Wong's Nursing Care of Infants and Children - E-Book -

Marilyn J. Hockenberry 2022-12-23

Provide quality nursing care through each stage of child development! Wong's Nursing Care of Infants and Children, 12th Edition uses an easy-to-follow, family-centered approach to describe the care of children at each age and stage of development. The book begins with a discussion of the influences on and assessment of child health, then provides chapters on child health promotion and health problems — all organized by age groups and body systems. Up-to-date, evidence-based information helps you develop critical thinking skills along with the sensitivity needed to become a compassionate, caring pediatric nurse. Written by a team of experts led by Marilyn J. Hockenberry, Wong's continues to be the leading text in pediatric nursing. Focus on family-centered care emphasizes the role and influence of the family in child health and illness with a

separate chapter and Family-Centered Care boxes. Full-color drawings and photographs reflect the latest in nursing care. Nursing Care Guidelines boxes offer clear, step-by-step instructions for interventions in a variety of situations and conditions, and Nursing Care Plan boxes included expected patient outcomes and rationales for nursing interventions. Nursing Tips include helpful hints and practical, clinical information. Translating Evidence into Practice and Applying Evidence to Practice boxes help you apply research to improve the outcomes of nursing care. Atraumatic Care boxes contain techniques for care that manage pain, discomfort, or stress, along with approaches to promote self-esteem and prevent embarrassment. Emergency Treatment boxes serve as a quick reference for interventions in critical situations. Cultural Considerations and Cultural

Competence content provides tips from clinical experts. Community and Home Health Considerations boxes address issues such as increasing immunization rates, decreasing smoking among teens, and preventing lead poisoning. Drug Alerts highlight important drug-related information for safe, appropriate care. Nursing Alerts call out critical considerations such as key assessment data, risk factors, and danger signs that must be considered in providing care. Research Focus boxes emphasize research with concise reviews of important evidence.

Virtual Clinical Excursions--
pediatrics - David Wilson 2008

One of the most complete nursing education learning systems available, Virtual Clinical Excursions guides you through a virtual hospital setting where the patients are real and their conditions are constantly

changing. By immersing yourself in a realistic, yet safe, nursing environment, VCE allows you to get acclimated to the routine and rigors of the average clinical rotation where you can conduct a complete assessment of a patient and set priorities for care, collect data, analyze and interpret data, prepare and administer medications, and reach conclusions about complex problems. Each lesson has a textbook reading assignment and activities based on "visiting" the patients in the hospital, which provide a perfect environment in which you may "practice" what you are learning. The CD-ROM uses streaming videos to represent patients just as you would see them in a hospital setting and gives you access to highly detailed patient records - including charts, medication administration records, a Kardex-type plan of care, a drug guide, and an extensive electronic patient record system that has

data for each client from the time of their admission throughout their simulation. Promotes active learning as you collect information and process data for evidence-based patient care. Includes five unique patients/cases, each with complex medical conditions. Allows you to monitor and care for one or more patients during four, 45-minute periods of care within a 12-hour shift. Workbook lessons complement the content of the textbook and link reading assignments with patients in the virtual hospital. Online workbook lessons allow you to complete assignments online. Exposes you to realistic information resources, such as the EPR, MAR, and patient charts, to prepare you for managing data and decision-making on the floor. A Medication Room contains a wide variety of drug storage areas. A medication administration function allows you to select, prepare, and administer

medications. Contains over 55 common medication errors embedded within the software to boost clinical realism and reinforce the precepts of safe medication administration in a harm-free environment. Includes a Drug Guide with drug monographs for all medications used within the program. Fully integrates psychosocial aspects of nursing through nurse-client interaction videos that underscore the psychosocial component of patient care. Clinical Alerts highlight major changes in each patient's condition. An Online Testing Program with over 250 NCLEX(R) exam-style questions on each patient/case allows you to measure your understanding of the content and access your relevant clinical judgment.

Wong's Nursing Care of Infants and Children - Marilyn J. Hockenberry 2018-10

Wong's Nursing Care of Infants and Children - E-Book

Wong's Essentials of Pediatric Nursing - E-Book - Marilyn J. Hockenberry 2021-03-05

As the #1 title in the pediatric nursing market for over 40 years, Wong's Essentials of Pediatric Nursing, 11th Edition continues to leverage its trademark developmental approach as it equips readers with the very latest research and guidelines for treating children today. The text utilizes a highly-readable writing style and encourages a whole-body approach — beginning with child development and health promotion to better understand the later chapters on specific health problems. This new eleventh edition also features Next Generation NCLEX®-style case studies and questions, a new chapter covering all systems cancers, additional case studies within the nursing care plans, and updated and expanded evidence-based content throughout to best reflect the latest standards and trends impacting pediatric nursing care today. Developmental approach clearly identifies developmental

tasks and influences at each stage of a child's growth. Emphasis on wellness features health promotion chapters for each developmental stage of childhood. Critical thinking case studies with answers are found throughout the text. Quality patient outcomes are highlighted within nursing management discussions for major diseases and disorders. Drug alerts draw attention to potential safety issues, reflecting QSEN safety initiative. Family focus includes a separate family chapter as well as family content and Family-Centered Care boxes integrated throughout the text. Community Focus boxes provide resources and guidance on caring for children outside the clinical setting. Evidence-Based Practice boxes focus attention on the application of research and critical thought processes to support and guide the outcomes of nursing care. Chapter on complementary & alternative therapy cover timely topics to aid

in providing complete, comprehensive care. Nursing care plans provide a model for planning patient care and include rationales that provide the "why." Research Focus boxes highlight current studies that impact pediatric nursing today. Cultural content and Cultural Considerations boxes are integrated throughout the text to draw attention to customs and beliefs of different cultures that influence childcare. Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress. Nursing tips offer helpful hints and practical, clinical information of a non-emergency nature. Nursing alerts feature critical information that **MUST BE** considered in providing care. Emergency Treatment sections provide a quick reference in critical situations. Nursing care guidelines provide clear, step-by-step instructions for performing specific skills or procedures.

Virtual Clinical Excursions -

Pediatrics - Marilyn J.

Hockenberry 2006-11-13

This innovative workbook/CD-ROM package helps bridge the gap between the classroom and the real world by teaching students about clinical settings and critical thinking before they actually start clinical rotations - making the transition from nursing student to caregiver a smoother process. A guided learning experience, VCE features textbook reading assignments that correspond with the CD-ROM and workbook activities. The workbook acts as a map, guiding students through the CD-ROM as they care for patients in the virtual hospital, making connections between what they experience in the

virtual hospital and what they learn in the textbook.

Throughout each lesson, students access realistic information resources essential to patient care, resulting in a true-to-life, hands-on learning experience. Promotes active learning as students identify information to collect and process data for evidence-based patient care. Exposes students to realistic information resources - such as the EPR, MAR, and extensive Charts - to prepare them for data management and decision-making on the floor. Improves core computing skills as students access and evaluate the diverse hospital databases. Reinforces the precepts of safe medication administration as students select, prepare, and administer medications in a harm-free environment. Augments knowledge of physical assessment by allowing students to examine and record vital signs, head & neck, chest, back & spine, upper

extremities, abdomen, pelvic, and lower extremities. Fully integrates the psychosocial aspect of nursing through nurse-client interaction videos, underscoring the psychosocial component of patient care. Includes over 250 NCLEX® examination-style questions that offer built-in testing of clinical knowledge. New flash-based technology allows more ease of use, featuring seamless one-click navigation, no plug-ins, and automatic installations. The cases in VCE are all new along with new patient data in the Electronic Patient Record, Patient Charts, KARDEX, and Medication Administration Record. A new medication room simulates what students will encounter in practice or in a real clinical setting. Over 55 embedded medication administration errors force students to think critically about safe medication practices and follow safe medication standards. Students can now sign

in for multiple patients as a nurse would in practice. A new Medication Scorecard provides instant feedback on correctly and incorrectly administered medications. A new Examination Report checklist tracks performance on baseline and focused assessments. Students now have the ability to "take a break" - leaving the software at anytime and picking up where they left off without losing any information. New workbook icons for time show approximately how long it will take to complete a particular exercise. Workbook icons for linked activities indicate that a particular exercise is linked to another exercise and cannot be completed independently.
