Cannibals with Forks - John Elkington 1999

Based on first-hand experience with companies such as Volvo, BP, Proctor and Gamble, ICI and Fuji Xerox, Elkington defines the triple bottom line of 21st century business as profit, environmental sustainability and social responsibility.

Water Quality - Jim Perry 2009-06-24

Once a purely technical sub-discipline of hydrology, water quality management is now a social and political discipline, with concerns ranging from ensuring adequate health standards to preserving biological diversity and ecosystem integrity. This book goes beyond the technical manuals and specialty publications to provide support and guidance for the everyday decisions made by water-quality managers. Water Quality:

Management of a Natural Resource addresses the rarely touched upon social, biophysical, land-use and policy considerations, which reflect the issues that confront managers and decision-makers. In a series of incisive reviews, experts address key topics in modern water resource management and case studies illustrate the successes and failures of past management efforts. Water Quality: Management of a Natural Resource develops and presents a management view requiring an awareness of: the social context of management, new ecological theories, and how policy is implemented in different situations and countries.

European and East Asian Regionalism - Jens-Uwe Wunderlich 2020-10-16

Embedded in the evolving comparative regionalism literature, this book offers a systematic analysis of the factors positively and negatively influencing regional institution-building. The ruptures caused by the Eurozone crises, the coronavirus pandemic and by Brexit have renewed the interest in the impact of crises and critical junctures on regionalism here defined as regional institution-building. Drawing from critical juncture research and historical comparative analysis, this volume uses the cases of European and East Asian regional institution-building to systematically analyse institutional transformations during specific historical turning points and critical juncture moments. Wunderlich's research offers an in-depth analysis of the interrelated drivers, spoilers and dissolvers of regional institution-building processes in Europe and East Asia, and addresses key questions including: Under what conditions does regionalism take hold? What is influencing the initial institutional design choices? What is the impact of historical experiences and well-entrenched norms and ideas? What are the roles of regional leaders? How do external factors influence regional institution-building? What turns a crisis into a critical juncture and are such junctures threats or opportunities? What accounts for variations in institutional responses to crisis events across different regional settings? This book will be a valuable resource for scholars of regionalism, region-building, regional governance and international relations of Europe and East Asia.

Achieving Work-life Balance - Thomas Kalliath 2008

Creating an organization where employees can achieve a good balance between work and family life is a growing concern for employees and organisations. Indeed, employer responsiveness in developing and implementing policies and programs that achieve work-family balance is becoming a key attribute distinguishing family-friendly organizations. Although much of the research attention to date has focused on demonstrating the negative effects of work-family conflict on individual well-being (e.g. increased job satisfaction, reduced stress) and organizational performance (e.g. reduced turnover), researchers have now begun to uncover the positive effects (facilitation) of work on family and vice versa. Some forward thinking

organizations have identified the potential of work-family balance for creating competitive advantage and have put in place family-friendly policies with the intent of improving employee satisfaction, retention and organizational performance. The goal of this Special Issue is to bring together organizational innovations and best practices for achieving work-family balance including proven strategic, human resource, and change management strategies for achieving work-family balance in organizations.

Teaching English Using ICT - Tom Rank 2011-06-02

Want to get boys excited about poetry? Try establishing a wiki-war on the use of form and structure. Or perhaps a podcast to develop close analysis of language. How about getting them blogging about their favourite characters? Based on established principles of the best ways to use ICT in English, this practical resource looks at when and how ICT can be used to engage and inspire students of English, but only when it enhances teaching and learning, never for its own sake. Beginning with an overview of what ICT can offer and how it is changing the way we teach and learn, the authors then give practical examples of activities and ideas to attain key English skills and learning goals in secondary schools. Throughout the book, there are tried-and-tested ideas for tackling the hard-to-teach topics, and there is also a dedicated website with links to useful websites, the authors' favourite tips and downloadable resources.

New Learning - Robert-Jan Simons 2007-05-08

This book brings together research and theory about 'New Learning', the term we use for new learning outcomes, new kinds of learning processes and new instructional methods that are both wanted by society and stressed in psychological theory in many countries at present. It describes and illustrates the differences as well as the modern versions of the traditional innovative ideas.

Zero-Waste - Atiq Zaman 2019-12-06

This book analyses 'zero-waste' (ZW) as an emerging waste management strategy for the future, which considers waste prevention through innovative design and sustainable consumption practices. Drawing on a diverse range of case studies from Australia, Bangladesh, Japan, New Zealand, Sweden, and the USA, this book explores why urban waste management systems still remain a major challenge for almost all cities around the world. Rejecting waste as an 'end-of-life' problem, Atiq Zaman and Tahmina Ahsan instead consider waste prevention through the ZW model, in which resources are utilized and consumed with minimum environmental degradation. In addition, the authors give extended discussion on why embracing the ZW concept will be beneficial for the circular economy (CE). Providing a strategic zero-waste framework and an evaluation tool to measure waste management performance aimed towards ZW goals, this book will be of great relevance to students, scholars, and policymakers with an interest in waste management, sustainable consumption, urban planning, and sustainable development.

Communication Activism - Lawrence R. Frey 2007

Focuses on studies that show how media can be managed to promote social change and how performance can serve as an important form of communication activism. This volume, along with the other volume, showcases how scholars have engaged in communication activism to assist individuals, groups, organizations, and communities to secure social reform.

Business Market Management - James C. Anderson 2009

Written for undergraduate and MBA courses in business-to-business marketing or industrial marketing, this

text explores the process of understanding, creating and delivering value to targeted business markets and customers. It provides an analytical framework for determining value.

Nature, Tourism and Ethnicity as Drivers of (De)Marginalization - Stanko Pelc 2017-08-01

This book considers de-marginalization attesting that marginal regions have the potential for de-marginalization and are anchored in developmental terms on the following core themes: nature; tourism; ethnicity and general factors including migration. Adding to the discussion on marginality and sustainability this book contributes a number of case studies on a diverse selection of topics and regions in which these crucial issues connect. It delivers a reflection of (de)marginalizing processes in today's globalized world where an increasing number of people, groups, societies and regions are marginalized and vulnerable not only from social and economic factors, but also from natural causes such as natural hazards. This book addresses the unsustainable practices in the past that have often generated difficult conditions for sustainable development in the future. Marginal regions that have not been developed are given much needed consideration as they may now enjoy the benefits of having not been exploited in the past to their present-day developmental advantage. The overview offered by this book is significant in that marginal regions with relatively unspoiled and attractive natural (and cultural) landscapes have a great potential for sustainable tourism. Contributions include the (de)marginalization of ethnic groups, the role of education and migration in the process, and different economic and political perspectives. Considering the topics covered, the book should be appreciated by all those involved in creation of social policies, urban and regional planning - coordinating economic with spatial and social development and by those studying in the fields where competencies for such activities are important part of the study program.

Basic Research Opportunities in Earth Science - National Research Council 2001-02-01

Basic Research Opportunities in Earth Science identifies areas of high-priority research within the purview of the Earth Science Division of the National Science Foundation, assesses cross-disciplinary connections, and discusses the linkages between basic research and societal needs. Opportunities in Earth science have been opened up by major improvements in techniques for reading the geological record of terrestrial change, capabilities for observing active processes in the present-day Earth, and computational technologies for realistic simulations of dynamic geosystems. This book examines six specific areas in which the opportunities for basic research are especially compelling, including integrative studies of the near-surface environment (the "Critical Zone"); geobiology; Earth and planetary materials; investigations of the continents; studies of Earth's deep interior; and planetary science. It concludes with a discussion of mechanisms for exploiting these research opportunities, including EarthScope, natural laboratories, and partnerships.

Doing Business in 2004 - Simeon Djankov 2004

A co-publication of the World Bank, International Finance Corporation and Oxford University Press

Planning, Public Policy and Property Markets - David Adams 2008-04-15

The focus of this book is on how public policy - and especially the planning system - both shapes and reflects the essential characteristics of land and property markets. It challenges the common misconceptions that property markets operate in isolation from public policy and that planning permission is the only significant form of state intervention in the market. Planning, Public Policy & Property Markets contends that effective state-market relations in land and property are critical to a prosperous economy and a robust democracy, especially at a time when development aims to be sustainable and environmental protection needs to be matched by urban and rural regeneration. The book thus reflects an increased realisation among academics and practitioners of the importance of theoretical integration and 'joined-up' policy-making. Its rounded perspective addresses a significant weakness in the academic literature and will encourage broader debate and a more pluralist agenda for property research. Prominent contributors present important new research on different market sectors and policy arenas, including regeneration and renewal, housing growth, housing planning, transport and economic competitiveness, while the editors specifically draw out more general lessons on the dynamic nature of the state/property market relationship in a modern economy. This book will encourage all those involved in property research who strive for theoretical and practical connectivity to demonstrate that, just as property market operations cannot be analysed without understanding state processes, policy decisions cannot be taken without an appreciation of how the market operates.

The Cruise Experience - Norman Douglas 2004-01

Cruising is the most significant growth sector of the tourism industry, but little is known about it. Here, the authors provide a comprehensive description and examination of this world-wide industry, which is rapidly expanding and changing. This title pays special attention to developments in the Asia-Pacific region.

Software Literacy - Elaine Khoo 2017-11-24

This book explores the notion of software literacy, a key part of digital literacy which all contemporary students and citizens need to understand. Software literacy involves a critical understanding of how the affordances and conceptual approaches of everything from operating systems, creative apps and media editors, to software-based platforms and infrastructures work to inform and shape the ways we think and act. As a cultural artefact, programming code plays a role in reproducing, reinforcing, and augmenting existing cultural practices, as well as generating completely new coded practices. A proposed three-tier framework for software literacy is the focus for a two-year empirical investigation into how tertiary students become more literate about the nature and implications of software they encounter as part of their tertiary studies. Two case studies of software learning and use in university-level engineering and screen & media studies courses are presented, investigating the mapping of students' trajectory of the learning of desktop applications against this framework for software literacy. Though the book's focus is primarily educational, its content also has implications for any field that makes use of software and information & communication technology systems and applications. As such, the book will be of interest to all readers whose work involves the challenges and opportunities presented by software-based teaching and learning; and to those interested in how software impacts the workplace and leisure activities that make up our day-to-day lives.

The Wisdom of Islam - 1996

Report on the Work of the Government - Keqiang Li 2022-09-15

This is a transcript of Premier Li Keqiang's government work report. It was a practical and factual report that pointed out challenges, strengths, and opportunities. Keqiang tells people that the Chinese economy is facing hardships due to structural reforms, the need for better environmental protection, and the impact of a lagging global economy.

Work and Family in the United States - Rosabeth Moss Kanter 1977-11-15

Now considered a classic in the field, this book first called attention to what Kanter has referred to as the "myth of separate worlds." Rosabeth Moss Kanter was one of the first to argue that the assumed separation between work and family was a myth and that research must explore the linkages between these two roles.

Business Management for Entrepreneurs - Cecile Nieuwenhuizen 2007

Business Management for Entrepreneurs introduces entrepreneurs and managers of small and medium-sized businesses to all the functions needed to manage these organizations successfully. This is an essential guide to the small business management competencies that are essential for the success of a smaller business.

Urban Design in the Real Estate Development Process - Steve Tiesdell 2011-06-20

Urban design enables better places to be created for people and is thus seen in Urban Design in the Real Estate Development Process as a place-making activity, rather than the application of architectural aesthetics. Urban design policy can change the 'decision environment' of developers, financiers, designers and other actors in the real estate development process to make them take place-making more seriously. This book reports diverse international experience from Europe and North America on the role and significance of urban design in the real estate development process and explores how higher quality development and better places can be achieved through public policy. The book is focused on four types of policy tool or instrument that have been deployed to promote better urban design: those that seek to shape, regulate or provide stimulus to real estate markets along with those aim to build capacity to achieve these. Urban design is therefore seen as a form of public policy that seeks to steer real estate development towards policy-shaped rather than market-led outcomes. The editors set the examples, case studies and evidence from international contributors within a substantive discussion of the impact of urban design policy tools and actions in specific development contexts. Contributions from leading urban design theorists and practitioners explore how: Masterplanning and infrastructure provision encourage high quality design Design codes reconcile developers' needs for certainty and flexibility Clear policy combined with firm regulation can transform developer behaviour Intelligent parcelisation can craft the character of successful new urban

districts Powerful real estates interests can capture regulatory initiatives Stimulus instruments can encourage good design Development competitions need careful management Design review can foster developer commitment to design excellence Speculative housebuilders respond in varied ways to the brownfield design challenge Physical-financial models could help in assessing the benefits of design investment Urban design can add value to the benefit of developers and cities as a whole.

Academic-Practitioner Relationships - Jean M. Bartunek 2017-07-06

While executives are keen to harness organizational knowledge and improve business performance, the topic of how academics can produce rigorous and relevant theory in working relationships with practitioners is a much contested topic. Many aspects of this knowledge co-creation can create tensions, and the ways in which research is conducted and published can affect practitioner acceptance, as well as its consequent uptake and use in different contexts. Expertly compiled by Jean Bartunek and Jane McKenzie, with contributions from global thinkers in the field, this book offers a concise and up-to-date review of the essential analysis and action underlying scholarly engagement with the world of business. It discusses the sorts of capabilities academics need to collaborate effectively with practitioners and illustrates good practice through international case studies drawn from acknowledged centres of excellence. These show how to negotiate different constituencies with different priorities, values, and practices to work together to produce research of rigor and relevance. It will be a key reference and resource for all researchers who are engaged with practitioners, and an invaluable tool for training academics to develop research with impact.

IPPS - 1995

The College Environment - Alexander W. Astin 1968

United States Attorneys' Manual - United States. Department of Justice 1988

The Experiences of Film Location Tourists - Stefan Roesch 2009

This book examines the on-site experiences of film-induced tourists at various film locations, including locations from The Lord of the Rings, Star Wars and The Sound of Music. The study attempts to understand the needs and wants of film location tourists and also examines how to use films for destination marketing.

Sustainable Energy Landscapes - Sven Stremke 2012-09-12

In the near future the appearance and spatial organization of urban and rural landscapes will be strongly influenced by the generation of renewable energy. One of the critical tasks will be the re-integration of these sustainable energy landscapes into the existing environment-which people value and want to preserve-in a socially fair, environmental

Infant and Child Mortality - Shea Oscar Rutstein 1983

The Impacts of Tourism on Marine Environments - John Swarbrooke 2020-09

The first text to take a truly inter-disciplinary approach to critically examining the impacts of tourism on marine environments and coastal regions, focusing on the negative environmental impacts but also looking at the social and economic impacts.

United States V. Rivera - 1975

Mobility and Technology in the Workplace - Donald Hislop 2008-07-14

The contemporary period has witnessed the rapid evolution in a wide range of mobile technology. This book charts the profound implications these technological changes have for workers and business organizations. From an organizational point of view they have the potential to transform the nature of organizations, through allowing workers to be increasingly mobile. From the perspective of workers these changes have the potential to impact on their work-related communications, how they manage the increasingly blurred public-private divide, and the nature of the home-work boundary. These chapters provide a detailed insight into these issues through bringing together an international collection of contemporary studies and analysis and taking a critical perspective towards some of the advertised myths regarding mobile technology usage. Issues covered include: Travel and changing nature of spatial mobility patterns. Work-Space and Place and

the 'leaking' out of organizations into more public domains. Mobile Work Practices including detailed and heterogeneous case studies. Home-work dynamics and the changing nature of the home-work boundary. Implications for Public Policy

Multigenerational Communication in Organizations - Michael G. Strawser 2021-05-11

Multigenerational Communication in Organizations explores generational differences in the changing workplace from a communication perspective. Starting from the reality that a workplace can contain up to five different generations, these chapters examine topics like generational perceptions on the job search process; organizational culture; organizational identification; organizational crises; the dark side of workplace communication; remote working; and future challenges. Outlines of best practices and suggestions for application are provided based on the most recent data and corresponding literature. The authors also develop a data-forward understanding of Generation Z in context. This book is ideal for both scholars and practitioners in organizational communication and management, as well as for workplace managers and supervisors.

Self-governance and Forest Resources - Elinor Ostrom 1999

Forest resources share attributes with many other resource systems that make difficult their governance and management in a sustainable, efficient and equitable manner. Destruction or degradation of forest resources is most likely to occur in open-access forests where those involved, or external authorities, have not established effective governance. Conventional theories applied to forest resources presumed that forest users themselves were incapable of organising to overcome the temptations to overharvest. Extensive empirical research, however, has challenged this theory and illustrated the many ways that forest users themselves have devised rules that regulate harvesting patterns so as to ensure the sustainability of forest resources over time. This growing consensus about the attributes of users and resources has been applied in the design of policies intended enhance the participation of local users in the governance and management of common-pool resources, including many forests. Supporting further research-especially studies of forests and their users over time - is an important foundation for even more effective public policies in the future.

Shaping Places - David Adams 2013

Shaping Places explains how towns and cities can turn real estate development to their advantage to create the kind of places where people want to live, work, relax and invest. It contends that the production of quality places which enhance economic prosperity, social cohesion and environmental sustainability require a transformation of market outcomes. The core of the book explores why this is essential, and how it can be delivered, by linking a clear vision for the future with the necessary means to achieve it. Crucially, the book argues that public authorities should seek to shape, regulate and stimulate real estate development so that developers, landowners and funders see real benefit in creating better places. Key to this is seeing planners as market actors, whose potential to shape the built environment depends on their capacity to understand and transform the embedded attitudes and practices of other market actors. This requires planners to be skilled in understanding the political economy of real estate development and successful in changing its outcomes through smart intervention. Drawing on a strong theoretical framework, the book reveals how the future of places will come to be shaped through constant interaction between State and market power. Filled with international examples, essential case studies, color diagrams and photographs, this is essential reading for undergraduate and graduate students taking planning, property, real estate or urban design courses as well as for social science students more widely who wish to know how the shaping of place really occurs.

Spatial Planning and Climate Change - Elizabeth Wilson 2010-09-13

Spatial planning has a vital role to play in the move to a low carbon energy future and in adapting to climate change. To do this, spatial planning must develop and implement new approaches. Elizabeth Wilson and Jake Piper explore a wide range of issues in this comprehensive book on the relationship between our changing climate and spatial planning, and suggest ways of addressing the challenges by taking a longer-sighted approach to our preparation for the future. This text includes: an overview of what we know already about future climate change and its impacts, as we attempt both to adapt to these changes and to reduce the emissions which cause them the role of spatial planning in relation to climate change, offering some theoretical and political explanations for the challenges that planning faces in the coming decades a review of policy and legislation at international, EU and UK levels in regard to climate change, and the support this

gives to the planning system case studies detailing what responses the UK and the Netherlands have made so far in light of the evidence ways to help new and existing urban developments to reduce energy use and to adapt to climate change, through strengthening the relationships between urban and rural areas to avoid water shortage, floods or loss of biodiversity. The authors take an evidence-based look at this hugely important topic, providing a well-illustrated text for spatial planning professionals, politicians and the interested public, as well as a useful reference for postgraduate planning, geography, urban studies, urban design and environmental studies students.

Hashtag Islam - Gary R. Bunt 2018-09-25

Gary R. Bunt is a twenty-year pioneer in the study of cyber-Islamic environments (CIEs). In his new book, Bunt explores the diverse and surprising ways digital technology is shaping how Muslims across vast territories relate to religious authorities in fulfilling spiritual, mystical, and legalistic agendas. From social networks to websites, essential elements of religious practices and authority now have representation online. Muslims, embracing the immediacy and general accessibility of the internet, are increasingly turning to cyberspace for advice and answers to important religious questions. Online environments often challenge traditional models of authority, however. One result is the rise of digitally literate religious scholars and authorities whose influence and impact go beyond traditional boundaries of imams, mullahs, and shaikhs. Bunt shows how online rhetoric and social media are being used to articulate religious faith by many different kinds of Muslim organizations and individuals, from Muslim comedians and women's rights advocates to jihad-oriented groups, such as the "Islamic State" and al-Qaeda, which now clearly rely on strategic digital media policies to augment and justify their authority and draw recruits. This book makes clear that understanding CIEs is crucial for the holistic interpretation of authority in contemporary Islam.

Positive Thinking for Beginners - Lisa Edwards 2016-06-23

Positive thinking means changing the way you look at things and how you handle life's many challenges. It will help you achieve any goal. Conversely, a negative attitude will result in negative behavior, which affects your ability to even set goals. If you can't set goals, there's no way you can achieve them. In this guide to thinking in a positive way, you'll learn how to avoid procrastinating for the wrong reasons; recognize the importance of rewarding yourself with me time; take baby steps toward living a more positive life; and stop worrying about things you can't control. As hard as it may seem, it's possible to eliminate negative thinking from your life and replace it with positive thoughts. Small changes in your daily life won't just improve your life; they will also improve the lives of those around you. Start reaping the rewards of tackling each day with a smile by following the guidance in *Positive Thinking for Beginners*.

Order Statistics - Herbert A. David 2004-03-22

A completely revised and expanded edition of a classic resource. In the over twenty years since the publication of the Second Edition of *Order Statistics*, the theories and applications of this dynamic field have changed markedly. Meeting the challenges and demands of today's students and research community, authors H. A. David and H. N. Nagaraja return with a completely revised and updated *Order Statistics*, Third Edition. Chapters two through nine of this comprehensive volume deal with finite-sample theory, with individual topics grouped under distribution theory (chapters two through six) and statistical inference (chapters seven through nine). Chapters ten and eleven cover asymptotic theory for central, intermediate, and extreme order statistics, representing twice the coverage of this subject than the previous edition. New sections include: Stochastic orderings Characterizations Distribution-free prediction intervals Bootstrap estimations Moving order statistics Studentized range Ranked-set sampling Estimators of tail index The authors further explain application procedures for many data-analysis techniques and quality control. An appendix provides a guide to related tables and computer algorithms. Extensive exercise sets have been updated since the last edition. In spite of many eliminations, the total number of references has increased from 1,000 to 1,500. Expanded coverage of shortcut methods, robust estimation, lifetesting, reliability, L-statistics, and extreme-value theory complete this one-of-a-kind resource. Students and researchers of order statistics will appreciate this updated and thorough edition.

Mainstreaming Biodiversity for Sustainable Development - OECD 2018-07-10

Drawing on experiences and insights from 16 megadiverse countries, this report examines how biodiversity is being mainstreamed in four key areas.

Marketing Management and Strategy - Peter Doyle 2006

This text brings managers the latest ideas on branding, marketing and strategic change. It includes a step-by-step guide to developing marketing strategies and advice on pricing decisions, advertising and communications plans.

From Marketing Mix to Relationship Marketing - Christian Grönroos 1993

The author of this paper believes that a paradigm shift is under way in marketing theory. For the past 40 years, marketing thought, research and practice has been dominated by the marketing mix paradigm, based on the four Ps of product, price, place and promotion. Now, however, it is challenged by relationship marketing, defined as a process of establishing, maintaining and enhancing relationships with customers and other partners, at a profit, so that the objectives of the parties involved are met through a mutual exchange and fulfilment of promises, and of trust between seller and customer. The author examines the characteristics of such relationships and discusses how relationship marketing has evolved from other contemporary marketing theories.
