Discover the mysteries within ancient maps — Where exploration and mythology meet This richly illustrated book collects and explores the colorful histories behind a striking range of real antique maps that are all in some way a little too good to be true. Mysteries within ancient maps: The Phantom Atlas is a guide to the world not as it is, but as it was imagined to be. It's a world of ghost islands, invisible mountain ranges, mythical civilizations, ship-wrecking beasts, and other fictitious features introduced on maps and atlases through mistakes, misunderstanding, fantasies, and outright lies. Where exploration and mythology meet: Author Edward Brooke-Hitching is a map collector, author, writer for the popular BBC Television program QI and a Fellow of the Royal Geographical Society. He lives in a dusty heap of old maps and books in London investigating the places where exploration and mythology meet. Cartography's greatest phantoms: The Phantom Atlas uses gorgeous atlas images as springboards for tales of deranged buccaneers, seafaring monks, heroes, swindlers, and other amazing stories behind cartography's greatest phantoms. If you are a fan of this popular genre and a reader of books such as Prisoners of Geography, Atlas of Ancient Rome, Atlas Obscura, What If, Book of General Ignorance, or Thing Explainer, you will love The Phantom Atlas

How to Kill Your Family - Bella Mackie 2022-08-02

A darkly humorous debut novel that follows a cunning antihero as she gets her revenge When I think about what I actually did, I feel somewhat sad that nobody will ever know about the complex operation that I undertook. Getting away with it is highly preferable, of course, but perhaps when I'm long gone, someone

will open an old safe and find this confession. The public would reel. After all, almost nobody else in the world can possibly understand how someone, by the tender age of 28, can have calmly killed six members of her family. And then happily got on with the rest of her life, never to regret a thing. When Grace Bernard discovers her absentee millionaire father has rejected her dying mother's pleas for help, she vows revenge and coldly sets out to get her retribution—by killing them all, one by one. Compulsively readable, Bella Mackie's debut novel is driven by a captivating first-person narrator who talks of "self-care" and social media while calmly walking the reader through her increasingly baroque acts of murder. But then, Grace is imprisoned for a murder she didn't commit. Outrageously funny, compulsive, and subversive, *How to Kill Your Family* is a wickedly dark romp about class, family, love . . . and murder.

The Times History of the World - Geoffrey Barraclough 1999

The Times History of the World is an enduring classic of world publishing. First published in 1978, this remarkable book has changed our way of viewing history. It brings the drama of history to the page in a way often imitated but never matched. The New Edition marks the most radical and comprehensive revision of the book since its original publication. Every spread has been redesigned and rewritten, every map and chart extensively reviewed and updated. There is expanded treatment of China, Japan and southeast Asia from the earliest civilizations to today's rapidly evolving regions. The coverage of the United States has been strengthened to allow more material on the post-War period while that on the 20th century has been reorganized to reflect new historical perspectives and the dramatic events of this turbulent century. The result is a work unequalled in its authority, quality and imagination, a masterly overview of the endlessly absorbing story of humanity. Page by page, continent by continent, era by era, the full sweep of human history is revealed in enthralling detail. * Over 520 computer-generated colour maps * Contributions from over 100 leading historians from around the world *A Cartographic History of Our Lives and History from the Beginning of Recorded Time to the Present Day* - Geoffrey Wawro 2010-09

How will we be remembered? History is simply the interaction of our lives with each other and with nature. It begins with acts of adventure, courage, blind ambition, greed, and folly that are then recorded. Without accurate recording, we wouldn't know that Napoleon used a sandbox to construct his battle plans and transmitted messages to troops using semaphore, and that Christopher Columbus thought he'd landed in India instead of America - thus the name Indians for the local people there. Historical Atlas is a comprehensive history of the world to date. Learn everything from the gruesome detail of Nero's torture of Christians to the methods Kublai Khan used to select his concubines. Who did Marco Polo meet along the Silk Road and how did a lowly carpenter influence so much of the world's religion? The world as we know it is nothing more than the sum of Earth's history. Every event in time is influenced and guided by humankind and we cannot begin to know what might happen until we understand what has already occurred. Beginning with the origins of humankind and the migration of people around the globe, the Historical Atlas details the remarkable historical events that guide our future. Covering all of recorded time, this book moves effortlessly through the eons of our existence, cementing the path of our development, culture, and expectations. Historical Atlas presents hundreds of specially commissioned maps, detailed with symbols and icons that reveal a full and vivid image of the individual events of history. Each time period is divided into areas of the world so that overlapping events are contained within the boundaries of their geographic and chronological eras. The narrative is fresh and modern, revealing our history with zest and vigor. Each period is also illustrated with images that lure us into the era. Divided into chronological order and continents, the book is a cartographic narrative of humankind's time on Earth to the present.
