**Integrative Wellness
Coaching** - Laurel Alexander
2022-09-21

By presenting a holistic and
integrated health and wellbeing

approach to personalised care
through wellness coaching, this
handbook provides theory,
insights, best practice, case
studies and CPD activities in
order to deepen practitioners'
knowledge and experience.
Integrative wellness is about
working in collaboration and is
a partnership between the
professional and the patient

with the latter understanding that they can take as much control as is possible for their own health and wellbeing. This book helps form this collaboration by exploring the co-creation of personalised care plans, effective coaching skills and cognitive-behavioural interventions including motivational coaching for patient activation, as well as flexible ways to provide wellness coaching. Exploring how the mind-body connection can improve the patient's journey, *Integrative Wellness Coaching* is an invaluable guide for any healthcare practitioner who wants to embrace their patients' lifestyle choices and mindsets towards their own health.

Interacting with Presence -

Giuseppe Riva 2014-10-08

The experience of using and interacting with the newest Virtual Reality and computing technologies is profoundly affected by the extent to which we feel ourselves to be really 'present' in computer-generated and -mediated augmented worlds. This feeling

of 'Presence', of "being inside the mediated world", is key to understanding developments in applications such as interactive entertainment, gaming, psychotherapy, education, scientific visualisation, sports training and rehabilitation, and many more. This edited volume, featuring contributions from internationally renowned scholars, provides a comprehensive introduction to and overview of the topic of mediated presence - or 'tele-presence' - and of the emerging field of presence research. It is intended for researchers and graduate students in human-computer interaction, cognitive science, psychology, cyberpsychology and computer science, as well as for experienced professionals from the ICT industry. The editors are all well-known professional researchers in the field: Professor Giuseppe Riva from the Catholic University of Milan, Italy; Professor John Waterworth from Umeå University, Sweden; Dianne Murray, an HCI Consultant and editor of the journal "Interacting with

Computers”.

Intrinsic Motivation - Edward L. Deci 2012-12-06

As I begin to write this Preface, I feel a rush of excitement. I have now finished the book; my gestalt is coming into completion. Throughout the months that I have been writing this, I have, indeed, been intrinsically motivated. Now that it is finished I feel quite competent and self-determining (see Chapter 2). Whether or not those who read the book will perceive me that way is also a concern of mine (an extrinsic one), but it is a wholly separate issue from the intrinsic rewards I have been experiencing. This book presents a theoretical perspective. It reviews an enormous amount of research which establishes unequivocally that intrinsic motivation exists. Also considered herein are various approaches to the conceptualizing of intrinsic motivation. The book concentrates on the approach which has developed out of the work of Robert White (1959), namely, that intrinsically motivated behaviors are ones

which a person engages in so that he may feel competent and self-determining in relation to his environment. The book then considers the development of intrinsic motivation, how behaviors are motivated intrinsically, how they relate to and how intrinsic motivation is extrinsically motivated behaviors, affected by extrinsic rewards and controls. It also considers how changes in intrinsic motivation relate to changes in attitudes, how people attribute motivation to each other, how the attribution process is motivated, and how the process of perceiving motivation (and other internal states) in oneself relates to perceiving them in others.

Best Practices in Data Cleaning - Jason W. Osborne 2013

Many researchers jump straight from data collection to data analysis without realizing how analyses and hypothesis tests can go profoundly wrong without clean data. This book provides a clear, step-by-step process of examining and cleaning data in order to

decrease error rates and increase both the power and replicability of results. Jason W. Osborne, author of *Best Practices in Quantitative Methods* (SAGE, 2008) provides easily-implemented suggestions that are research-based and will motivate change in practice by empirically demonstrating, for each topic, the benefits of following best practices and the potential consequences of not following these guidelines. If your goal is to do the best research you can do, draw conclusions that are most likely to be accurate representations of the population(s) you wish to speak about, and report results that are most likely to be replicated by other researchers, then this basic guidebook will be indispensable.

Worst Diet Ever - Yoram Solomon, Ph.D. 2014-08-25
The reason you couldn't lose weight until now was that the present value of your long term health is lower than the effort required to lose weight. In simple words: it's just too hard. There is no silver bullet that will

reduce the effort. You know what you need to do to lose weight. The problem is that you lack motivation. The author of this book is not an expert on nutrition or physical training, but he is a researcher of motivation. He shows how to add external motivation enough to expend the effort required for losing weight, and how to turn that effort into habit such that you can sustain it for the rest of your life, eliminating the need for the external motivation. The book is built upon numerous models and research in health, psychology, and economics, and told through the author's personal journey, through the stories of Alex, Valerie, Matthew, Don, Beth, and Joe, and through a survey of 222 participants.

About Face - Alan Cooper 2014-09-02

The essential interaction design guide, fully revised and updated for the mobile age About Face: The Essentials of Interaction Design, Fourth Edition is the latest update to the book that shaped and evolved the landscape of interaction design. This comprehensive guide takes the worldwide shift to smartphones and tablets into account. New information includes discussions on mobile apps, touch interfaces, screen size considerations, and more. The new full-color interior and unique layout better illustrate modern design concepts. The interaction design profession is blooming with the success of design-intensive companies,

priming customers to expect "design" as a critical ingredient of marketplace success. Consumers have little tolerance for websites, apps, and devices that don't live up to their expectations, and the responding shift in business philosophy has become widespread. About Face is the book that brought interaction design out of the research labs and into the everyday lexicon, and the updated Fourth Edition continues to lead the way with ideas and methods relevant to today's design practitioners and developers. Updated information includes: Contemporary interface, interaction, and product design methods Design for mobile platforms and consumer electronics State-of-the-art interface recommendations and up-to-date examples Updated Goal-Directed Design methodology Designers and developers looking to remain relevant through the current shift in consumer technology habits will find About Face to be a comprehensive, essential resource.

Stigma and Group Inequality - Shana Levin

2006-08-15

This book provides a snapshot of the latest theoretical and empirical work on social psychological approaches to stigma and group inequality. It focuses on the perspective of the stigmatized groups and discusses the effects of the stigma on the individual, the interacting partners, the groups to which they belong, and the relations between the groups. Broken into three major sections, *Stigma and Group Inequality*: *discusses the tradeoffs that stigmatized individuals must contend with as they weigh the benefits derived from a particular response to stigma against the costs associated with it; *explores the ways in which environments can threaten one's intellectual performance, sense of belonging, and self concept; and *argues that the experience of possessing a stigmatized identity is shaped by social interactions with others in the stigmatized group as well as members of other groups. *Stigma and Group Inequality* is a valuable

resource for students and scholars in the fields of psychology, sociology, social work, anthropology, communication, public policy, and political science, particularly for courses on stigma, prejudice, and intergroup relations. The book is also accessible to teachers, administrators, community leaders, and concerned citizens who are trying to understand and improve the plight of stigmatized individuals in school, at work, at home, in the community, and in society at large.

Autism in the Workplace - Amy E. Hurley-Hanson 2019-11-15

This book explores the career experiences of Generation A, the half-million individuals with autism spectrum disorder (ASD) who will reach adulthood in the next decade. With Generation A eligible to enter the workforce in unprecedented numbers, research is needed to help individuals, organizations, and educational institutions to work together to create successful work experiences and career outcomes for individuals with

ASD. Issues surrounding ASD in the workplace are discussed from individual, organizational, and societal perspectives. This book also examines the stigma of autism and how it may affect the employment and career experiences of individuals with ASD. This timely book provides researchers, practitioners, and employers with empirical data that examines the work and career experiences of individuals with ASD. It offers a framework for organizations committed to hiring individuals with ASD and enhancing their work experiences and career outcomes now and in the future.

Understanding Motivation and Emotion - Johnmarshall Reeve 2018-01-18

The past ten years have seen an explosion of useful research surrounding human motivation and emotion; new insights allow researchers to answer the perennial questions, including "What do people want?" and "Why do they want what they want?" By delving into the roots of motivation, the emotional processes at work, and the

impacts on learning, performance, and well-being, this book provides a toolbox of practical interventions and approaches for use in a wide variety of settings. In the midst of the field's "golden age," there has never been a better time to merge new understanding and practical application to improve people's lives. Useful in schools, the workplace, clinical settings, health care, sports, industry, business, and even interpersonal relationships, these concepts are profoundly powerful; incorporated into the state-of-the-art intervention programs detailed here, they can enhance people's motivation, emotion, and outlook while answering the core questions of any human interaction.

Motivation and Emotion -

Denys DeCatanzaro 1998

This unique book provides a comprehensive study of emotion within a modern evolutionary perspective.

Motivation and emotion are presented within an integrated approach that assumes

biological and psychological causes, including evolution, neuroscience, endocrinology, human development, and culture. *Motivation and Emotion* Presents a wealth of modern evidence integrating neuroscience and endocrinology into the study of motivation and emotion. The book provides a variety of photographs of facial expressions showing emotions from people of diverse cultures as well as nonhuman primates. It also discusses modern interactive explanations for specific behaviors, rather than dull, historical perspectives. For example, human affect is explained as a response to social events and stress, resulting in psychophysiological consequences. An essential reference for any professional in sociology or psychology.

Health Communication -

Renata Schiavo 2011-01-11

Health Communication: From Theory to Practice is a much needed resource for the fast-growing field of health communication. It combines a comprehensive introduction to

current issues, theories, and special topics in health communication with a hands-on guide to program development and implementation. While the book is designed for students, professionals and organizations with no significant field experience, it also includes advanced topics for health communication practitioners, public health experts, researchers, and health care providers with an interest in this field.

Teaching and Researching:

Motivation - Zoltán Dörnyei
2013-11-26

Cultivating motivation is crucial to a language learner's success - and therefore crucial for the language teacher and researcher to understand. This fully revised edition of a groundbreaking work reflects the dramatic changes the field of motivation research has undergone in recent years, including the impact of language globalisation and various dynamic and relational research methodologies, and offers ways in which this research can be put to practical

use in the classroom and in research. Key new features and material:

- A brand new chapter on current socio-dynamic and complex systems perspectives
- New approaches to motivating students based on the L2 Motivational Self System
- Illustrative summaries of qualitative and mixed methods studies
- Samples of new self-related motivation measures

Providing a clear and comprehensive theory-driven account of motivation, *Teaching and Researching Motivation* examines how theoretical insights can be used in everyday teaching practice, and offers practical tips. The final section provides a range of useful resources, including relevant websites, key reference works and tried and tested example questionnaires. Written in an accessible style and illustrated with concrete examples, it is an invaluable resource for teachers and researchers alike.

2014-01-28

Social Beings: Core Motives in Social Psychology, 3rd Edition

provides psychologists with a cutting-edge approach on evolutionary and cross-cultural psychology. The book addresses research on three different levels: brain function and cognition, individual and situations, and groups and cultures. The second edition has been updated to present contemporary research in social psychology. It also discusses increasingly important issues in the field including emotion science and the impact of neuroscience on social and personality psychology. The Third Edition retains the previous editions' features and adds the most up-to-date literature.

Handbook of Adult Development and Learning - Carol Hoare 2006

The Intersection of Adult Development and Learning is the first handbook to explore the ways in which adult roles, functions, interests, motivations, and contexts lead to synchronous development and learning. The chapters in this volume, written by leaders in their respective areas,

elaborate on topics that show the interplay between adult development and learning. As the chapter contributors ably demonstrate, it is now abundantly clear that adult learning and development reinforce each other.

Poor Economics - Abhijit Banerjee 2012-03-27

The winners of the Nobel Prize in Economics upend the most common assumptions about how economics works in this gripping and disruptive portrait of how poor people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In *Poor Economics*, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions based on years of field research from around the world. Called "marvelous, rewarding" by the *Wall Street Journal*, the book offers a radical rethinking of the economics of poverty and an intimate view of life on 99 cents a day. *Poor Economics* shows that creating a world without poverty begins with

understanding the daily decisions facing the poor.

Social Identities and Multiple Selves in Foreign Language Education - Damian J. Rivers
2013-07-18

Within foreign language education contexts across the globe, inadequate attention has been paid to documenting the dynamics of identity development, negotiation and management. This book looks at these dynamics in specific relation to otherness, in addition to attitudinal and

behavioural overtones created through use of the term 'foreign' (despite its position as an integral marker in language acquisition discourse). This book argues that individual identities are multidimensional constructs that gravitate around a hub of intricate social networks of multimodal intergroup interaction. The chapters pursue a collective desire to move the notion of identity away from theoretical abstraction and toward the lived experiences of foreign language teachers and students. While the identities entangled with these interactions owe a significant measure of their existence to the immediate social context, they can also be actively developed by their holders. The collection of chapters within this book demonstrate how foreign language education environments (traditional and non-traditional) are ideal locations for the development of a sophisticated repertoire of discursive strategies used in the formulation, navigation, expression and management of

social identities and multiple selves.

Dimensions of Human Behavior

- Elizabeth D. Hutchison

2018-07-26

Dimensions of Human Behavior:

Person and Environment

presents a current and comprehensive examination of human behavior using a multidimensional framework.

Author Elizabeth D. Hutchison explores the biological dimension and the social factors that affect human development and behavior, encouraging readers to connect their own personal experiences with social trends in order to recognize the unity of person and environment. Aligned with the 2015 curriculum guidelines set forth by the Council on Social Work Education (CSWE), the substantially updated Sixth Edition includes a greater emphasis on culture and diversity, immigration, neuroscience, and the impact of technology. Twelve new case studies illustrate a balanced breadth and depth of coverage to help readers apply theory and general social work

knowledge to unique practice situations.

Working Together - Pat

Dudgeon 2014

This resource is written for health professionals working with Aboriginal and Torres Strait Islander people experiencing social and emotional wellbeing issues and mental health conditions. It provides information on the issues influencing mental health, good mental health practice, and strategies for working with specific groups. Over half of the authors in this second edition are Indigenous people themselves, reflecting the growing number of Aboriginal and Torres Strait Islander experts who are writing and adding to the body of knowledge around mental health and associated areas.

Cognition and Emotion - Eric

Eich Professor of Psychology
University of British Columbia
2000-07-28

Recent years have witnessed a revival of research in the interplay between cognition and emotion. The reasons for this renaissance are many and

varied. In the first place, emotion theorists have come to recognize the pivotal role of cognitive factors in virtually all aspects of the emotion process, and to rely on basic cognitive factors and insight in creating new models of affective space. Also, the successful application of cognitive therapies to affective disorders has prompted clinical psychologists to work towards a clearer understanding of the connections between cognitive processes and emotional problems. And whereas the cognitive revolutionaries of the 1960s regarded emotions with suspicion, viewing them as nagging sources of "hot" noise in an otherwise cool, rational, and computer-like system of information processing, cognitive researchers of the 1990s regard emotions with respect, owing to their potent and predictable effects on tasks as diverse as object perception, episodic recall, and risk assessment. These intersecting lines of interest have made cognition and emotion one of the most active and rapidly

developing areas within psychological science. Written in debate format, this book covers developing fields such as social cognition, as well as classic areas such as memory, learning, perception and categorization. The links between emotion and memory, learning, perception, categorization, social judgements, and behavior are addressed. Contributors come from the U.S., Canada, Australia, and France.

Understanding Motivation and Emotion - Johnmarshall Reeve
2005

This work focuses on human needs and illustrates how to apply motivational principles. A strong humanistic orientation with balanced coverage of behavioral, cognitive and physiological approaches is presented in the text.

Handbook of Cognition and Emotion - Michael D. Robinson
2013-04-03

Comprehensively examining the relationship between cognition and emotion, this authoritative handbook brings together leading investigators

from multiple psychological subdisciplines. Biological underpinnings of the cognition-emotion interface are reviewed, including the role of neurotransmitters and hormones. Contributors explore how key cognitive processes--such as attention, learning, and memory--shape emotional phenomena, and vice versa. Individual differences in areas where cognition and emotion interact--such as agreeableness and emotional intelligence--are addressed. The volume also analyzes the roles of cognition and emotion in anxiety, depression, borderline personality disorder, and other psychological disorders.

Motivation and Learning Strategies for College Success

- Myron H. Dembo
2004-03-05

A motivation and learning strategies textbook that bridges research and practice!

Motivation and Learning Strategies for College Success, Second Edition teaches college students how to become more self-directed learners. Study skills are treated as a serious academic course. Students learn about human motivation and learning as they improve their study skills. The text does not offer "recipes" for success

or lists of "quick tips." Rather, the focus is on relevant information and features designed to help students to identify the components of academic learning that contribute to high achievement, to master and practice effective learning and study strategies, and then to complete self-management studies whereby they are taught a process for improving their academic behavior. A framework organized around six components related to academic success (motivation, methods of learning, time management, control of the physical and social environment, and performance) makes it easy for students to understand what they need to do to become more successful in the classroom. The text combines an overview of theory

and research, to help learners understand what factors determine or influence successful learning and why they are asked to use different study and learning strategies in the text, with field-tested exercises, follow-up activities, and appendices that assist students in observing and changing their own behavior. A separate Instructor's Manual provides helpful information for teaching the material; includes additional exercises and experiences for students; provides both objective and essay test questions; and includes information on how students can maintain a portfolio to demonstrate their acquisition of learning and study skills and guidelines for helping students complete a self-management study of their own behavior.
