Close Encounters Of The Fourth Kind - C.D.B. Bryan
2011-11-02

Close Encounters of the Fourth Kind: cases in which

personal contact between an individual or individuals is initiated by the "occupants" of the spacecraft. Such contact may involve the transportation of the individual from his or her terrestrial surroundings into the spacecraft, where the individual is communicated with and/or subjected to an

examination before being returned. One might expect that a “scientific conference” devoted to people who have reported being kidnapped by “little green men” would be dismissed out of hand. But C.D.B. Bryan, the greatly admired journalist and author of *Friendly Fire*, did not dismiss it: the conference was to be held at the Massachusetts Institute of Technology and would have as its chairmen a Pulitzer Prize-winning Harvard psychiatry professor and a professor of physics from M.I.T. Bryan attended the conference throughout its five days. He approached the subject with no prior stand, no agenda, and an open (if slightly skeptical) mind. As the conference progressed, he was astonished by the quality of the stories told by the hundreds of men and women who came forward hesitantly and reluctantly with their utterly amazing—and utterly

convincing—accounts of having been abducted and then examined aboard extraterrestrial spacecraft by spindly limbed, telepathic gray creatures with outsized foreheads dominated by huge, compelling, tear-shaped black eyes. What most astonished Bryan were the similarities found again and again in these accounts and the consistency of their details. It is here that the heart of the mystery lies: as the Harvard professor John E. Mack asked at the conference, “If what the abductees are saying isn’t happening to them, then what is?” This question—and the possible answers—are at the center of this richly explicit, serious, and riveting book. Bryan recreates the conference. He interviews ufology’s most prominent psychiatrists, psychologists, hypnotherapists, researchers, physicists, physicians, and folklorists. He interweaves throughout

the testimony of the abductees themselves, who tell us their stories in chilling detail. He presents, in depth, the Close Encounter experiences of two women whose stories he tells on the basis of both their spontaneous recollections of the events and their memories that were retrieved through sessions of hypnosis of which Bryan himself was a witness. Finally, Bryan examines the current theories—psychological, psychiatric, medical, parapsychological—that have been put forward by the unconvinced to explain the abduction phenomenon. Are the abductees suffering from some sort of false memory syndrome? . . . a multiple or dissociative personality disorder? . . . Are they fantasy-prone? *Close Encounters of the Fourth Kind* is a detailed, objective exploration—the most concrete to date—of one of the enduring and amazing mysteries of our

time. It is a book that will equally fascinate believers and nonbelievers.

Intruders - Budd Hopkins
2021-04-20

First published in 1987, when it spent four weeks on the New York Times Best Seller list, *Intruders* remains one of the most powerful and influential books ever written on the controversial subject of alien abduction. Building on the evidence presented in his seminal 1981 work, *Missing Time*, Budd Hopkins here focuses on the remarkable case of "Kathie Davis," a young woman from rural Indianapolis whose life was changed forever after a shattering, face-to-face encounter one summer night with non-human entities. Little did Kathie know it, but her encounter that night was not by chance; she had not been in the wrong place at the wrong time. Like so many others before and since, Kathie had been selected by an intelligence

that operates beyond the veil of our accepted reality. Its technology challenges our comprehension, its motives are murky. But its interactions with Kathie and others like her have provided consistent clues—even physical evidence—pointing to an agenda relating to evolution and survival ... but of whose species ... theirs, or ours? Such was the popularity of *Intruders* that it was later adapted for television as a CBS miniseries of the same name, starring Richard Crenna and co-written by Tracy Tormé, (*Fire in the Sky*, *Star Trek: The Next Generation*). *Intruders* is a classic in the literature that remains just as relevant today as ever—and just as terrifying.

Experiencer: Raised In Two Worlds: A True Account of Otherworldly Experiences - William J. Konkolesky
2013-03-13

Experiencer: *Raised in Two Worlds* is a deeply personal non-fiction autobiography

by long-time UFO investigator William Konkolesky, reflecting on his multiple childhood experiences of alien abduction. Beginning with a small gray with large black eyes being visiting him in his crib when he was only two years old and steadily increasing in frequency and intensity over the years, Konkolesky's contact experiences left him constantly confused and often terrified. While there are many books that discuss what researchers observe in children abductees, this book is actually what it is like to be one.

The Alien Abduction Files -
Kathleen Marden
2013-05-20

Why would two women separated by thousands of miles share a common thread involving alien abduction? Both cases are supported by multiple witnesses and have substantial evidence. Both women experienced missing time while driving with a

companion, and were later taken from their homes. Both have been unwilling participants in ongoing experimental procedures that appear to follow family genetic lines. Both witnesses have given detailed descriptions of the crafts' interiors and technology, medical procedures, messages from the visitors, and the types of ETs they have encountered, including their society's hierarchical structure. Even more startling, both have independently described finding themselves on identical huge craft, within the same timeframe. The Alien Abduction Files finally reveals: The little-known details of alien experimental procedures The theoretical science that can explain alien technology The messages conveyed by the ETs to abduction experiencers The vulnerabilities and benefits of living life as an abduction experiencer The evidence that these phenomena are

real.

UFOs, ETs, and Alien

Abductions - Donderi PhD, Don Crosbie 2013-06-01
Psychologist and researcher Don Donderi examines the evidence and research from the past several decades on the changing nature of UFOs. He looks at why the scientific establishment takes a dim view of UFOs and abduction evidence and examines how the US government has collected and suppressed UFO evidence. UFOs, ETs, and Alien Abductions is a wide-ranging examination of all things off-planet that falls into 3 sections. 1. UFOs: evidence and belief between 1947 through 1965 and Cold War mysteries 2. The changing nature of UFO phenomenon from 1965 to the present, which makes the case for the existence of humanoid crew members seen in and around landed UFOs. This section also examines six well-documented abduction cases, and includes the author detailing his own research involvement with

the evidence. He refutes the belief that all abductees are mentally disturbed and that a psychological disturbance explains the experience. 3.

The third section is devoted to a very meaty and controversial analysis of science, politics, and UFOs.

The Allagash Abductions

- Raymond E. Fowler 1993

Describes the abduction in 1976 of four men by alien beings.

Witnessed - Budd Hopkins 1997

In *Intruders*, Hopkins focused worldwide attention on a series of alien encounters. This book reveals this unprecedented and amazingly complex case in its entirety. Includes 16-page photo insert.

Sight Unseen - Budd Hopkins 2004

The New York Times bestselling author of "Witnessed" and "Intruders"

returns with astonishing evidence that otherworldly beings are a very real--and growing--part of our earthly lives.

Sight Unseen - Carol Rainey 2003-09-23

The New York Times bestselling author of *Witnessed*, *Intruders*, and *Missing Time* -- three groundbreaking books on the UFO phenomenon -- returns with astonishing evidence that other-worldly beings are a very real -- and growing -- part of our lives.

In *Sight Unseen*, Budd Hopkins and coauthor Carol Rainey show how fascinating discoveries in modern science support the plausibility of the UFO phenomenon. Featuring sixteen never-before-published cases, *Sight Unseen* probes two newly uncovered patterns in alien abduction: cases of UFO "invisibility" and reports of genetically altered alien beings who interact with humans during their routine lives. The "invisibility"

accounts detailed by Hopkins include numerous daylight abductions in densely populated urban areas -- all apparently unseen and accomplished through a technology of invisibility. Two air force non-coms are snatched from the tarmac of a busy military airfield. An Australian family is levitated up into a hovering craft while the father remains paralyzed on the ground with a camera to his eye. The resulting evidence on film is discussed in terms of our own scientific advances. In the second series of cases, abductees report encounters with beings who appear human but apparently possess paranormal powers and stunted emotional ranges. Three young women, unknown to each other, are mysteriously summoned to "job interviews." In ordinary office settings, they encounter human-looking beings who lead them into baffling UFO abduction

experiences. A Wisconsin farmer meets "Damoe," a man with odd behavior who closely resembles his son. Damoe eventually reveals himself as an accomplice of UFO occupants in a startling abduction of the farmer and his wife. Five-year-old Jen is abducted at night to a nearby playground. There she must teach the techniques and skills of "play" to twelve seemingly identical, quasi-human children. Along with these bizarre, first-person stories told by credible people, Hopkins and Rainey explore cutting-edge advances in our own technologies and scientific theories that show how these new UFO patterns could have a concrete basis in contemporary science. Included are an examination of cloaking devices for aircraft, mind-control technologies, and teleportation achieved in the lab. Perhaps the most compelling argument to support these cases lies in

the startling and controversial new science of transgenics that actually allows for the creation of alien/human beings.

Communion - Whitley Strieber 2008-01-02

Thus begins the most astonishing true-life odyssey ever recorded—one man's riveting account of his extraordinary experiences with visitors from “elsewhere” . . . how they found him, where they took him, what they did to him, and why. Believe it. Or don't believe it. But read it—for this gripping story will move you like no other. It will fascinate you, terrify you, and alter the way you experience your world.

Pascagoula - The Story Continues - Calvin Parker 2020-06-19

PASCAGOULA - THE STORY CONTINUES
New Evidence & New Witnesses
BY CALVIN PARKER (FULL COLOR EDITION)
This book is the continuing research into the 'close encounter' event

experienced by Calvin Parker and Charles Hickson on the Pascagoula River, Mississippi on the night of October 11th, 1973. It follows-on from Calvin Parker's first and best-selling book 'Pascagoula - The Closest Encounter'. After the first book was published the research did not stop, in fact it intensified. This book will feature the 'smoking gun' document known as the 'puncture wound' document which was located in the files of APRO. Does this one page type-written document confirm that both Hickson and Parker were 'injected' that night by the creatures that abducted them ? The book also has six transcripts of hypnosis sessions with both Parker and Hickson. The first is Calvin Parker under hypnosis literally just three days after the encounter. The second hypnosis session is with Budd Hopkins in 1993. The third hypnosis session is with Kathleen Marden on

September 14th, 2019.
There are three transcripts of hypnosis sessions with the late Charles Hickson. They are from 1974, 1985 and 1989, the latter two again with Budd Hopkins. If you don't like reading hypnosis transcripts then this book might not be for you. The book also details for the very first time an array of first-hand eyewitnesses to UFOs in and around Pascagoula and elsewhere in Mississippi that night back in 1973. Published here for the first time are details from a first-hand independent eye-witness who was on the opposite side of the river that night. This witness puts his testimony on the record stating that he too saw the 'humanoids' and also witnessed the UFO taking off. Last but not least, the author rounds the book off with an emotional look back at what has happened to him and the official unveiling of an historic marker unveiled by the

Mayor in commemoration of what happened to Charles Hickson and Calvin Parker on October 11th, 1973. Like the previous book this one also utilizes an array of photographs, artwork, news cuttings, UFO magazine articles, letters and documents both old and new. Pascagoula-The Story Continues sheds yet more light onto one of ufology's best document alien abduction accounts. This book also has a foreword by the veteran UK UFO researcher Philip Mantle, and an afterword by US scientist, UFO researcher and author Dr. Irena Scott. This is the full color edition and a black and white version is also available. *Ultraterrestrial Contact* - Philip J. Imbrogno 2010-12-08 Ultraterrestrial Contact investigates the most extreme and bizarre UFO reports—the cases that most UFO investigators are afraid to tackle—and presents a radical new

quantum approach to understanding the contact phenomenon. When Philip Imbrogno collaborated with famed UFO researcher Dr. J. Allen Hynek on *Night Siege*, Dr. Hynek requested that the more sensational cases of "high strangeness"—claims of contact with not only alien intelligence, but also demons, djinn, and otherdimensional beings—remain unpublished. Hynek thought the reports would detract from the credibility of the entire extraterrestrial investigation field. This book reveals, for the first time, the details of these controversial reports and presents Imbrogno's startling scientific conclusions from his thirty years of research into the alien contact phenomenon.

The Resonance of Unseen Things - Susan Lepselter
2016-03-03

The Resonance of Unseen Things offers an ethnographic meditation on the "uncanny" persistence and cultural freight of conspiracy theory. The project is a reading of conspiracy theory as an index of a certain strain of late 20th-century American despondency and malaise, especially as understood by people experiencing downward social mobility. Written by a cultural anthropologist with a literary background, this deeply interdisciplinary book focuses on the enduring American preoccupation with captivity in a rapidly transforming world. Captivity is a trope that appears in both ordinary and fantastic iterations here, and Susan Lepselter shows how multiple troubled histories—of race, class, gender, and power—become compressed into stories of uncanny memory. "We really don't have anything like this in terms of a

focused, sympathetic, open-minded ethnographic study of UFO experiencers. . . .

The author's semiotic approach to the paranormal is immensely productive, positive, and, above all, resonant with what actually happens in history."

—Jeffrey J. Kripal, J. Newton Rayzor Professor of Religion, Rice University
"Lepseter relates a weave of intimate alien sensibilities in out-of-the-way places which are surprisingly, profoundly, close to home. Readers can expect to share her experience of contact with complex logics of feeling, and to do so in a contemporary America they may have thought they understood." —Debbora Battaglia, Mount Holyoke College
"An original and beautifully written study of contemporary American cultural poetics. . . . The book convincingly brings into relief the anxieties of those at the margins of American economic and

civic life, their perceptions of state power, and the narrative continuities that bond them to histories of violence and expansion in the American West."

—Deirdre de la Cruz, University of Michigan
They Know Us Better Than We Know Ourselves - Bridget Brown 2007-08-01
Since its emergence in the 1960s, belief in alien abduction has saturated popular culture, with the ubiquitous image of the almond-eyed alien appearing on everything from bumper stickers to bars of soap. Drawing on interviews with alleged abductees from the New York area, Bridget Brown suggests a new way for people to think about the alien phenomenon, one that is concerned not with establishing whether aliens actually exist, but with understanding what belief in aliens in America may tell us about our changing understanding of ourselves and our place in the world.

They Know Us Better Than We Know Ourselves looks at how the belief in abduction by extraterrestrials is constituted by and through popular discourse and the images provided by print, film, and television. Brown contends that the abduction phenomenon is symptomatic of a period during which people have come to feel increasingly divested of the ability to know what is real or true about themselves and the world in which they live. The alien abduction phenomenon helps us think about how people who feel left out create their own stories and fashion truths that square with their own experience of the world.

Missing Time - Budd

Hopkins 1988

The arrival of extraterrestrial visitors is one of the most momentous events of our time. In *Intruders* Budd Hopkins explored the shocking truth about the contact between earthling and alien: that human beings are

temporarily abducted and taken aboard UFOs. But Hopkins could not have told the stories of those victims without first having discovered the one experience common to all who report alien encounters -- the phenomenon known as "missing time." Missing time tells how the people who have experienced abductions retained no memory of them -- all traces of the trauma were effectively erased from their memory. Yet, under hypnosis, many abductees were able to recall in vivid, convincing detail, the harrowing experiments that left mysterious scars on their bodies, the eerie interiors of UFOs where they were held captive, and the astonishing faces of their alien hosts. The stories of seven victims of these otherworldly intruders are told here -- in detail at once dispassionate and dramatic, fully supported by scientific documentation. They are stories that could belong to

anyone: your neighbors, your loved ones, even you.

Aliens - Judith Herbst

2005-01-01

Investigates several well-known accounts of alien abduction as well as theories aimed at explaining why such reports cannot be true.

Extraordinary Contact -

Debra Jordan-Kauble

2021-06-22

Debra Jordan-Kauble is an "ordinary" woman with a habit of attracting the extraordinary. After reporting a terrifying anomalous experience to Budd Hopkins-pioneering researcher of alien abduction phenomena-Debra's life takes a dramatic turn as she becomes the central figure in Hopkins' best-selling book, *Intruders*, and in its popular TV adaptation. But while the TV series ended with a clear resolution, Debra's astonishing story continued in real life. In *Extraordinary Contact*, Debra shares with the

reader her close-up and personal experiences with UFOs, poltergeists, the afterlife, Electronic Voice Phenomena, premonitions, synchronicities, and non-human entities. Such phenomena are woven throughout the vivid tapestry of Debra's life-flourishes of the anomalous, offset against an everyday backdrop of factory work, family and friends.

Spanning four decades, *Extraordinary Contact* is a story of resilience and growth in the face of trauma, tragedy and loss, and an intimate, first-person account of what it means to be a lifelong experiencer of "impossible" phenomena.

Making Contact - Kathleen Marden 2014-12-15

Although often dismissed as the stuff of tabloids, there are those who maintain that alien abduction is a real danger that many on Earth have already faced. In this volume, two dedicated UFO researchers partner up to present the mysterious alien

encounters experienced by their families and others like them, pointing to gaps in government reporting and highlighting as yet unexplained phenomena related to their experiences. The authors encourage readers to keep an open mind as they seek to dispel the skepticism and stigma surrounding the reporting of such incidences while encouraging others to share their stories.

UFOs Over Canada - John Robert Colombo 1996-08-08
UFOs Over Canada presents in highly readable style sixty eye-witness accounts of UFO activity over Canada. For the first time, in one book, contributors from across the country recount their personal experiences in their own words.

Secret Life - David M. Jacobs 1993-04-16
In *Secret Life*, Professor David M. Jacobs of Temple University takes us into the private world of those abducted by aliens, letting

them describe in their own words what it is like to be abducted. Based on interviews with sixty individuals and more than 300 independently corroborated accounts, *Secret Life* presents the most complete and accurate picture of alien abductions ever compiled. Dr. Jacobs takes the reader on a minute-by-minute journey through a typical abduction experience and describes in detail the bizarre physical, mental and reproductive procedures that abductees claim have been administered by small alien beings. Jacobs draws from these interviews a profoundly unsettling reason behind the abductions: aliens are conducting a complex reproductive experiment involving the conception, gestation, or incubation of human and alien hybrid beings.

Alien Encounters - Patricia D. Netzley 2011-08
For decades, people

throughout the world have reported encounters with what they believe are extraterrestrials. This title explores the nature of such encounters and objectively examines the most prevalent theories regarding alien experiences, including those related to space exploration, time travel, alternate dimensions, and the workings of the human mind.

Interdimensional Universe - Philip J.

Imbrogno 2013-02-08

Over the course of his thirty years of investigation into UFOs, including his own field research, photographic evidence, and meticulously compiled case studies, Philip Imbrogno has provided fascinating new insight into paranormal phenomena. In this book, he reveals for the first time the detailed findings of prominent paranormal experts as well as his own firsthand experiences. Using the latest quantum theories, Imbrogno sheds new light on classic UFO cases, government cover-ups, and the hidden connections between UFOs and other unexplained phenomena—from crop circles and animal mutilations to angels and jinn (or genies). Imbrogno's insider knowledge spans the very early UFO reports to present-day sightings. He personally investigated four of the best-known UFO flaps

of the modern era—Hudson Valley, Phoenix lights, the Belgium sightings, and the Gulf Breeze Florida sightings—and shares information never released before, including photographic evidence that something very unusual is taking place on planet Earth.

Missing Time: Startling Revelations about Alien-Human Contact - Budd Hopkins 1981-06

In "Intruders," Budd Hopkins explored the shocking truth that human beings are temporarily abducted and taken aboard UFOs. But Hopkins could not have told the stories of those victims without first having discovered the one experience common to all who report "alien" encounters - the phenomenon known as "missing time." "Missing Time" tells how the people who have experienced abductions retained no memory of them; all traces of the trauma were

Yet, under hypnosis, many abductees were able to recall in vivid, convincing detail, the eerie interiors of UFOs where they were held captive, the astonishing faces of their alien hosts, and the harrowing experiments that left mysterious scars on their bodies. Hopkins, with the help of psychologist Aphrodite Clamar and other doctors, has investigated 19 cases of UFO abductions over the past five years. The stories of seven victims of these otherworldly intruders are told here, fully supported by scientific documentation. They are stories that could belong to anyone: your neighbors, your loved ones, or even you.

The Threat - David M. Jacobs 2012-12-11

After fifty years of widespread speculation about UFOs and abductions by aliens, a distinguished historian and UFO researcher presents the

first evidence-based explanation of alien intentions. Based on over thirty years of personal research, Professor Jacobs exposes the aliens' profoundly alarming agenda: to create a breed of alien-human 'hybrids' who will eventually colonise - and control - Earth. He explains why aliens are here, what they want and why their agenda has been kept secret. In doing so he presents a disturbing picture of a profoundly changed future in which humans will be relegated to inferior status. This incredible story is all the more remarkable because every account of an alien abduction is thoroughly documented and is corroborated by independent testimony. This book answers in astonishing depth some of the most important questions about the UFO phenomenon that researchers have been asking since the beginning of the controversy.

Tracking Alien Encounters - Jenna Vale 2018-12-15
Readers will be fascinated by this book containing some of the most famous reported encounters with extraterrestrials to date. They will discover Grays, haunting eyewitness accounts, and some of the most well-known names in the investigation of alien life on Earth. Examples of relevant technology are also covered, such as satellites that detect fast radio bursts in space that may indicate the possibility of intelligent life beyond our solar system. This volume also encourages critical thinking skills with the Debunk It! sidebar, inspiring readers to embrace these accounts with open minds but to also come to their own conclusions using the evidence available. A chapter on the prevalence of extraterrestrials in pop culture rounds out this captivating text.
The Believer - Ralph Blumenthal 2021-03-15

The Believer is the weird and chilling true story of Dr. John Mack. This eminent Harvard psychiatrist and Pulitzer Prize-winning biographer risked his career to investigate the phenomenon of human encounters with aliens and to give credibility to the stupefying tales shared by people who were utterly convinced they had happened. Nothing in Mack's four decades of psychiatry had prepared him for the otherworldly accounts of a cross-section of humanity including young children who reported being taken against their wills by alien beings. Over the course of his career his interest in alien abduction grew from curiosity to wonder, ultimately developing into a limitless, unwavering passion. Based on exclusive access to Mack's archives, journals, and psychiatric notes and

interviews with his family and closest associates, The Believer reveals the life and work of a man who explored the deepest of scientific conundrums and further leads us to the hidden dimensions and alternate realities that captivated Mack until the end of his life.

Abductions and Aliens -

Chris A. Rutkowski 1999-09

Based on almost 25 years of investigation and research, science writer Chris Rutkowski looks critically at abduction stories.
