Love, Theodosia - Lori Anne Goldstein 2021-11-02

A Romeo & Juliet tale for Hamilton! fans. In post-American Revolution New York City, Theodosia Burr, a scholar with the skills of a socialite, is all about charming the right people on behalf of her father—Senator Aaron Burr, who is determined to win the office of president in the pivotal election of 1800. Meanwhile, Philip Hamilton, the rakish son of Alexander Hamilton, is all about being charming on behalf of his libido. When the two first meet, it seems the ongoing feud between their politically opposed fathers may be hereditary. But soon, Theodosia and Philip must choose between love and family, desire and loyalty, and preserving the legacy their flawed fathers fought for or creating their own. Love, Theodosia is a smart, funny, swoony take on a fiercely intelligent woman with feminist ideas ahead of her time who has long-deserved center stage. A refreshing spin on the Hamiltonian era and the characters we have grown to know and love. It's also a heartbreaking romance of two star-crossed lovers, an achingly bittersweet "what if." Despite their fathers' bitter rivalry, Theodosia and Philip are drawn to each other and, in what unrolls like a Jane Austen novel of manners, we find ourselves entangled in the world of Hamilton and Burr once again as these heirs of famous enemies are driven together despite every reason not to be.

New Generation of Electric Vehicles - Johanna Adison 2016-10-01

There is an unprecedented surge of interest in and the desire of producing gaselectric hybrid (HEVs) and all-electric vehicles (EVs) by the governments and public in the industrialized countries. This surge of interest and desire is attributed to several factors relating to the life-threatening air pollution in many parts of the world, the high petroleum price, conflicts in oil producing Middle East regions and the alarming trend of global warming due to rapid increase of greenhouse gas emissions by all sources, including those from transportation. Full electric vehicles use no gasoline; they are powered by a high-voltage electric motor and battery pack. All the elements are now in place to tackle fairly complex static rigid body problems. Battery electric vehicles do not have an internal combustion engine and use no on-board gasoline. Instead, they use a highvoltage electric motor, which gets its power from a high-voltage battery pack. The primary benefit of BEVs is that they completely eliminate carbon dioxide (CO2) and other emissions directly from the vehicle. Therefore, it is vital to raise global ecological awareness and wider public education regarding ecology. Goal of this book is to bring closer to the readers new drive technologies that are intended to environment and nature protection. New Generation of Electric Vehicles presents modern technique achievements and technologies applied in the implementation of electric vehicles. Special attention was paid to energy efficiency of electrical vehicles. Also today's trends, mathematical models and computer design elements of future cars are presented.

Female Masculinity - Judith Halberstam 1998

Masculinity without men. In *Female Masculinity* Judith Halberstam takes aim at the protected status of male masculinity and shows that female masculinity has offered a distinct alternative to it for well over two hundred years. Providing the first full-length study on this subject, Halberstam catalogs the diversity of gender expressions among masculine women from nineteenth-century pre-lesbian practices to contemporary drag king performances. Through detailed textual readings as well as empirical research, Halberstam uncovers a hidden history of female masculinities while arguing for a more nuanced understanding of gender categories that would incorporate rather than pathologize them. She rereads Anne Lister's diaries and Radclyffe Hall's *The Well of Loneliness* as foundational assertions of female masculine identity. She considers the enigma of the stone butch and the politics surrounding butch/femme roles within lesbian communities. She also explores issues of transsexuality among "transgender dykes"--lesbians who pass as men--and female-to-male transsexuals who may find the label of "lesbian" a temporary refuge. Halberstam also tackles such topics as women and boxing, butches in Hollywood and independent cinema, and the phenomenon of male impersonators. *Female Masculinity* signals a new understanding of masculine behaviors and identities, and a new direction in interdisciplinary queer scholarship. Illustrated with nearly forty photographs, including portraits, film stills, and drag king performance shots, this book provides an extensive record of the wide range of female masculinities. And as Halberstam clearly demonstrates, female masculinity is not some bad imitation of virility, but a lively and dramatic staging of hybrid and minority genders.

The Annotated Mona Lisa - Carol Strickland 2007-10

This second edition of Carol Strickland's *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* offers an illustrated tutorial of prehistoric to post-modern art from cave paintings to video art installations to digital and Internet media. * Featuring succinct page-length essays, instructive sidebars, and more than 300 photographs, *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* takes art history out of the realm of dreary textbooks, demystifies jargon and theory, and makes art accessible-even

Markets in Vice, Markets in Virtue - John Braithwaite 2005

This sweeping, comparative study of taxation in the United States and Australia shows that even as governments in the Western world have become increasingly sophisticated tax collectors, a competitive and ruthless market in advice on tax avoidance has developed. The same competitive forces in the late twentieth century which have driven down prices and sparked efficiencies in the production of fast food or computer parts have helped stimulate the markets for bads like tax shelters and problem gambling. Braithwaite draws the surprising conclusion that effective regulation could actually flip markets in vice to markets of virtue. Essential reading for anyone involved in policy, governance, and regulation, *Markets in Vice, Markets in Virtue* provides a blueprint for restoring the equity of Western tax systems and a breakthrough theory of how regulators can support markets in virtue and curtail markets in vice.

Practical Risk Management for EPC / Design-Build Projects - Walter A. Salmon 2020-02-25

Many of the books on construction risk management concentrate on theoretical approaches to the accurate assessment of the overall risks of taking on a new project. Less attention is paid to the typical risks to which the operational level of a project is exposed and how operational managers should approach those risks during project implementation. This book identifies precisely where the major EPC/Design-Build risks occur within an operational framework and shows how best to deal with those risks. The book attempts to offer practical advice, approaches and tools for dealing with risks to which the various operational departments are exposed.
