[Talking History](#) - Romila Thapar 2017-10-17

In a series of candid conversations, Romila Thapar, a widely read, discussed, and cited

historian of our times, muses on a range of issues that impact history writing in modern India. Apart from exploring Thapar's far-reaching influence as an authority on the history of early India, Talking History examines themes such as the function of a historian, the centrality of historical research and evidence, oriental despotism, the ongoing conflict with religious fundamentalists, and the polymorphous structure of Hinduism. Anecdotal and vibrant, each of these accounts reveals a rare understanding of history as a dialogue between the past and the present. The latest book in the series of Ramin Jahanbegloo's interviews with prominent intellectuals who have influenced modern Indian thought, Talking History traces Romila Thapar's journey as a historian and a public intellectual, and gives an insight into the ideas that have shaped her work.

The story set within 24 hours is not just a typical suspense thriller with a trace of history and a literary quest, but enormously stimulates the reader to analyze the broader spectrum of philosophy, literature, and the principles of global economies established around us. I hope the reader community will appreciate how this suspense thriller gives the glimpses of nature, ecology, social reforms, literature, global/local economies, and many more social dimensions.

**Go Kiss the World** -

Subroto Bagchi

2009-08-05

'Go, kiss the world' were Subroto Bagchi's blind mother's last words to him. These words became the guiding

principle of his life.

Subroto Bagchi grew up amidst what he calls the 'material simplicity' of rural and small-town Orissa, imbibing from his family a sense of contentment, constant wonder, connectedness to a larger whole and learning from unusual sources. From humble beginnings, he went on to achieve extraordinary professional success, eventually co-founding MindTree, one of India's most admired software services companies. Through personal anecdotes and simple words of wisdom, Subroto Bagchi brings to the young professional lessons in working and living, energizing ordinary people to lead extraordinary lives. Go Kiss the World will be an inspiration to 'young India', and to those who come from small-town India, urging them to recognize and develop their inner strengths, thereby helping them realize their own, unique potential.

The Hungry Mind - Susan  
Engel 2015-03-09

Despite American  
education's recent mania  
for standardized tests,  
testing misses what  
really matters about  
learning: the desire to  
learn in the first  
place. Curiosity is  
vital, but it remains a  
surprisingly  
understudied  
characteristic. The  
Hungry Mind is a deeply  
researched, highly  
readable exploration of  
what curiosity is, how  
it can be measured, how  
it develops in  
childhood, and how it  
can be fostered in  
school. "Engel draws on

the latest social  
science research and  
incidents from her own  
life to understand why  
curiosity is nearly  
universal in babies,  
pervasive in early  
childhood, and less  
evident in  
school...Engel's most  
important finding is  
that most classroom  
environments discourage  
curiosity...In an era  
that prizes quantifiable  
results, a pedagogy that  
privileges curiosity is  
not likely to be a  
priority." -Glenn C.  
Altschuler, *Psychology  
Today* "Susan Engel's *The  
Hungry Mind*, a book  
which engages in depth  
with how our interest  
and desire to explore  
the world evolves, makes  
a valuable contribution  
not only to the body of  
academic literature on  
the developmental and  
educational psychology  
of children, but also to  
our knowledge on why and  
how we learn." -Inez von

*Course in Nepali* - David Matthews 2013-01-11

Nepali has also been adopted by peoples of the Himalayan region who belong to different linguistic groups, and is now understood throughout the whole of Nepal, the Darjeeling region of West Bengal, Sikkim, Bhutan and parts of Tibet, where it has functioned as a language of trade and commerce for well over two centuries. The aim of this course, which covers the whole grammar and all the constructions of modern

Nepali, is to present a full description of both the spoken and written forms of modern standard Nepali, and to enable the student to understand, speak and read most types of Nepali he or she is likely to encounter. The earlier lessons concentrate mainly on the spoken style, and the conversation passages whilst the later lessons concern religious, political and literary topics. Nepal is a land which already provides great enjoyment to the increasing number of visitors from the west. A knowledge of the language leads to a deeper understanding of the culture of its people, and the object of A Course in Nepali is to provide the means of learning it without much difficulty. Earlier editions of this course have been the standard book for students at the School of Oriental and African Studies, and it is without question the established market leader.

**Achtung-Panzer!** - Heinz

Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war -

has an introduction and extensive background notes by the modern English historian Paul Harris.

**East Asian Literatures** - 2006

This volume discusses the past, present and future perspectives of literature in Japan, China and South Korea and its interface with India. Since this being a largely unexplored area, an attempt has been made to present a true picture of the literature and cultural milieu of the East Asian countries to the readers through well researched, thought-provoking and enlightening papers contributed by eminent scholars from India, Japan, China and Korea.

It is a historical fact that India maintained strong cultural ties with East Asian countries directly or indirectly through religion and culture since ancient times. This cultural bond has become all the more significant and meaningful in this age of information technology and globalization. In this context, literature has a great role to play. To be precise, it is only through literature that this existing bond of cultural affinity among India and East Asian countries could be nurtured and strengthened. This book gives a vivid picture of the state of the past and present literary trends in Japan, China and South Korea, the influence of Indian literary trends and thought on their literatures, and the general perception and assimilation of East Asian literatures in India. This book would be a unique and comprehensive reference

material for teachers, researchers, students, writers, and literary critics of Indian and East Asian literatures.

**Why?** - Mario Livio  
2017-07-11  
Astrophysicist and  
author Mario Livio  
investigates perhaps the  
most human of all our  
characteristics—curiosit  
y—in this “lively,  
expert, and definitely  
not dumbed-down account”  
(Kirkus Reviews) as he

explores our innate  
desire to know why.  
Experiments demonstrate  
that people are more  
distracted when they  
overhear a phone  
conversation—where they  
can know only one side  
of the dialogue—than  
when they overhear two  
people talking and know  
both sides. Why does  
half a conversation make  
us more curious than a  
whole conversation?  
“Have you ever wondered  
why we wonder why? Mario  
Livio has, and he takes  
you on a fascinating  
quest to understand the  
origin and mechanisms of  
our curiosity. I  
thoroughly recommend  
it.” (Adam Riess, Nobel  
Prize Winner in Physics,  
2011). Curiosity is not  
only at the heart of  
mystery and suspense  
novels, it is also  
essential to other  
creative endeavors, from  
painting to sculpture to  
music. It is the  
principal driver of  
basic scientific  
research. Even so, there  
is still no definitive  
scientific consensus  
about why we humans are  
so curious, or about the

mechanisms in our brain that are responsible for curiosity. In the ever-fascinating Why? Livio interviewed scientists in several fields to explore the nature of curiosity. He examined the lives of two of history's most curious geniuses, Leonardo da Vinci and Richard Feynman. He also talked to people with boundless curiosity: a superstar rock guitarist who is also an astrophysicist; an astronaut with degrees in computer science, biology, literature, and medicine. What drives these people to be curious about so many subjects? An astrophysicist who has written about mathematics, biology, and now psychology and neuroscience, Livio has firsthand knowledge of his subject which he explores in a lucid, entertaining way that will captivate anyone who is curious about curiosity.
