Embedded Microprocessor Systems -

Christian Müller-Schloer 1996

Embedded microprocessor systems are affecting our daily lives at a fast pace, mostly unrecognised by the general public. Most of us are aware of the part they are playing in increasing business efficiency through office applications such as personal computers, printers and copiers. Only a few people, however, fully appreciate the growing role of embedded systems in telecommunications and industrial environments, or even in everyday products like cars and home appliances. The challenge to engineers and managers is not only highlighted by the sheer size of the market, ' 1.5 billion

microcontrollers and microprocessors are produced every year ' but also by the accelerating innovation in embedded systems towards higher complexity in hardware, software and tools as well as towards higher performance and lower consumption. To maintain competitiveness in this demanding environment, an optimum mix of innovation, time to market and system cost is required. Choosing the right options and strategies for products and companies is crucial and rarely obvious. In this book the editors have, therefore, skilfully brought together more than fifty contributions from some of the leading authorities in embedded systems. The papers are conveniently grouped in four sections.

Changes in Degrees - Kc Riley-Gyer 2015-05-07

Sarah is like any other woman with hopes and dreams until an accident takes away her husband but leaves her with a disability. Trying to live life the best she can, she picks up the pieces and start over. Her existence becomes a little less mundane when two men enter her sights during different stages of her life. One a man of mystery who waltzes in and out of her life but stays in her heart. The second from fiction-come-reality who doesn't hide his feelings for her but could mean the death of her. Both vastly different yet both predators and she is attracted to both. However, each of the men bring their own challenges into her life and to her beliefs. If she survives those challenges, whom will she choose as each, in their own ways, bring changes in degrees?
