**Designing Web Navigation -**

James Kalbach 2007-08-28

Thoroughly rewritten for today's

web environment, this

bestselling book offers a fresh

look at a fundamental topic of

web site development:

navigation design. Amid all the

changes to the Web in the past

decade, and all the hype about

Web 2.0 and various "rich"

interactive technologies, the

basic problems of creating a

good web navigation system

remain. Designing Web Navigation demonstrates that good navigation is not about technology-it's about the ways people find information, and how you guide them. Ideal for beginning to intermediate web designers, managers, other non-designers, and web development pros looking for another perspective, Designing Web Navigation offers basic design principles, development techniques and practical advice, with real-world examples and essential concepts seamlessly folded in. How does your web site serve your business objectives? How does it meet a user's needs? You'll learn that navigation design touches most

other aspects of web site development. This book:  
Provides the foundations of web navigation and offers a framework for navigation design  
Paints a broad picture of web navigation and basic human information behavior  
Demonstrates how navigation reflects brand and affects site credibility  
Helps you understand the problem you're trying to solve before you set out to design  
Thoroughly reviews the mechanisms and different types of navigation  
Explores "information scent" and "information shape"  
Explains "persuasive" architecture and other design concepts  
Covers special contexts, such as

navigation design for web applications Includes an entire chapter on tagging While *Designing Web Navigation* focuses on creating navigation systems for large, information-rich sites serving a business purpose, the principles and techniques in the book also apply to small sites. Well researched and cited, this book serves as an excellent reference on the topic, as well as a superb teaching guide. Each chapter ends with suggested reading and a set of questions that offer exercises for experiencing the concepts in action.
