the heels by the realization that there is nothing more that one can do except give one's best. Chosen from a wide cross section in terms of scale of business, roles and hierarchy these women have not only kept the legacies alive but have also gone on to carve a niche for themselves as individuals beyond their famous last names. Clearly for all of them legacy is far more than mere inheritance.

**The Low-Carb Fraud** - T. Colin Campbell 2014-02-25

By now, the low-carb diet's refrain is a familiar one: Bread is bad for you. Fat doesn't matter. Carbs are the real reason you can't lose weight. The low-carb universe Dr. Atkins brought into being continues to expand. Low-carb diets, from South Beach to the Zone and beyond, are still the go-to method for weight-loss for millions. These diets' marketing may differ, but they all share two crucial components: the condemnation of "carbs" and an emphasis on meat and fat for calories. Even the latest diet trend, the Paleo diet, is—despite its increased focus on (some) whole foods—just another variation on the same carbohydrate fears. In *The Low-Carb Fraud*, longtime leader in the nutritional science field T. Colin Campbell (author of *The China Study* and *Whole*) outlines where (and how) the low-carb proponents get it wrong: where the belief that carbohydrates are bad came from, and why it persists despite all the evidence to the contrary. The foods we misleadingly refer to as "carbs" aren't all created equal—and treating them that way has major consequences for our nutritional well-being. If you're considering a low-carb diet, read this e-book first. It will change the way you think about what you eat—and how you should be eating, to lose weight and optimize your health, now and for the long term.

*Life is What You Make It* - Preeti Shenoy 2019-07-12

What would you do if destiny twisted the road you took? What if it threw you to a place you did not want to go? Would you fight, would you run or would you accept? Set across two cities in India in the early eighties, *Life is What You Make It* is a gripping account of a few significant years of Ankita's life. Ankita Sharma has the world at her feet. She is young, good-looking, smart and tones of friends and boys swooning over her. She also manages to get into a premier management school for her MBA. Six months later, she is a patient in a mental health hospital. Life has cruelly and coldly snatched that which meant the most to her and she must now fight to get it all back. It is a deeply moving and inspiring account of growing up, of the power of faith and how determination and an indomitable spirit can overcome even what destiny throws at you. A tale, at its core a love-story that makes us question our beliefs about ourselves and our concept of sanity, and forces us to believe that life is truly what one makes it.

**First, They Erased Our Name** - Habiburahman 2019-08-06

For the first time, a Rohingya speaks up to expose the persecution facing his people. 'I am three years old and will have to grow up with the hostility of others. I am already an outlaw in my own country, an outlaw in the world. I am three years old, and don't yet know that I am stateless.'

Habiburahman was born in 1979 and raised in a small village in western Burma. When he was three years old, the country's military leader declared that his people, the Rohingya, were not one of the 135 recognised ethnic groups that formed the eight 'national races'. He was left stateless in his own country. Since 1982, millions of Rohingya have had to flee their homes as a result of extreme prejudice and persecution. In 2016 and 2017, the government intensified the process of ethnic cleansing, and over 600,000 Rohingya people were forced to cross the border into Bangladesh. Here, for the first time, a Rohingya speaks up to expose the truth behind this global humanitarian crisis. Through the eyes of a child, we learn about the historic persecution of the Rohingya people and witness the violence Habiburahman endured throughout his life until he escaped the country in 2000. First, They Erased Our Name is an urgent, moving memoir about what it feels like to be repressed in one's own country and a refugee in others. It gives voice to the voiceless.

*Grit, Guts and Gumption* - Rajesh Chakrabarti 2010-10-01

This is the story of the carefully planned resurgence of the State Bank of India (SBI) from a laid-back incumbent under threat from private players to a customer-oriented competitive

organization that has outperformed rivals despite several constraints. The leadership at SBI succeeded in reshaping perspectives and profitability at the bank, which employs a staggering 200,000 people, not withstanding salary restrictions and regulatory bottlenecks. While the primary thrust was on changing employee attitude towards their own organization and, of course, its customers, the transformation exercise was broad-based encompassing fundamental changes in technology, processes and business-mix alike. In about three years beginning 2006, SBI not only defended its own lair against the siege of younger, leaner, meaner rivals but actually took the battle to the attacker's domains. SBI's size and setting make the story an inspiring example to other organizations, particularly in the public sector. Written in a fluid and engaging style, and backed by facts, figures, analysis and anecdotes, the book challenges several stereotypes and dogmas common in today's management circles.

A powerful story about the African philosophy of teamwork and collaboration that has the power to reshape our workplaces, our relationships with our coworkers, and our personal lives, written by the bestselling coauthor of Fish! and the bestselling author of 1001 Ways to Reward Employees. John Peterson, a new manager in the credit department at a major big-box retailer, is struggling in his job. The people under him are not working as well or effectively as they need to, and his department is falling behind in meeting its goals. His only solution is to take on more work himself, burning the midnight oil and coming in most weekends to pick up the slack and keep his department above water. When one of the employees stays behind to help him—a young man who came to America from a small village in Africa—he learns of the ancient wisdom and hidden power of the African philosophy of Ubuntu. Before long, it begins to change the way he thinks about the people he works with, about himself, and about how he runs his department and his life. In an engaging and completely fresh narrative that holds a unique message for today's business world, Ubuntu! shows us a way to overcome our fears, insecurities, and the "me-ism" that so often permeates our workplaces, and replace it with a culture of genuine respect and collaboration. It promises to take its place alongside Fish! and other business parables as the next bestselling classic in the business category.

*The Great Disappointment* - Salman Anees Soz 2019

As the National Democratic Alliance (NDA) government completes its current term ahead of the General Elections 2019, it is time to evaluate its performance, specifically in terms of its management of the economy. This book is a critical assessment of five years of the brand of economics Prime Minister Narendra Modi has championed, often referred to as 'Modinomics'. Brought into power with the biggest political mandate in almost three decades, did the NDA government succeed in gainfully transforming India's economic trajectory or did it squander a once-in-a-generation opportunity? The book conjectures it is the latter, and analyses why the Modi government's stewardship of the economy is a 'great disappointment'.

Had relations between the two great nationalist leaders soured to the extent that Bose had begun to view Nehru as his enemy? But then, why did he name one of the regiments of the Indian National Army after Jawaharlal? And what prompted Nehru to weep when he heard of Bose's untimely death in 1945, and to recount soon after, 'I used to treat him as my younger brother'? Rudrangshu Mukherjee's fascinating book traces the contours of a friendship that did not quite blossom as political ideologies diverged, and delineates the shadow that fell between them—for, Gandhi saw Nehru as his chosen heir and Bose as a prodigal son.

**The Clarity First** - Amit Chawla 2019-08-05

*CEO FACTORY* - SUDHIR. SITAPATI 2020

Fearless Freedom - Kavita Krishnan 2020-02-07

Safety' for women in India is, more often than not, coded as curtailment of autonomy. To be 'safe', women are told they must allow themselves to be kept under constant surveillance. Their movement is restricted to specific spaces, often homes and hostels. Extreme levels of control are exercised to confine their mobility. But is freedom really incompatible with safety? In this ground-breaking and radical book, Kavita Krishnan locates the personal and political repercussions of erasing women from public spaces. She argues that many real and violent threats to female autonomy are, in fact, hidden in plain sight. Often challenging conventional wisdom, this is a blazing, fiery manifesto for greater equality, political and economic independence, and, most of all, personal freedom.

*Savarkar* - Vikram Sampath 2019-08-16

As the intellectual fountainhead of the ideology of Hindutva, which is in political ascendancy in India today, Vinayak Damodar Savarkar is undoubtedly one of the most contentious political thinkers and leaders of the twentieth century. Accounts of his eventful and stormy life have oscillated from eulogizing hagiographies to disparaging demonization. The truth, as always, lies somewhere in between and has unfortunately never been brought to light. Savarkar and his ideology stood as one of the strongest and most virulent opponents of Gandhi, his pacifist philosophy and the Indian National Congress. An alleged atheist and a staunch rationalist who opposed orthodox Hindu beliefs, encouraged inter-caste marriage and dining, and dismissed cow worship as mere superstition, Savarkar was, arguably, the most vocal political voice for the Hindu community through the entire course of India's freedom struggle. From the heady days of revolution and generating international support for the cause of India's freedom as a law student in London, Savarkar found himself arrested, unfairly tried for sedition, transported and incarcerated at the Cellular Jail, in the Andamans, for over a decade, where he underwent unimaginable torture. From being an optimistic advocate of Hindu-Muslim unity in his treatise on the 1857 War of Independence, what was it that transformed him in the Cellular Jail to a proponent of 'Hindutva', which viewed Muslims with suspicion? Drawing from a vast range of original archival documents across India and abroad, this biography in two parts—the first focusing on the years leading up to his incarceration and eventual release from the Kalapani-puts Savarkar, his life and philosophy in a new perspective and looks at the man with all his achievements and failings.

**INDIA'S NEW CAPITALISTS** - Harish Damodaran 2018-11-25

It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular 'Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of the old mercantile castes. In this meticulously researched book, acclaimed for being the first social history to document and understand India's new entrepreneurial groups, Harish Damodaran looks to answer who the new 'wealth creators' are, as he traces the transitional entry of India's middle and lower peasant castes into the business world. Combining analytical rigour with journalistic flair, *India's New Capitalists* is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.

*Ten Years to Midnight* - Blair H. Sheppard 2020-08-04

"Shows how humans have brought us to the brink and how humanity can find solutions. I urge people to read with humility and the daring to act." —Harpal Singh, former Chair, Save the Children, India, and former Vice Chair, Save the Children International In conversations with people all over the world, from government officials and business leaders to taxi drivers and schoolteachers, Blair Sheppard, global leader for strategy and leadership at PwC, discovered they all had surprisingly similar concerns. In this prescient and pragmatic book, he and his team sum up these concerns in what they call the ADAPT framework: Asymmetry of wealth; Disruption wrought by the unexpected and often problematic consequences of technology; Age disparities--stresses caused by very young or very old populations in developed and emerging countries; Polarization as a symptom of the breakdown in global and national consensus; and loss of Trust in the institutions that underpin and stabilize society. These concerns are in turn precipitating four crises: a crisis of prosperity, a crisis of technology, a crisis of institutional legitimacy, and a crisis of leadership. Sheppard and his team analyze the complex roots of these crises--but they also offer solutions, albeit often seemingly counterintuitive ones. For example, in an era of globalization, we need to place a much greater emphasis on developing self-sustaining local economies. And as technology permeates our lives, we need computer scientists and engineers conversant with sociology and psychology and poets who can code. The authors argue persuasively that we have only a decade to make headway on these problems. But if we tackle them now, thoughtfully, imaginatively, creatively, and energetically, in ten years we could be looking at a dawn instead of darkness.
